(a) Indicate if blocks of business in run-off that comprise less than 5% of premiums and less than 5% of reserve and loans liability are aggregated with material blocks of business and which columns are affected. None

(b) Attach statement as to valuation standard used in calculating this reserve, specifying reserve bases, interest rates and methods.

Individual Long Term Care active life reserves are one-year full preliminary term reserves based on 2014 Milliman Long Term Care Guidelines with modifications for morbidity, company experience with statutory prescribed caps for lapse, 1983 GAM for older products and 1994 GAM for the new generation products for mortality, and interest rates ranging from 3.0% to 4.5% depending on the effective date of coverage of each participant. Group Long Term Care active life reserves are one-year full preliminary term reserves based on 2014 Milliman Long Term Care Guidelines with modifications for morbidity, company experience with statutory prescribed caps for lapse, 1983 GAM mortality for older products and 1994 GAM for the new generation products and interest rates ranging from 3.0% to 5.5% depending on the effective date of coverage of each participant. Individual and Group Long Term Care claim reserves represent the present value of benefits payable to insureds in benefit status using claim termination rates based on the 2017 Milliman Long Term Care Guidelines with modifications and interest rates ranging from 3.0% to 4.5% depending on the disablement date claim for each claimant. The Group Long Term Disability reserve basis is the 2012 GLTD Valuation Table blended with Prudential experience, 2%, 2 ¼%, 2 ¾%, 3%, 3 ¼%, 3 ½%, 4%, 4 ¼%, 4 ½%, 5%, 5 ¼%, 5 ½%, 5 ¾%, 6%, 6 ¼%, 6 ¾%. Metlife Long Term Care Active Life Reserves is using 1983 GAM mortality table and interest rates ranging from 3.5% to 5.5%. For Disable Life Reserve they are using Metlife Termination Experience and interest rate ranging of 3.5%. 1964 Commissioners Disability and 1958 CSO, 3 ½%, 4%, 4 ½%, 5 ½%, 6%. 1959 ADB Table (increased by 15% for dismemberment benefit(s) and 1958 CSO 3 ½%, 4%, 4 ½%, 5 ½%, 6%. 1985 CIDA table and 1980 CSO 3 ½%, 4%, 4 ½%, 5 ½%, 6%. 1964 CDT and 1980 CSO 3 ½%, 4%, 4 ½%, 5 ½%, 6%. 1985 CIDA and 1958 CSO 5.5%. 1994 GAM with projection 2.75%. Individual Medical Active Life Reserve was calculated using Gross Premium Valuation method and uses a discount rate of 2.95%. The statutory reserve for individual and group accident and health contracts generally consists of a contract reserve and a claim reserve. These reserves are subject to prospective gross premium valuation. For the single inforce Retiree Medical Buy-In contract, the contract reserve is calculated on the two-year full preliminary term method, which simplifies to the present value of benefits for this contract, which is a single premium contract. For contract reserves, the mortality basis used in the valuation is the Group Annuity Reserve with projection, and the valuation interest rate is 3.50%. For claim reserves, the impact of morbidity on the net contractual cash flows is limited, and 100% utilization of benefits per contract year is assumed. This results in a statutory reserve that is higher than the minimum reserve determined according to the applicable standards.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1A. Accounting Practices

The Prudential Insurance Company of America (the "Company" or "PICA"), domiciled in the state of New Jersey, prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the New Jersey Department of Banking and Insurance (the "Department" or "NJDOBI"). Prescribed statutory accounting practices ("SAP") include publications of the National Association of Insurance Commissioners ("NAIC"), state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed, by the Department.

The Company records leasehold improvements as admitted assets. New Jersey law allows insurance companies domiciled in New Jersey to admit leasehold improvements as admitted assets. Under SSAP No. 19, "Furniture, Fixtures, Equipment and Leasehold Improvements," NAIC statutory accounting practices require non-admittance of leasehold improvements.

