Astronics and 3Oe Scientific's Iggy™ Device Wins America by Design: People's Choice Award

Nationally broadcast TV series showcases innovation, ingenuity and design excellence

EAST AURORA, NY, August 5, 2021 -- Astronics Corporation (Nasdaq: ATRO), a leading provider of advanced technologies for global aerospace, defense, and other mission critical industries, and 3Oe Scientific Inc., a science technology company leveraging aqueous ozone to eradicate harmful pathogens, announced that the Iggy™ hand rinsing device has been declared winner of America by Design: People's Choice Award. 3Oe Scientific partnered with [PDT, an Astronics Company](#), to design and manufacture Iggy™ in response to the Covid-19 pandemic.

The design project, "[3Oe & PDT: Saving Lives With Engineered Water](#)," was selected from nearly 30 featured innovations in Season 1 of the nationally broadcast "America by Design" television series [showcased in Episode 4](#). The series features every type of innovation, from personal devices to transportation and medical advancements, uncovering the key ingredients of impactful design. Chosen by the viewers, Iggy™ edged out the top 10 finalists to be voted America's favorite innovation to win the [People's Choice Award](#).

Iggy™ uses 3Oe Scientific's proprietary technology to produce an intense spray fortified with aqueous ozone that does not cause skin irritation. When used as part of an overall approach to health and wellbeing, Iggy™ enhances the effectiveness of hand hygiene programs that reduce the risk of transmission of infectious microbes.

Astronics is the exclusive manufacturer of Iggy™, paving the way to meet the growing demand for aqueous ozone technology and harness the power of nature's chemical-free disinfectant. Iggy™ was designed to simplify and improve the traditional 20-second hand rinsing process with its user-centered design approach. PDT and 3Oe Scientific developed Iggy™ after extensive research, design, engineering and prototype iterations. The connected device ensures a frictionless, touch-free experience with complete spray coverage, eliminating hand-rubbing.

"We are honored to be chosen by the viewers of America by Design," said Mark Schwartz, Vice President of PDT. "The program featured so many great innovations and we are proud to see that the significant design work behind Iggy™ was recognized among them."

Dr. Thomas Foust, Founder and CEO of 3Oe Scientific, said, "We're excited for the recognition this incredible award brings to aqueous ozone technology. Our goal is to create healthier communities, and this helps raise awareness as Iggy™ continues to be installed in schools, businesses and public areas across America."

Iggy™ uses aqueous ozone, known to kill coronavirus in seconds, and is being installed in schools across the country.

About Astronics Corporation

Astronics Corporation (Nasdaq: ATRO) serves the world's aerospace, defense, and other mission critical industries with proven, innovative technology solutions. Astronics works side-by-side with customers, integrating its array of power, connectivity, lighting, structures, interiors and test technologies to solve complex challenges. For over 50 years, Astronics has delivered creative, customer-focused solutions with exceptional responsiveness. Today, global airframe manufacturers, airlines, militaries, completion centers and Fortune 500 companies rely on the collaborative spirit and innovation of Astronics. The Company's strategy is to increase its value by developing technologies and capabilities that provide innovative solutions to its targeted markets.
