NON-GAAP FINANCIAL MEASURES

Included in this press release are Funds from Operations, or FFO, Core Funds from Operations, or Core FFO, net operating income, or NOI and Adjusted Earnings Before Interest, Taxes, Depreciation, and Amortization, or Adjusted EBITDA, each a "non-GAAP financial measure," measuring Veris Residential, Inc.'s historical or future financial performance that is different from measures calculated and presented in accordance with generally accepted accounting principles ("U.S. GAAP"), within the meaning of the applicable Securities and Exchange Commission rules. Veris Residential, Inc. believes these metrics can be a useful measure of its performance which is further defined below.

For reconciliation of FFO and Core FFO to Net Income (Loss), please refer to the following pages. For reconciliation of NOI, and Adjusted EBITDA to Net Income (Loss), please refer to the Company's disclosure in the Quarterly Financial and Operating Data package for the first quarter 2023.

FFO

FFO is defined as net income (loss) before noncontrolling interests in Operating Partnership, computed in accordance with U.S. GAAP, excluding gains or losses from depreciable rental property transactions (including both acquisitions and dispositions), and impairments related to depreciable rental property, plus real estate-related depreciation and amortization. The Company believes that FFO per share is helpful to investors as one of several measures of

the performance of an equity REIT. The Company further believes that as FFO per share excludes the effect of depreciation, gains (or losses) from property transactions and impairments related to depreciable rental property (all of which are based on historical costs which may be of limited relevance in evaluating current performance), FFO per share can facilitate comparison of operating performance between equity REITs.

FFO per share should not be considered as an alternative to net income available to common shareholders per share as an indication of the Company's performance or to cash flows as a measure of liquidity. FFO per share presented herein is not necessarily comparable to FFO per share presented by other real estate companies due to the fact that not all real estate companies use the same definition. However, the Company's FFO per share is comparable to the FFO per share of real estate companies that use the current definition of the National Association of Real Estate Investment Trusts ("Nareit"). A reconciliation of net income per share to FFO per share is included in the financial tables accompanying this press release.

Core FFO

Core FFO is defined as FFO, as adjusted for certain items to facilitate comparative measurement of the Company's performance over time. Core FFO is presented solely as supplemental disclosure that the Company's management believes provides useful information to investors and analysts of its results, after adjusting for certain items to facilitate comparability of its performance from period to period. Core FFO is a non-GAAP financial measure that is not intended to represent cash flow and is not indicative of cash flows provided by operating activities as determined in accordance with GAAP. As there is not a generally accepted definition established for Core FFO, the Company's measures of Core FFO may not be comparable to the Core FFO reported by other REITs. A reconciliation of net income per share to Core FFO in dollars and per share is included in the financial tables accompanying this press release.

NOI and Same Store NOI

NOI represents total revenues less total operating expenses, as reconciled to net income above. The Company considers NOI to be a meaningful non-GAAP financial measure for making decisions and assessing unlevered performance of its property types and markets, as it relates to total return on assets, as opposed to levered return on equity. As properties are considered for sale and acquisition based on NOI estimates and projections, the Company utilizes this measure to make investment decisions, as well as compare the performance of its assets to those of its peers. NOI should not be considered a substitute for net income, and the Company's use of NOI may not be comparable to similarly titled measures used by other companies. The Company calculates NOI before any allocations to noncontrolling interests, as those interests do not affect the overall performance of the individual assets being measured and assessed.

Same Store NOI is presented for the same store portfolio, which comprises all properties that were owned by the Company throughout both of the reporting periods.

Blended Net Rental Growth Rate

Weighted average of the net effective change in rent (inclusive of concessions) for a lease with a new resident or for a renewed lease compared to the rent for the prior lease of the identical apartment unit.
