Volcon Partners With Accelera for Latin American Expansion to Meet Demand

Unique partnership will bring the first ever off-road, all-electric powersports brand to the Spanish-speaking world

AUSTIN, Texas, Feb. 24, 2021 /PRNewswire/ -- Volcon ePowersports, the first all-electric, off-road powersports company, today announced their expansion into the Latin American market with its partnership with Accelera International. Effective immediately, Accelera will begin outreach and sales to Mexico, South America, and the Caribbean for distribution of Volcon products.

"The Volcon Grunt and the other electric, off-road Volcon products lend themselves well to the terrain, needs and recreation of Central and South American countries as well as the Caribbean," said Andrew Leisner, Chief Executive Officer of Volcon, Inc. "We've received strong interest from all over the world from potential importers due to Volcon's ability to navigate rough, rain-soaked dirt roads, explore in an eco-friendly fashion, or for resort-rental fun. This strategic partnership with Accelera is the first phase of our international expansion plans that will help us bring the fun and utility of Volcon vehicles to Latin America."

Cristian Liani, Accelera's Sales Director, is excited to meet the enormous demand in Latin America with this new partnership. "Volcon is disrupting the powersports industry with their one of a kind, fully electric off-road trail bikes and their upcoming 4-wheel electric vehicle line-up. The future of powersports is undoubtedly electric and we believe that Volcon is the company that will lead this charge. We are incredibly excited to partner with Volcon in introducing the most advanced off-road electric vehicles to South America and the Caribbean."

Volcon electric vehicles provide fun, family-friendly off-road adventures as well as backcountry sportsman exploration, along with practical utility. The company's first electrified off-road vehicles will be the two-wheeled Grunt and Runt trail bikes. Deliveries to early reservation holders begin in Spring 2021. Four-wheeled Stag and Beast models will follow in late 2021 into 2022.
