Primary F1 revenue is comprised of (i) race promotion fees, (ii) broadcasting fees and (iii) advertising and sponsorship fees. Results in the first quarter of 2019 were favorably impacted by the timing of the 2019 race calendar, with two races taking place in the first quarter of 2019 compared to one race in the first quarter of 2018.

Race promotion revenue increased primarily due to the additional race held in the first quarter of 2019. Broadcast revenue increased due to the higher proportionate recognition of season-based income during the quarter (2/21 races took place in the first quarter of 2019 compared to 1/21 in the first quarter of 2018) and contractual rate increases. Advertising and sponsorship revenue increased due to the additional race in the first quarter of 2019 and revenue from new sponsorship agreements entered into beginning in the second half of 2018. Other F1 revenue also increased in the first quarter primarily due to the additional event held, which resulted in increased revenue from the Paddock Club, support events, television production and other technical services.

Operating loss decreased and adjusted OIBDA⁽²⁾ increased in the first quarter as revenue growth driven by the additional race and underlying contract terms more than offset elevated costs. Cost of F1 revenue increased primarily due to higher team payments driven by the pro rata recognition of such payments across the race season, as well as increased costs associated with the additional race including technical, travel and logistics, hospitality and Formula 2 costs. Selling, general and administrative expense increased primarily as a result of higher marketing costs associated with the promotion of the start of the season and F1's digital and fan engagement initiatives.

F1's total net debt to covenant OIBDA ratio, as defined in F1's credit facilities for covenant calculations, was approximately 5.80x as of March 31, 2019, as compared to a maximum allowable leverage ratio of 8.25x. The race calendar variances between 2018 and 2019 resulted in income from 22 races falling in the trailing twelve months measured for F1's covenant calculations as of March 31, 2019.

The businesses and assets attributed to the Formula One Group consist of Liberty Media's subsidiary F1, its interest in Live Nation, minority equity investments and an intergroup interest in the Braves Group. There are approximately 9.1 million notional shares of the Braves Group underlying the Formula One Group's 15.1% intergroup interest as of April 30, 2019.

BRAVES GROUP – The following table provides the financial results attributed to the Braves Group for the first quarter of 2019. In the first quarter, approximately \$2 million of corporate level selling, general and administrative expense (including stock-based compensation expense) was allocated to the Braves Group.

Operating loss	<u>\$ (49)</u>	<u>\$ (47)</u>	<u>4 %</u>

Baseball revenue is comprised of (i) ballpark operations, (ii) local and national broadcast rights and (iii) licensing and other shared MLB revenue streams. Development revenue is derived from the Battery Atlanta mixed-use facilities and primarily includes rental income.

There were no home games in the first quarter of 2019, compared to three home games in the first quarter of 2018. A modest amount of baseball revenue in the first quarter of 2019 was derived from non-game day revenue sources, and development revenue was flat in the first quarter of 2019. Operating loss and adjusted OIBDA improved modestly in the first quarter of 2019.

The Formula One Group holds an approximate 15.1% intergroup interest in the Braves Group as of April 30, 2019. Assuming the issuance of the shares underlying the intergroup interest held by the Formula One Group, the Braves Group outstanding share count as of April 30, 2019 would have been 60 million.

The businesses and assets attributed to the Braves Group consist primarily of Liberty Media's subsidiary the Braves, which indirectly owns the Atlanta Braves Major League Baseball Club, six minor league baseball clubs and certain assets and liabilities associated with the Braves' ballpark and mixed-use development project.

Share Repurchases

From February 1, 2019 through April 30, 2019, Liberty Media repurchased approximately 4.0 million Series C Liberty SiriusXM shares (Nasdaq: LSXMK) at an average cost per share of \$40.33 for total cash consideration of \$160 million. The total remaining repurchase authorization for Liberty Media is approximately \$563 million and can be applied to repurchases of Series A and Series C shares of any of the Liberty Media Corporation tracking stocks.

- (6) Net debt to covenant OIBDA ratio of F1 operating business as defined in F1's credit facilities for covenant calculations. There were 22 races in the trailing twelve months measured for F1's covenant calculations as of March 31, 2019.

Total cash and liquid investments attributed to Liberty SiriusXM Group was essentially flat in the first quarter as cash from operations at SiriusXM and net borrowings were offset by return of capital at both Liberty SiriusXM Group and SiriusXM. Included in the cash and liquid investments balance attributed to Liberty SiriusXM Group at March 31, 2019 is \$62 million held at SiriusXM. Although SiriusXM is a consolidated subsidiary, it is a separate public company with a significant non-controlling interest, therefore Liberty Media does not have unfettered access to SiriusXM's cash balances.

Total debt attributed to Liberty SiriusXM Group increased \$532 million during the quarter primarily as a result of the consolidation of Pandora's debt post acquisition, additional borrowing under SiriusXM's credit facility and additional borrowing under Liberty SiriusXM Group's margin loan to fund share repurchases.

