Skillsoft to Help IEEE Computer Society Deliver Technology Training Resources to Global Audience of Computing Professionals

Agreement provides online technical and professional skills courses, books and certifications using audio, video, mentoring and other new educational formats

NASHUA, N.H. & LOS ALAMITOS, Calif.--(BUSINESS WIRE)-- Skillsoft today announced a new agreement with the IEEE Computer Society to deliver technology learning content to a global workforce of professionals and leaders in the field. IEEE Computer Society will offer 16 of Skillsoft's KnowledgeCenter learning portals, which include materials from the Skillsoft Books24x7 online book collection, to its members to help them develop skills and knowledge around a broad scope of technology topics as quickly and efficiently as possible.

Resources available to IEEE Computer Society members include online courses, books, videos, simulations, practice certification exams, mentoring services and more. Content covers a wide range of technology topics, including cloud computing, security, coding, operating systems and many others. Skillsoft provides cloud-based learning solutions for its customers worldwide, ranging from global enterprises, government and education to mid-sized and small businesses.

"We are dedicated to providing our members with the most up-to-date and advanced information on the more important technologies and trends of the global computing industry. Our arrangement with Skillsoft allows us to deliver content that is organized and targeted to ensure the best learning outcomes," said Violet Doan, director of membership, IEEE Computer Society. "As the largest IEEE society and world's leading computing membership organization, giving our members access to the most relevant and structured content is imperative. We're excited to add Skillsoft to our collection of member benefits."

"IEEE Computer Society's vision and enthusiasm for learning positively impacts the entire industry. With technology evolving so quickly, it is essential that computing and technology professionals have access to educational content that covers a wide variety of topics and is available to them through rich and varied learning techniques and channels," said John Ambrose, senior vice president, strategy, corporate development and emerging business, Skillsoft. "We are thrilled to work with IEEE Computer Society and further help computing professionals develop in their careers."

Skillsoft's KnowledgeCenter portals are designed to provide learners with targeted content on a specific topic to help build knowledge quickly and efficiently. Users can locate essential topic-oriented content fast and easily, which allows them to apply that knowledge to their jobs as soon as possible. Skillsoft's Books24x7 collections include the full text of thousands

of leading professional books from the industry's top authors and publishers as well as concise summaries of leading business books, live and on-demand videos, best practices and analyst reports. Content covers hundreds of technology topics, including desktop applications, databases, hardware, graphic design, operating systems, programming languages, security and many more.