Pursuant to New Jersey law, the Commissioner of NJDOBI may require or permit a different basis of valuation of separate account assets. The Company values separate account assets for certain non-participating group annuity products, related to our pension risk transfer business, as if the assets were held in the general account. Under SSAP No. 56 "Separate Accounts", separate account assets supporting fund accumulation contracts ("GICs"), which do not participate in underlying portfolio experience, with a fixed interest rate guarantee, purchased under a retirement plan or plan of deferred compensation, established or maintained by an employer, will be recorded as if the assets were held in the general account while assets supporting all other contractual benefits shall be recorded at fair value on the date of valuation. The participants in our non-participating group annuity products do not participate in the investment income of the underlying assets, and therefore, the valuation prescribed by NJDOBI follows the similar general account treatment. With certain separate account assets being valued as if they were held in the general account, the Company's separate account reserves and related asset adequacy analysis reserves are also adjusted accordingly. As of December 31, 2021, Risk Based Capital ("RBC"), calculated using this prescribed practice resulted in RBC consistent with the amount calculated using NAIC guidance. RBC is an annual only calculation.

In 2004, one of the Company's insurance subsidiaries, Prudential Retirement and Annuity Company ("PRIAC"), received approval from its domiciliary insurance department, the Connecticut Insurance Department, to record a deferred gain associated with an assumption reinsurance agreements between Connecticut General Life Insurance Company and PRIAC in the Interest Maintenance Reserve ("IMR") and to amortize the deferred gain in a manner consistent with those relevant annual statement instructions. Had the deferred gains been established as a liability limited to an amortization period of 10 years in accordance with the guidance of SSAP No. 61R, "Life, Deposit-Type and Accident and Health Reinsurance" ("SSAP No. 61R"), and not included in the IMR, it would have created a material distortion in the analysis of the adequacy of statutory reserves conducted annually by PRIAC's Appointed Actuary. Effective December 31, 2021 the permitted practice was discontinued.

1B. Use of Estimates

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

The most significant estimates include those used in determining measurement of any related impairment; valuation of investments including derivatives (in the absence of quoted market values) and the recognition of other-than-temporary impairments; aggregate reserves for life, accident, and health contracts including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and goodwill; and reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

Since the first quarter of 2020, the outbreak of the novel coronavirus ("COVID-19") has resulted in extreme stress and disruption in the global economy and financial markets. While markets have rebounded, the pandemic has adversely impacted, and may continue to adversely impact, the Company's results of operations, financial condition and cash flows. Due to the highly uncertain nature of these conditions, it is not possible to estimate the ultimate impacts at this time. The risks may have manifested, and may continue to manifest, in the Company's financial statements in the areas of, among others, i) insurance liabilities and related balances: potential changes to assumptions regarding investment returns, mortality, morbidity and policyholder behavior which are reflected in our insurance liabilities and certain related balances; and ii) investments: increased risk of loss on our investments due to default or deterioration in credit quality or value. The Company cannot predict what impact the COVID-19 pandemic will ultimately have on its businesses.

NOTES TO FINANCIAL STATEMENTS

1C. Accounting Policy

The Company uses the following accounting policies:

(1) Cash includes cash on deposit and cash equivalents. Cash equivalents are short-term, highly liquid investments, with original maturities of three months or less, that are both readily convertible to known amounts of cash and so near their maturity that they represent insignificant risk of changes in value because of changes in interest rates. Cash equivalents also includes money market funds. They are stated at amortized cost which approximates fair value.

Short-term investments primarily consist of money market funds and highly liquid debt instruments with a remaining maturity of twelve months or less and greater than three months when purchased. They are stated at amortized cost, which approximates fair value.

(2) Bonds, which consist of long-term bonds, are stated primarily at amortized cost in accordance with the valuation prescribed by the Department and the NAIC. Bonds rated by the NAIC are classified into six categories ranging from highest quality bonds to those in or near default. Bonds rated in the top five categories are generally valued at amortized cost while bonds rated in the lowest category are valued at lower of amortized cost or fair market value.

The Company follows both the prospective and retrospective methods for amortizing bond premium and discount. See below for additional disclosure regarding the prospective versus retrospective methods. Both methods require the recalculation of the effective yield at each reporting date if there has been a change in the underlying assumptions. For the prospective method, the recalculated yield will equate the carrying amount of the investment to the present value of the anticipated future cash flows. The recalculated yield is then used to accrue income on the investment balance for subsequent accounting periods. There are no accounting changes in the current period unless the undiscounted anticipated cash flow is less than the carrying amount of the investment. For the retrospective method, the recalculated yield is the rate that equates the present value of actual and anticipated future cash flows with the original cost of the investment. The current balance of the investment is increased or decreased to the amount that would have resulted had the revised yield been applied since inception and investment income is correspondingly decreased or increased.