Total cash and liquid investments attributed to the Formula One Group increased \$212 million during the quarter, primarily as a result of cash from operations at F1 driven by the receipt of advance contract payments for the 2019 season, while the majority of costs, including team payments, are paid in arrears.

Total cash and liquid investments attributed to the Braves Group increased \$56 million during the quarter. Total debt attributed to the Braves Group decreased \$14 million during the quarter due to paying down a portion of the team revolver. The second phase of the Battery Atlanta mixed-use development is expected to cost approximately \$200 million, which the Braves and affiliated entities expect to fund through a mix of approximately \$55 million in equity and approximately \$145 million in net debt.

NON-GAAP FINANCIAL MEASURES

SCHEDULE 1

This press release includes a presentation of adjusted OIBDA, which is a non-GAAP financial measure, for the Liberty SiriusXM Group, the Braves Group and the Formula One Group, together with reconciliations to operating income, as determined under GAAP. Liberty Media defines adjusted OIBDA as revenue less operating expenses, and selling, general and administrative expenses, excluding all stock based compensation, and excludes from that definition depreciation and amortization, restructuring and impairment charges and

separately reported legal settlements that are included in the measurement of operating income pursuant to GAAP.

Liberty Media believes adjusted OIBDA is an important indicator of the operational strength and performance of its businesses, including each business' ability to service debt and fund capital expenditures. In addition, this measure allows management to view operating results and perform analytical comparisons and benchmarking between businesses and identify strategies to improve performance. Because adjusted OIBDA is used as a measure of operating performance, Liberty Media views operating income as the most directly comparable GAAP measure. Adjusted OIBDA is not meant to replace or supersede operating income or any other GAAP measure, but rather to supplement such GAAP measures in order to present investors with the same information that Liberty Media's management considers in assessing the results of operations and performance of its assets.

The following table provides a reconciliation of adjusted OIBDA for Liberty Media to operating income calculated in accordance with GAAP for the three months ended March 31, 2018 and March 31, 2019, respectively.

- (1) During the first quarter of 2019, SiriusXM recorded a one-time expense of \$25 million related to a legal settlement reserve for Do-Not-Call litigation. This charge is included in SiriusXM's selling, general and administrative expense, but has been excluded from Adjusted OIBDA for the corresponding period as this charge does not relate to the ongoing performance of the business.

SCHEDULE 2

This press release also includes a presentation of adjusted EBITDA of SiriusXM, which are non-GAAP financial measures used by SiriusXM, together with a reconciliation to SiriusXM's stand-alone net income, as determined under GAAP. SiriusXM defines adjusted EBITDA as net income before interest expense, income tax expense and depreciation and amortization. SiriusXM adjusts EBITDA to exclude the impact of other income as well as certain other charges discussed below. Adjusted EBITDA is a Non-GAAP financial measure that excludes (if applicable): (i) certain adjustments as a result of the purchase price accounting for the XM Merger and the Pandora acquisition, (ii) predecessor net income adjusted for certain expenses, including depreciation and amortization, other income (loss), and share-based payment expense for January 2019 and the three months ended March 31, 2018, (iii) share-based payment expense and (iv) other significant operating expense (income) that do not relate to the on-going performance of its business. SiriusXM believes adjusted EBITDA is a useful measure of the underlying trend of its operating performance, which provides useful information about its business apart from the costs associated with its capital structure and purchase price accounting. SiriusXM believes investors find this Non-GAAP financial measure useful when analyzing past operating performance with current performance and comparing operating performance to the performance of other communications, entertainment and media companies. SiriusXM believes investors use adjusted EBITDA to estimate current enterprise value and to make investment decisions. As a result of large capital investments in SiriusXM's satellite radio system, its results of operations reflect significant charges for depreciation expense. SiriusXM believes the exclusion of share-based payment expense is useful as it is not directly related to the operational conditions of its business. SiriusXM also believes the exclusion of the legal settlements and reserves, acquisition related costs, loss on extinguishment of debt and loss on disposal of assets, to the extent they occur during the period, is useful as they are significant expenses not incurred as part of normal operations for the period.

Adjusted EBITDA has certain limitations in that it does not take into account the impact to SiriusXM's statements of comprehensive income of certain expenses, including share-based payment expense and certain purchase price accounting for the XM Merger and the Pandora acquisition. SiriusXM endeavors to compensate for the limitations of the Non-GAAP measure presented by also providing the comparable GAAP measure with equal or greater prominence and descriptions of the reconciling items, including quantifying such items, to derive the Non-GAAP measure. Investors that wish to compare and evaluate operating results after giving effect for these costs, should refer to net income as disclosed in SiriusXM's unaudited consolidated statements of comprehensive income. Since adjusted EBITDA is a Non-GAAP financial performance measure, SiriusXM's calculation of adjusted EBITDA may be susceptible to varying calculations; may not be comparable to other similarly titled measures of other companies; and should not be considered in isolation, as a substitute for, or superior to measures of financial performance prepared in accordance with GAAP. The reconciliation of net income to the adjusted EBITDA is calculated as follows:
