

INVESTOR
PRESENTATION
Q3 2025

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements relating to the expected performance of our business, future financial results, strategy, long-term growth and overall future prospects, our customers’ continued investment in digital transformation and reliance on digital intelligence and the size and our ability to capitalize on our market opportunity, and statements relating to our guidance for 2025. Forward-looking statements include all statements that are not historical facts. Such statements may be preceded by the words “intends,” “may,” “will,” “plans,” “expects,” “anticipates,” “projects,” “predicts,” “estimates,” “aims,” “believes,” “hopes,” “potential” or similar words. These forward-looking statements reflect our current views regarding our intentions, products, services, plans, expectations, strategies and prospects, which are based on information currently available to us and assumptions we have made. Actual results may differ materially from those described in such forward-looking statements and are subject to a number of known and unknown risks, uncertainties, other factors and assumptions that are beyond our control. Such risks and uncertainties include, without limitation, risks and uncertainties associated with: (i) our expectations regarding our revenue, expenses and other operating results; (ii) our ability to acquire new customers and successfully retain existing customers; (iii) our ability to increase usage of our solutions and upsell and cross-sell additional solutions; (iv) our ability to achieve or sustain profitability; (v) anticipated trends, growth rates, rising interest rates, rising global inflation and current macroeconomic conditions, and challenges in our business and in the markets in which we operate, and the impact of Israel’s war with Hamas and other terrorist organizations, including those in Lebanon and Yemen, and potential hostilities with Iran, Lebanon, and/or other countries in the Middle East on geopolitical and macroeconomic conditions or on our company and business; (vi) future investments in our business, our anticipated capital expenditures and our estimates regarding our capital requirements; (vii) the costs and success of our sales and marketing efforts and our ability to promote our brand; (viii) our reliance on key personnel and our ability to identify, recruit and retain skilled personnel; (ix) our ability to effectively manage our growth, including continued international expansion; (x) our reliance on certain third party platforms and sources for the collection of data necessary for our solutions; (xi) our ability to protect our intellectual property rights and any costs associated therewith; (xii) our ability to identify and complete acquisitions that complement and expand our reach and platform; (xiii) our ability to comply or remain in compliance with laws and regulations that currently apply or become applicable to our business, including in Israel, the United States, the European Union, the United Kingdom and other jurisdictions where we elect to do business; (xiv) our ability to compete effectively with existing competitors and new market entrants; and (xv) the growth rates of the markets in which we compete. These risks and uncertainties are more fully described in our filings with the Securities and Exchange Commission, including in the section entitled “Risk Factors” in our Form 20-F filed with the Securities and Exchange Commission on February 27, 2025, and subsequent reports that we file with the Securities and Exchange Commission. Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, we cannot guarantee future results, levels of activity, performance, achievements, or events and circumstances reflected in the forward-looking statements will occur. Forward-looking statements represent our beliefs and assumptions only as of the date of this presentation. Except as required by law, we undertake no duty to update any forward-looking statements contained in this release as a result of new information, future events, changes in expectations or otherwise.

Certain information contained in this presentation relates to or is based on studies, publications, surveys and other data obtained from third-party sources and the Company’s own internal estimates and research. While the Company believes these third-party sources to be reliable as of the date of this presentation, it has not independently verified, and makes no representation as to the adequacy, fairness, accuracy or completeness of any information obtained from third-party sources. In addition, all of the market data included in this presentation involves a number of assumptions and limitations, and there can be no guarantee as to the accuracy or reliability of such assumptions. Finally, while we believe our own internal research is reliable, such research has not been verified by any independent source.

As a reminder, certain financial measures we use in this presentation and on our call today are expressed on a non-GAAP basis. We use these non-GAAP financial measures internally to facilitate analysis of our financial and business trends and for internal planning and forecasting purposes. We believe these non-GAAP financial measures, when taken collectively, may be helpful to investors because they provide consistency and comparability with past financial performance by excluding certain items that may not be indicative of our business, results of operations, or outlook. However, non-GAAP financial measures have limitations as an analytical tool and are presented for supplemental informational purposes only. They should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Free cash flow represents net cash provided by (used in) operating activities less capital expenditures and capitalized internal-use software costs. Normalized free cash flow represents free cash flow less capital investments related to the Company’s new headquarters, payments received in connection with these capital investments and deferred payments related to business combinations. Non-GAAP operating income (loss), non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating margin, non-GAAP research and development expenses, non-GAAP sales and marketing expenses and non-GAAP general and administrative expenses represents the comparable GAAP financial figure, less share-based compensation, adjustments and payments related to business combinations, amortization of intangible assets and certain other non-recurring items, as applicable and indicated in the above tables.

In accordance with SEC regulations, you can find the definitions of these non-GAAP measures, as well as reconciliations to the most directly comparable GAAP measures in this presentation and in our earnings press release and supplemental financials, which can be found on our investor relations website at ir.similarweb.com. This Presentation does not constitute an offer or an agreement, or a solicitation of an offer or an agreement, to enter into any transaction.

Title and full exclusive ownership rights in the information and intellectual property included or referenced herein (including the Similarweb name, logo and other marks) remain solely with Similarweb (except for third party trademarks and logos, which remain the property of their respective owners). The appearance of any third-party names or logos in these materials does not constitute their endorsement of our products or services. All rights not expressly granted herein are reserved.

