BDC Background

Created by Congress in 1980 through the Small Business Investment Incentive Act of 1980 to facilitate the flow of capital to small and mid-sized U.S. businesses

Highly regulated by the SEC under the Investment Company Act of 1940 (1940 Act)

Provide a way for individual investors to participate in debt and equity investments in private companies

Leverage

- Regulatory restrictions on debt leverage levels require BDCs to maintain conservative leverage
- Must maintain an asset to debt coverage ratio of at least 2.0x, unless the BDC has satisfied all applicable requirements, including, but not limited to, obtaining board or shareholder approval to decrease the required asset to debt coverage ratio to 1.5x as provided for under the Small Business Credit Availability Act passed in December 2017⁽¹⁾

Full Transparency

- Detailed schedule of all investments (and related key terms) in quarterly and annual reporting
- Quarterly fair value mark to market accounting

Income Tax Treatment

- As a Regulated Investment Company (RIC), BDCs generally do not pay corporate income taxes
- To maintain RIC status and avoid paying corporate income taxes, BDCs must distribute at least 90% of taxable income (other than net capital gain) to investors
- To avoid a 4% federal excise tax on undistributed income, BDCs must distribute in each calendar year the sum of (1) 98% of their net ordinary income for the calendar year and (2) 98.2% of their realized capital gains (both long-term and short-term)
- Tax treatment is similar to Real Estate Investment Trusts (REITs)

(1) In January 2025, the Board of Directors unanimously approved a decrease in MSIF's required asset to debt coverage ratio to 1.5x from 2.0x, effective January 29, 2026

Conservative Leverage – Regulatory

Passage of the Small Business Credit Availability Act in December 2017 provides the opportunity for BDCs to obtain board or shareholder approval to access additional leverage by lowering the required asset coverage to 1.50x (from 2.00x); this additional leverage is not an effective option for non-listed BDCs due to the redemption rights which the BDC would be required to provide to its shareholders⁽¹⁾

MSIF operates at levels comfortably above the current (2.00x) regulatory leverage requirement and very conservatively above the lower (1.50x) regulatory leverage limit accessible by other listed BDCs⁽²⁾ and effective for MSIF on January 29, 2026

MSIF's Historical Asset Coverage Ratio:	2020	2021	2022	2023	2024	Q1 2025

Stable, Long-Term Leverage

MSIF maintains a conservative capital structure, with limited overall leverage and an intentional mix of secured, floating-rate revolving debt and unsecured, fixed rate long-term debt

Capital structure is designed to correlate to and complement the expected duration and fixed/ floating rate nature of investment portfolio assets

Facility	Interest Rate	Maturity	Principal Drawn as of 3/31/2025	Borrowing Availability ⁽⁵⁾
SPV Facility ⁽¹⁾⁽³⁾	SOFR+2.20% floating (6.50% ⁽⁴⁾)	February 2030 (fully revolving until February 2029)	\$260.7 million	\$39.3 million
Corporate Facility ⁽²⁾⁽³⁾	SOFR+2.05% floating (6.37% ⁽⁴⁾)	May 2029 (fully revolving until November 2028)	\$160.0 million	\$85.0 million
Series A Notes	4.04% fixed	October 30, 2026	\$150.0 million	N/A

(1) As of March 31, 2025, MSIF maintained a secured special purpose vehicle financing facility (the SPV Facility), which had \$300.0 million in total commitments with an option to increase total commitments and borrowing availability up to \$450.0 million

(2) As of March 31, 2025, MSIF maintained a senior secured corporate revolving line of credit (the Corporate Facility), which had \$245.0 million in total commitments with an accordion feature to increase commitments up to \$300.0 million

(3) Borrowings under the SPV Facility and the Corporate Facility (together, the Credit Facilities) are available to provide additional liquidity for investment and operational activities

(4) SPV Facility and Corporate Facility rates reflect the rate based on SOFR effective for the contractual reset date of April 1, 2025

(5) Borrowing availability could be limited by regulatory requirements, advance rates per the credit agreement or internal leverage targets

Long-term Maturity of Debt Obligations

MSIF maintains a conservative capital structure, with limited overall leverage and an intentional mix of short-term and long-term debt

Capital structure is designed to correlate to and complement the expected duration and fixed/floating rate nature of investment portfolio assets

