Vivani Medical to Participate in the H.C. Wainwright 26th Annual Global Investment Conference

ALAMEDA, Calif.--(BUSINESS WIRE)-- Vivani Medical, Inc. (Nasdaq: [VANI](#)) ("Vivani" or the "Company"), an innovative biopharmaceutical company developing miniature, ultra long-acting, subdermal drug implants, today announced its plans to participate in the H.C. Wainwright 26th Annual Global Investment Conference taking place September 9-11, 2024 in New York, New York.

Vivani's Chief Executive Officer, Adam Mendelsohn, Ph.D., will host one-on-one meetings with investors at the Conference in addition to providing an overview of the Company. Details of this presentation are as follows:

Date: Wednesday, September 11, 2024

Time: 10-10:30 a.m. Eastern Time

Location: Adams Room (Fourth floor), Lotte New York Palace, New York, NY

The Company presentation will be available via webcast starting at 10 a.m. ET on September 11 at the following link: <https://journey.ct.events/view/a00c80c3-0668-4058-b4ca-4aad48978600>.

The presentation will also be available on the Company's website under the "News & Events" tab of the Vivani Investor page: <https://investors.vivani.com/investors/news-events>.

About Vivani Medical, Inc.

Leveraging its proprietary NanoPortal™ platform, Vivani develops biopharmaceutical implants designed to deliver drug molecules steadily over extended periods of time with the goal of guaranteeing adherence, and potentially to improve tolerance to their medication. Vivani's lead program, NPM-115, will evaluate a miniature, six-month, subdermal, GLP-1 (exenatide) implant for chronic weight management in obese or overweight patients. Vivani's emerging pipeline also includes NPM-139 (semaglutide implant) which is also under development for chronic weight management in obese and overweight patients. NPM-139 has the added potential benefit of once-yearly administration. NPM-119 refers to the Company's clinical program which will evaluate its six-month, subdermal exenatide implant for the treatment of type 2 diabetes. Both NPM-115 and NPM-119 will evaluate exenatide implants with a higher-dose associated with NPM-115 for chronic weight management in obese or overweight patients. These NanoPortal implants are designed to provide patients with the opportunity to realize the full potential benefit of their medication by avoiding the challenges associated with the daily or weekly administration of orals and injectables.

Medication non-adherence occurs when patients do not take their medication as prescribed. This affects an alarming number of patients, approximately 50%, including those taking daily pills. Medication non-adherence, which contributes to more than \$500 billion in annual avoidable healthcare costs and 125,000 potentially preventable deaths annually in the U.S. alone, is a primary and daunting reason obese or overweight patients, and patients taking type 2 diabetes or other chronic disease treatments face significant challenges in achieving positive real-world effectiveness. While the current GLP-1 landscape includes over 50 new molecular entities under clinical stage development, Vivani remains confident that its highly differentiated portfolio of miniature long-acting GLP-1 implants have the potential to provide an attractive therapeutic option for patients, prescribers and payers.

Forward-Looking Statements

This press release contains certain “forward-looking statements” within the meaning of the “safe harbor” provisions of the US Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as: “target,” “believe,” “expect,” “will,” “may,” “anticipate,” “estimate,” “would,” “positioned,” “future,” and other similar expressions that in this press release, including statements regarding Vivani’s business, products in development, including the therapeutic potential thereof, the planned development therefor, the initiation of the LIBERATE-1 trial and reporting of trial results, Vivani’s emerging development plans for NPM-115, NPM-139, and NPM-119. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on Vivani’s current beliefs, expectations, and assumptions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of Vivani’s control. Actual results and outcomes may differ materially from those indicated in the forward-looking statements. Therefore, you should not rely on any of these forward-looking statements. Important factors that could cause actual results and outcomes to differ materially from those indicated in the forward-looking statements include, among others, risks related to the development and commercialization of Vivani’s products, including NPM-115, NPM-139, and NPM-119; delays and changes in the development of Vivani’s products, including as a result of applicable laws, regulations and guidelines, potential delays in submitting and receiving regulatory clearance or approval to conduct Vivani’s development activities, including Vivani’s ability to commence clinical development of NPM-115; risks related to the initiation, enrollment and conduct of Vivani’s planned clinical trials and the results therefrom; Vivani’s history of losses and Vivani’s ability to access additional capital or otherwise fund Vivani’s business. There may be additional risks that the Company considers immaterial, or which are unknown. A further list and description of risks and uncertainties can be found in the Company’s most recent Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission filed on March 26, 2024, as updated by the Company’s subsequent Quarterly Reports on Form 10-Q. Any forward-looking statement made by Vivani in this press release is based only on information currently available to the Company and speaks only as of the date on which it is made. The Company undertakes no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of added information, future developments or otherwise, except as required by law.