This presentation is a high-level summary of our Q3 2025 financial results. For more information please refer to our press release dated November 11, 2025 and filings with the SEC.

Notes: 1. In accordance with SEC regulations, you can find the definitions of these non-GAAP measures, as well as reconciliations to the most directly comparable GAAP measures in this presentation and in our earnings press release and supplemental financials, which can be found on our investor relations website at ir.similarweb.com. 2. We calculate our NRR as of a period end by starting with the ARR from the cohort of all customers as of 12 months prior to such period-end, or the Prior Period ARR. We then calculate the ARR from these same customers as of the current period-end, or the Current Period ARR. Current Period ARR includes any expansion and is net of contraction or attrition over the last 12 months, but excludes ARR from new customers in the current period. We then divide the Current Period ARR by the Prior Period ARR to arrive at the point-in-time NRR. We then calculate the average of the trailing four quarter point-in-time NRR to arrive at the NRR.

ACROSS ALL BUSINESS SIZES

WORLDWIDE

Our Addressable Market

INVESTORS

Want to invest in B2C or B2B companies (private or public) that play in the digital world

B2B

Want to sell (software or services or media) to the digital B2C companies

B2C

Want to capture an audience across all digital channels and monetize it

Our growth strategy

We see an expanding market ahead with strong potential and multiple entry points to further expand our business opportunity.

Financial Overview

Consistent revenue growth

Our large addressable opportunity and efficient business model have led to growing revenue sequentially and year-over-year.

Sustained Customer growth

The growth in our ARR customer base demonstrates the demand and the potential for our data and solutions.

NRR reflects large 2024 upsells

Our dollar-based net retention rate (NRR) historically reflects increased usage and the purchase of more than one solution by customers.

■ NRR All Customers

NRR reflects large 2024 upsells

In our largest and most strategic customer segment, customers that generate over \$100K in ARR, our ability to retain and grow our business consistently exceeds our NRR for all customers.

■ NRR \$100K+ ARR Customers

Multi-year commitments as a percent of ARR

The increase in multi-year commitments as a percentage of ARR provides an encouraging indication of the importance of our data to the decision processes of our customers

Continued progress in customer growth...

As we strengthen our value proposition and expand our platform, new customer acquisition is occurring more at entry level pricing and packaging.

...with sustained growth and expansion of our \$100k ARR customer base

Evolution of our revenue base over time

Attractive sales efficiency and CAC payback metrics historically

Operating Margin	(38%)	(33%)	(2%)	6%	3%	25%
Normalized Free Cash Flow Margin	(22%)	(32%)	(2%)	11%	6%	30%

The Company does not provide guidance for operating loss and gross margin, the most directly comparable GAAP measures to non-GAAP operating loss and non-GAAP gross margin, respectively, and similarly cannot provide a reconciliation to these measures to their closest GAAP equivalents without unreasonable effort due to the unavailability of reliable estimates for certain items. These items are not within the Company's control and may vary greatly between periods and could significantly impact future financial results.

Normalized free cash flow margin	-5%	-22%	-32%	-2%	11%		14%	4%

Addressable Market Calculation

We estimate our addressable market to be \$55B,
based on the following calculation:

For **B2C and B2B companies**, we have based our calculation on our assumption of the potential annual spend on Similarweb products by SMEs (20–1000 employees) and Large Enterprises (1000+ employees). We calculated the number of B2C and B2B companies in the United States in each of these categories using US Census Bureau's "Statistics of US Businesses" Data, and extrapolated the global number utilizing our internal research methodologies. Based on data from Statista, we estimate that 80% of SMEs and 90% of Large Enterprises have a digital presence that would benefit from utilizing our data and products.

For **Investors**, our calculation is based on our estimate of the potential annual spend on Similarweb products by investors in private markets (e.g. Private Equity and Venture Capital firms) and public market investors (e.g. Mutual Funds, Pension Funds, Hedge Funds and other Institutional Investors). We calculated the global number of Private and Public Investors using data from Preqin, Statista, The National Venture Capital Association, as well as Industry Reports by Bain & Company, EY and PWC.

Annual Recurring Revenue (ARR) Calculation

We define ARR as the annualized subscription revenue we would contractually expect to receive from customers assuming no increases or reductions in their subscriptions. A contract is included in ARR for a particular period if it is active at the end of the applicable period and is excluded if it is not active at the end of the applicable period. Multi-year contracts are annualized by dividing the total committed contract value by the number of months in the subscription term and then multiplying by 12. ARR excludes non-recurring revenues, non-subscription revenues, revenues that are one-time in nature or revenues from subscriptions to our offerings for a period that is less than an annual subscription term.

ARR is an operational measure that management uses to evaluate the scale of our annual subscription contracts. While ARR is useful in assessing the scale of our contracted subscription business, it is not necessarily indicative of future GAAP revenue, which is subject to factors such as customer renewals, expansions, contractions, churn and upsell or cross-sell opportunities. Since ARR is not a defined measure under GAAP, investors should not consider ARR as a substitute for revenue recognized under GAAP or for other GAAP-related measures such as remaining performance obligations or deferred revenue. ARR differs from revenue recognized in accordance with GAAP because GAAP revenue is recognized as performance obligations are satisfied, includes non-recurring revenues, such as revenue that is one-time in nature, subscriptions with less than an annual term, non-subscription revenue and the effects of contract modifications.
