UiPath Named a 2019 Inc. Best Workplace

NEW YORK--(BUSINESS WIRE)-- The leading robotic process automation (RPA) software company, UiPath, has been voted by employees as one of Inc.'s Best Workplaces for 2019, the magazine's fourth annual ranking of private, fast-growing American companies that have created exceptional workplaces through vibrant cultures, deep employee engagement and stellar benefits. UiPath is leading the "automation first" era with a vision to provide one robot for every person, and at a valuation of $7 billion, is one of the fastest growing and highest-valued AI enterprise software companies worldwide.

UiPath is growing at an unprecedented rate for an enterprise software company: the company has grown its employee base to over 2,500, a 16x increase since April 2017. Maintaining and building a culture that promotes diverse thinking and inspiration across such a large organization is not an easy feat, but is a cornerstone of CEO Daniel Dines' management style.

"When I started UiPath, my goal was to build a company that I wanted to work for. The workplace should be our playground, a place where everyone is excited to wake up for every day," said Dines. "Being awarded an Inc. Best Workplace is truly an honor because it means I've built a company that others are happy to work for, too. When the team feels valued, engaged and empowered, everyone thrives -- employees, the organization and our customers."

This is not the first time UiPath's culture has been recognized: among tens of thousands of large U.S. companies, UiPath was awarded the 11th Best Place to Work in the Comparably 2018 Culture Awards and was ranked sixth for Happiest Employees.

In addition, the company has seen other recent milestones, including its Series D financing round of $568 million. It was also named the 26th fastest growing company in North America on the Deloitte Fast 500 and listed to CB Insights' AI 100, a list showcasing the 100 most promising private artificial intelligence companies in the world.

About UiPath
UiPath is leading the "automation first" era – championing one robot for every person, delivering free and open training and collaboration and enabling robots to learn new skills through AI and machine learning. Led by a commitment to bring digital era skills to more than a million people, the company's enterprise Robotic Process Automation (RPA) platform has already automated millions of repetitive, mind-numbing tasks for business and government organizations all over the world, improving productivity, customer experience and employee job satisfaction.

Recently named by Comparably as the 6th happiest place to work and the 11th best company culture among large businesses, UiPath is one of the fastest growing and highest-valued AI enterprise software companies worldwide.
