*Planned/Future

Columbia Gateway

SEGMENT:

Defense /IT

DEMAND DRIVER:

Fort Meade + General Commercial (hi-tech & cybersecurity)

LOCATION:

Southwest quadrant of the I-95 and MD Route 175 intersection, 7 miles from Fort Meade and midway between Baltimore, MD, and Washington, DC.

HISTORY:

Columbia Gateway (CG) business and innovation park consists of 5.5 million SF of office properties and 2.7 million SF of industrial distribution facilities on 630-acres in Howard County, MD. Located in the southwest quadrant of the I-95 and MD-Route 175 intersection, the park is approximately seven miles from Fort George G. Meade (Ft. Meade). From 1972 until 1990, the park housed General Electric's appliance manufacturing and distribution operations. Columbia Gateway is surrounded by a wide array of retail and food amenities, as well as, a broad spectrum of rental and single- and multi-family homes. Additionally, the Howard County Public School System ranks among the top educational systems in the U.S.

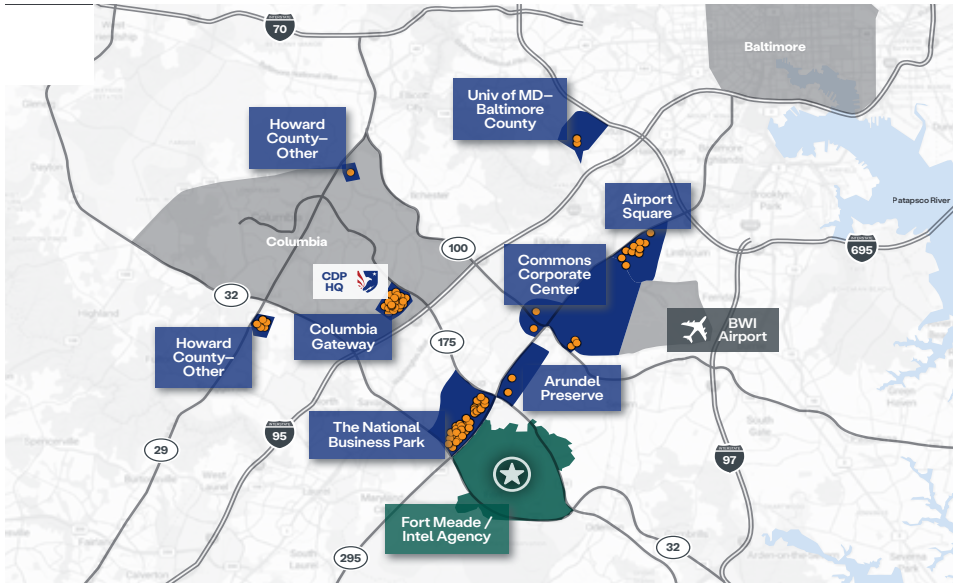

COPT Defense opportunistically acquired several older flex buildings in Columbia Gateway in 1998, and now owns 2.5 million SF of the park's office supply with its recent acquisition of 6841 Benjamin Franklin Drive. Our Company believes the park's proximity to I-95 and Ft. Meade, combined with the surrounding residential supply and robust amenities, form an attractive live-work-play lifestyle in an affordable, suburban setting. For all these reasons, Columbia Gateway represents a compelling location that has attracted a wide array of companies. Since the U.S. Cyber Command was established at Ft. Meade in 2010, an increasing number of hi-tech and cybersecurity-oriented companies have elected to make Columbia Gateway their home.

MARKET COMPARISON:

COMPETITIVE OFFICE MARKET OVERVIEW*

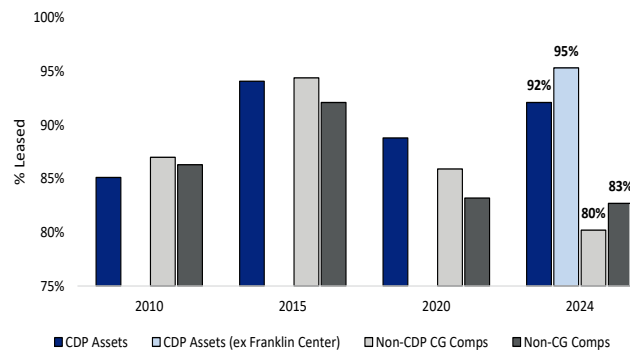

COMPETITIVE OFFICE MARKET OVERVIEW*

From Maple Lawn in southern Howard County to University Parkway along Route 100, the competitive Columbia Gateway micromarkets contain ~10 million square feet of inventory. Multiple demand drivers, including government healthcare contractors, defense contractors, and cybersecurity users have generated growth.

- > **Supply:** No new supply is under construction. The last new development was Howard Hughes' 6100 Merriweather Drive delivered in 4Q 2019; this 326,000 SF building is approximately 96% leased, with Tenable and CareFirst BlueCross BlueShield as the anchor tenants.
- > **Demand:** Cybersecurity remains one of the primary drivers of net new demand in the Columbia market, while a mix of professional and business services firms are drawn to the submarket as well.
- > **Rents:** Asking rents of \$27.55 in the competitive micromarkets are up 12% since bottoming at \$24.67 in 2Q 2015, over the last 10 years. However, they have declined 17% since peaking in 1Q 2020. Additionally, rent growth in existing product outside of mixed-use projects has been relatively flat.
- > **Sales:** In March 2024, COPT Defense acquired 6841 Benjamin Franklin Drive, which was 56% leased upon acquisition (now 79% leased) and 202,000 SF, representing \$75/SF and an initial Cash NOI yield of 11.2%. In 3Q 2022, 7700 Montpelier Road sold for \$12 million, representing \$283/SF and a 5.6% cap rate. In 2Q 2022, a 3 property flex portfolio, located at 6630-6650 Eli Whitney Drive, sold for \$24.5 million, representing \$205/SF and a 4.0% cap rate.

