OUR POSITIONING 2023

Capital	✓ Cash take-out from our existing RPL portfolio serves as a significant source of capital. ✓ 14 deals callable in 2023, 4 deals callable in 2024, and 6 deals callable in 2025. ✓ The longer these deals are outstanding, the greater the potential cash take-out.
Portfolio Investments	✓ Deployed capital into Seasoned RPL, Non-QM (DSCR) Investor Loans, and BPL sectors and completed 8 securitizations year-to-date. ✓ We will continue to grow the residential credit portfolio as opportunities arise.
Credit Performance	✓ Our existing loan portfolio remains stable given low-LTVs (Wavg HPI LTV of 45%) and 181 months of seasoning. ✓ Potential for equity book value to increase approximately \$400 million if the accretable discount (net of premiums) on all assets and securitized debt were to be realized with current loss assumptions. Potential for equity book value to increase approximately \$700 million assuming all assets and securitized debt were repaid at par value.
Financing & Liquidity ⁽¹⁾	✓ Reduced our total recourse financing exposure by approximately \$827 million. ✓ Chimera has \$121 million in cash and \$380 million in unencumbered assets. ✓ Recourse leverage of 1.1x from 1.0x in Q2 2023.
Interest Rate Hedging ⁽¹⁾	✓ Current hedges are positioned in anticipation of the end of the Fed tightening cycle. ✓ 1-year interest rate swaps protect 52% of our floating rate repos ⁽²⁾ and \$1.5 billion of 1x1 interest rate swaptions gives us flexibility in case the Fed holds rates higher through 2025.

EARNINGS AVAILABLE FOR DISTRIBUTION

Earnings available for distribution is a non-GAAP measure and is defined as GAAP net income excluding unrealized gains or losses on financial instruments carried at fair value with changes in fair value recorded in earnings, realized gains or losses on the sales of investments, gains or losses on the extinguishment of debt, changes in the provision for credit losses, other gains or losses on equity investments, and transaction expenses incurred. Transaction expenses are primarily comprised of costs only incurred at the time of execution of our securitizations and certain structured secured financing agreements and include costs such as underwriting fees, legal fees, diligence fees, bank fees and other similar transaction related expenses. These costs are all incurred prior to or at the execution of the transaction and do not recur. Recurring expenses, such as servicing fees, custodial fees, trustee fees and other similar ongoing fees are not excluded from earnings available for distribution. We believe that excluding these costs is useful to investors as it is generally consistent with our peer groups treatment of these costs in their non-GAAP measures presentation, mitigates period to period comparability issues tied to the timing of securitization and structured finance transactions, and is consistent with the accounting for the deferral of debt issue costs prior to the fair value election option made by us. In addition, we believe it is important for investors to review this metric which is consistent with how management internally evaluates the performance of the Company. Stock compensation expense charges incurred on awards to retirement eligible employees is reflected as an expense over a vesting period (generally 36 months) rather than reported as an immediate expense.

Earnings available for distribution is the Economic net interest income, as defined previously, reduced by compensation and benefits expenses (adjusted for awards to retirement eligible employees), general and administrative expenses, servicing and asset manager fees, income tax benefits or expenses incurred during the period, as well as the preferred dividend charges.

We view Earnings available for distribution as one measure of our investment portfolio's ability to generate income for distribution to common stockholders. Earnings available for distribution is one of the metrics, but not the exclusive metric, that our Board of Directors uses to determine the amount, if any, of dividends on our common stock. Other metrics that our Board of Directors may consider when determining the amount, if any, of dividends on our common stock include (among others) REIT taxable income, dividend yield, book value, cash generated from the portfolio, reinvestment opportunities and other cash needs. In addition, Earnings available for distribution is different than REIT taxable income and the determination of whether we have met the requirement to distribute at least 90% of our annual REIT taxable income (subject to certain adjustments) to our stockholders in order to maintain qualification as a REIT is not based on Earnings available for distribution. Therefore, Earnings available for distribution should not be considered as an indication of our REIT taxable income, a guaranty of our ability to pay dividends, or as a proxy for the amount of dividends we may pay. We believe Earnings available for distribution as described above helps us and investors evaluate our financial performance period over period without the impact of certain transactions. Therefore, Earnings available for distribution should not be viewed in isolation and is not a substitute for net income or net income per basic share computed in accordance with GAAP. In addition, our methodology for calculating Earnings available for distribution may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and accordingly, our Earnings available for distribution may not be comparable to the Earnings available for distribution reported by other REITs.

EARNINGS AVAILABLE FOR DISTRIBUTION (CONTINUED)