(1) The defined terms and additional details for the SPV Facility and Corporate Facility are included on page 13

Interest Rate Impact and Sensitivity

MSIF's financial results are subject to impact from changes in interest rates; MSIF maintains a capital structure with the goal to minimize the impact of changes in interest rates

- 26% of outstanding debt obligations have fixed interest rates⁽⁵⁾
- 74% of outstanding debt obligations have floating interest rates⁽⁵⁾
- 80% of debt investments bear interest at floating rates⁽⁵⁾, the majority of which contain contractual minimum index rates, or "interest rate floors" (weighted-average floor of approximately 130 basis points)⁽⁶⁾
- Results in increases in net investment income (NII) if market interest rates increase, and reductions to NII if market interest rates decrease, subject to the impact to MSIF's incentive fee expense

The following table illustrates the approximate annual changes in the components of MSIF's NII due to hypothetical increases (decreases) in interest rates⁽¹⁾⁽²⁾ (dollars in thousands, except per share data):

Basis Point Increase (Decrease) in Interest Rate	Increase (Decrease) in Interest Income	(Increase) Decrease in Interest Expense ⁽³⁾	Increase (Decrease) in Pre-Incentive Fee NII	(Increase) Decrease in Incentive Fee Expense ⁽¹⁾	Increase (Decrease) in NII	Increase (Decrease) in NII per Share ⁽⁴⁾
(100)	\$ (7,768)	\$ 4,207	\$ (3,561)	\$ 623	\$ (2,938)	\$ (0.06)
(75)	(5,689)	3,155	(2,534)	443	(2,091)	(0.04)
(50)	(3,777)	2,103	(1,674)	293	(1,381)	(0.03)
(25)	(1,888)	1,052	(836)	146	(690)	(0.01)
25	1,888	(1,052)	836	(146)	690	0.01
50	3,777	(2,103)	1,674	(293)	1,381	0.03
75	5,666	(3,155)	2,511	(439)	2,072	0.04
100	7,558	(4,207)	3,351	(586)	2,765	0.06

- (1) Assumes no changes in the portfolio investments, outstanding borrowings on the Credit Facilities (as defined on page 13) or other debt obligations existing as of March 31, 2025; the pro-forma changes in incentive fee expense are calculated based upon the incentive fee expense for Q1 2025 on an annualized basis, as adjusted for the pro forma change in pre-incentive fee NII resulting from the assumed interest income and interest expense changes noted in the table; assumes no other changes in investment income or expenses
- (2) Assumes that all SOFR and Prime rates would change effective immediately on the first day of the period; however, the actual contractual index rate reset dates will vary in future periods generally on either a monthly or quarterly basis across both the debt investments and the Credit Facilities resulting in a delay in the realization of the increases or decreases in interest income or expense
- (3) The hypothetical results would also be impacted by the changes in the amount of outstanding debt under the Credit Facilities (with an increase (decrease) in the debt outstanding under the Credit Facilities resulting in an (increase) decrease in the hypothetical interest expense)
- (4) Per share amount is calculated using shares outstanding as of March 31, 2025
- (5) As of March 31, 2025, based on par
- (6) Weighted-average interest rate floor calculated based on debt principal balances as of March 31, 2025

Although MSIF believes that this analysis is indicative of the impact of interest rate changes to NII as of March 31, 2025, the analysis does not take into consideration future changes in the credit market, credit quality or other business or economic developments that could affect NII. Accordingly, MSIF can offer no assurances that actual results would not differ materially from the analysis above. See further discussion and analysis in Item 3 of MSIF's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2025.

Private Loan Investment Strategy

Private Loan portfolio investments are primarily debt investments in privately held companies which have primarily been originated directly by Main Street or, to a lesser extent, through Main Street's strategic relationships with other credit funds on a collaborative basis (often referred to in the debt markets as "club deals" because of the small lender group size)

MSIF's Private Loan investments are typically made to a company owned or being acquired by a private equity fund

MSIF's investments in new portfolio companies are solely focused on its Private Loan investment strategy

Investment objectives

- Access proprietary investments with attractive risk-adjusted return characteristics
- Generate cash yield to support MSIF's quarterly dividend