% LEASED (DIRECT VACANCY)*

COLUMBIA GATEWAY OUTLOOK*

A broad set of demand drivers sustain occupancy growth

- > Columbia sits between two growing nodes of federal government contractor activity: defense contractors at Ft. Meade, and healthcare contractors for the U.S. Social Security Administration and Centers for Medicare and Medicaid in Woodlawn. Along with growing technology and professional business services firms drawn to its location along I-95 between Washington, DC and Baltimore, the submarket is positioned to maintain consistent occupancy growth.
- > Limited development opportunity outside of mixed-use projects in Downtown Columbia and Maple Lawn, along with consistent occupancy growth, should stabilize rent and occupancy trends.

* Source: CoStar Combined Data and List - Columbia Gateway 4Q24

FUN FACT:

- > The Academy Award nominated actor, Edward Norton, grew up in Columbia, and is a grandson of The Rouse Company's founder, James Rouse.

TWO PARCELS FOR FUTURE DEVELOPMENT

COPT Defense can develop up to 290,000 SF on two parcels of land it owns and that front I-95.
(See aerial on pages 2-3, as well.)

6950 COLUMBIA GATEWAY DRIVE REDEVELOPMENT

Between July 2018 and May 2019, COPT Defense redeveloped 6950 Columbia Gateway Drive – a 106,000 SF office building originally constructed in 1998.

COPT DEFENSE'S EXPERIENCE DRIVEN WORKPLACE

Dynamic office space model focused around core experiences that optimize how people work, and help companies attract and retain talent.

TYPICAL AMENITIES

- Bike share
- Coffee bar
- Collaboration areas
- Shared conference room
- Lobby/lounge
- Dog-friendly

CIRQL™

Transforming yesterday's flex space into tomorrow's collaborative office space. The number of young, hi-tech, and cybersecurity oriented firms around Ft. Meade has grown rapidly since 2010 when U.S. Cyber Command (USCYBERCOM) was established. To capture these tenants' demand for modern space that's proximate to Ft. Meade but at a lower price point, COPT Defense's reimagined 1980s and 1990s vintage buildings into modern, efficient, experiential office space. Specifically, COPT Defense's CIRQL™ redevelopment design fulfills the increasing demand for office space that offers the privacy of dedicated office suites and the option for collaborative space, with access to high-end on-location amenities, and flexible lease durations.

The CIRQL™ redesign creates a central community hub that includes a conference room and kitchen with high-end, modern sustainable materials and finishes. The office suites, range from 1,800 to 4,000 square feet in size, are spoked-off these centralized amenities, and are mostly open concepts with minimal interior construction, which saves resources and costs on the initial build-out. The central community hub provides for social interaction with a shared lounge, kitchenette, open meeting and conference facilities, phone room and huddle spaces. Centralizing these amenity-based spaces also conserves resources versus having multiple conference room and kitchenette build-outs. By providing an open communal space, the central hub also promotes collaboration and socializing. Lastly, interior touches such as the use of reclaimed wood tables and barn doors add warmth to the space, and graffiti wall art provided by a local Baltimore artist creates an urban-like texture against the flood of healthy, natural light.

CIRQL Locations: To date, COPT Defense has redeveloped two locations with its CIRQL™ design—7134 and 7142 Columbia Gateway Drive.

7134 Columbia Gateway Drive

7142 Columbia Gateway Drive

WAYLINE: 6721 COLUMBIA GATEWAY DRIVE

WAYLINE is an all-inclusive amenity space available to tenants of 6711, 6721 and 6731 Columbia Gateway Drive. Inspired by biophilic design with a focus on wellness, WAYLINE is a fresh start for office space featuring modern bohemian design details and a lush lineup of amenities—from sweetgreen Outpost and on-tap cold brew coffee, to a sun-drenched patio and yoga lawn.

UNIQUELY DESIGNED TO PROVIDE A VIBRANT WORKPLACE EXPERIENCE

FIT

Performance fitness center, outdoor basketball half court and yoga lawn

FUEL

Recharge with on-tap cold brew coffee, food trucks and sweetgreen outpost

WORK

Scalable private meeting rooms with everything your team needs to collaborate

CONNECT

A space to focus, or to meet for coffee—you can find it here

TECHNOLOGY ADVANCEMENT CENTER (TAC)

- > In 2018, TAC (formerly MISI) selected a COPT Defense property in Columbia Gateway for its headquarters, and in 2019 they doubled their space and now currently occupy 72,000 SF.
- > They are executing an NSA contract to identify, qualify, accelerate, and implement cyber innovations into National Security. TheLink (formerly DreamPort) plays a key role in our cyber innovation ecosystem, and serves as a mini demand driver within Columbia Gateway as contractors want to be visible and proximate to the facility in order to compete for contracts.
- > TAC chose Columbia Gateway because of its rich concentration of cyber innovators and its proximity to Ft. Meade.
