Boardwalktech and HCL Enter into Global Partnership

Palo Alto, California – November 16, 2016

Boardwalktech, Inc., a provider of collaborative applications for the enterprise and developer of the patented Boardwalk Application Engine (BAE) announced today that it has entered into a global business partnership with HCL Technologies Limited -- a global IT services company offering services including IT consulting, enterprise transformation, remote infrastructure management, engineering and R&D, and business process outsourcing (BPO).

Through the partnership, HCL will be able to provide Boardwalk-based applications and services to its customers in the many industries it services across all sectors of the economy on a global basis. As part of its dedication to delivering more value for our clients, HCL will work with Boardwalktech to digitalize, scale, and secure manual processes run on the desktop today mostly in spreadsheets.

“HCL is one of the premier global information technology companies and we are excited about the opportunity to engage the market further as part of HCL’s extended presence,” discusses Andrew T. Duncan, CEO of Boardwalktech. “With numerous industry recognitions and strong performance in a tough global market, HCL has proved it has the right mix of people, process, and technology offerings which now includes Boardwalktech.”

For more information, please contact Boardwalktech or your local HCL office.

About Boardwalktech:

Boardwalktech provides a patented, collaborative enterprise data management technology offered as either a platform service or industry specific application delivered on premise or in the cloud which automates and scales manual processes typically run today in spreadsheets making them enterprise quality and available across multiple platforms and devices and integrated with the extended enterprise.