Investment characteristics

- Targets companies with annual revenue between \$25 million and \$500 million and annual EBITDA between \$7.5 million and \$50 million
- Proprietary investments primarily originated directly by Main Street or, to a lesser extent, through strategic relationships with other investment funds on a collaborative basis
- Current Private Loan portfolio companies have weighted-average EBITDA of approximately \$32.3 million⁽¹⁾

Investments in secured debt investments

- First lien, senior secured debt investments
- Floating rate debt investments

9% – 14% targeted gross yields

- Weighted-average effective yield of 11.6%⁽²⁾
- Net returns positively impacted by modest use of leverage
- Floating rate debt investments provide matching with MSIF's floating rate Credit Facilities⁽³⁾

(1) This calculation excludes four Private Loan portfolio companies as EBITDA is not a meaningful metric for these portfolio companies

(2) Weighted-average effective yield is calculated using the applicable interest rate as of March 31, 2025 and is weighted based upon the principal amount of each debt investment as of March 31, 2025; includes amortization of deferred debt origination fees and accretion of original issue discount, but excludes fees payable upon repayment of the debt instruments and any debt investments on non-accrual status

(3) The defined term and additional details for the Credit Facilities are included on page 13

LMM Investment Portfolio

LMM investment portfolio differentiates MSIF from its competitors and provides attractive risk-adjusted returns

MSIF's capital structure allows MSIF to maintain a long-term to permanent expected holding period for its LMM investments, providing significant benefits to both MSIF and its LMM portfolio companies

Investment objectives

- High cash yield from secured debt investments (12.6%⁽¹⁾ weighted-average cash coupon as of March 31, 2025); plus
- Dividend income, fair value appreciation and periodic capital gains from equity investments

Investments are structured for (i) protection of capital, (ii) high recurring income and (iii) meaningful capital gain opportunity

- Typical entry enterprise values between 4.5X – 6.5X EBITDA
- Typical entry leverage multiples between 2.0X – 4.0X EBITDA to MSIF debt investment

Focus on self-sponsored, “one-stop” financing opportunities

- Co-investments with Main Street in partnership with business owners, management teams and entrepreneurs
- Provide highly customized financing solutions
- Recapitalization, buyout, growth and acquisition capital

Investments in established, profitable companies

Investments have low correlation to the broader debt and equity markets and attractive risk-adjusted returns

Unique LMM investment structures, combined with MSIF's goal to be a long-term partner, results in a highly diversified and high-quality investment portfolio

(1) Weighted-average cash coupon is calculated using the applicable cash interest rate as of March 31, 2025 and is weighted based upon the principal amount of each debt investment as of March 31, 2025; excludes amortization of deferred debt origination fees and accretion of original issue discount, any fees payable upon repayment of the debt investment and any debt investments on non-accrual status

Total Investment Portfolio

Diversity provides structural protection to investment portfolio, revenue sources, income, cash flows and shareholder dividends

Includes complementary Private Loan debt investments and LMM debt and equity investments

Total investment portfolio at fair value consists of approximately 61% Private Loan / 35% LMM⁽¹⁾ / 2% Middle Market⁽²⁾ / 2% Other Portfolio⁽²⁾ investments

Highly diversified investment portfolio

- 149 Private Loan, LMM⁽¹⁾ and Middle Market⁽²⁾ portfolio companies
- Average investment size of \$8.0 million⁽³⁾⁽⁴⁾
- Largest individual portfolio company represents 2.8%⁽⁵⁾ of total investment income and 3.7% of total portfolio fair value (with most individual portfolio companies representing less than 1.0% of income and fair value)
- Investments on non-accrual status represent 2.8% of the total investment portfolio at fair value and 6.1% at cost
- Weighted-average effective yield of 11.9%⁽⁶⁾

Non-GAAP Information

Net Debt to NAV Ratio is calculated as the Debt to NAV Ratio as determined in accordance with U.S. GAAP, except that total debt is reduced by cash and cash equivalents. MSIF believes presenting the Net Debt to NAV Ratio is useful and appropriate supplemental disclosure for analyzing its financial position and leverage. However, the Net Debt to NAV Ratio is a non-U.S. GAAP measure and should not be considered as a replacement for the Debt to NAV Ratio and other financial measures presented in accordance with U.S. GAAP. Instead, the Net Debt to NAV Ratio should be reviewed only in connection with such U.S. GAAP measures in analyzing MSIF's financial position.