For other than temporary impairments, the cost basis of the bond, excluding loan-backed and structured securities, is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss. For loan-backed and structured securities, the cost basis of the bond is written down to the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate.

The Company does not hold any bonds that utilize the systemic value measurement method approach for SVO-Identified investments.

(3) Common stocks include unaffiliated common stocks and investments in subsidiaries. See (7) below for information related to investments in subsidiaries. Unaffiliated common stocks are carried at fair value. Dividends are recognized in net investment income when earned.

(4) Preferred stocks include unaffiliated preferred stocks and investments in subsidiaries. Preferred stocks rated by the NAIC are classified into six categories ranging from highest quality preferred stocks to those in or near default. Redeemable preferred stocks rated in the top three categories are generally valued at cost while preferred stocks rated in the lower three categories are generally valued at lower of cost or fair value. All perpetual and mandatorily convertible preferred stocks are recorded at fair value regardless of the rating category. For other-than-temporary impairments, the cost basis of the preferred stock is written down to fair market value as a new cost basis and the amount of the write down is recorded as a realized loss.

(5) Mortgage loans on real estate are stated primarily at unpaid principal balances, net of unamortized premiums and discounts and impairments. Impaired loans are identified by management as loans when it is considered probable that all amounts due according to the contractual terms of the loan agreement will not be collected. These loans are recorded based on the fair value of the collateral less estimated costs to obtain and sell. The difference between the net value of the collateral and the recorded investment in the mortgage loan is recognized as an impairment by creating a valuation allowance with a corresponding charge to unrealized loss or by adjusting an existing valuation allowance for the impaired loan with a corresponding charge or credit to unrealized gain or loss. Other than temporary impairments are then recognized as a realized loss in net income.

Interest received on impaired loans, including loans that were previously modified in a troubled debt restructuring, is generally either applied against the principal or reported as revenue, according to management’s judgment as to the collectability of principal. Management discontinues accruing interest on impaired loans after the loans are 90 days delinquent as to principal or interest, or earlier when management has substantial doubts about collectability. When this interest is deemed uncollectible, it is reversed against interest income on loans for the current period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where interest has been interrupted for a substantial period, a regular payment performance has been established.

(6) Loan-backed and structured securities are primarily carried at amortized cost. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. For high credit quality loan-backed and structured securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost for those securities rated AA or above are recorded in accordance with the retrospective method. For loan-backed and structured securities rated below AA, the effective yield is adjusted prospectively for any changes in estimated cash flows.

The NAIC designations for non-agency residential mortgage-backed securities (“RMBS”), including asset-backed securities collateralized by sub-prime mortgages, are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated and utilized for reporting as of December 31, 2021 and December 31, 2020.

Similar to the change for RMBS, the NAIC designations for commercial mortgage-backed securities ("CMBS") are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying

NOTES TO FINANCIAL STATEMENTS

value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated and utilized for reporting as of December 31, 2021 and December 31, 2020.

(7) Investments in subsidiaries are accounted for using the equity method as defined in SSAP No. 97, “Investments in Subsidiary, Controlled and Affiliated Entities (“SCA”) a Replacement of SSAP No. 88,” (“SSAP No. 97”). Investments in domestic insurance subsidiaries are recorded based on the underlying audited statutory equity of the respective entity's financial statements, adjusted for unamortized goodwill as provided for in SSAP No. 68, “Business Combinations and Goodwill,” (“SSAP No. 68”). Investments in foreign insurance subsidiaries are recorded based on audited U.S. GAAP equity adjusted, if needed, to a limited statutory basis of accounting in accordance with paragraph 9 of SSAP No. 97. Investments in non-insurance subsidiaries that do not engage in certain transactions or activities, per paragraph 8b ii of SSAP No. 97 are recorded based on audited U.S. GAAP equity of the investee. The subsidiaries' change in net assets, excluding capital contributions and distributions, is included in “Change in net unrealized capital gains (losses)”. Dividends or distributions received from the investee are recognized in net investment income when declared to the extent they are not in excess of undistributed accumulated earnings attributed to our investment.

The Company has assessed the non-insurance entities subject to SSAP No. 97, and, based upon the amount of capital that these entities represent and the Company’s strong capital position, the Company has decided not to obtain GAAP audits for 32 entities as of December 31, 2021. The Company has therefore valued these entities for purposes of its financial statements at zero. At the end of future fiscal years, the Company may decide to obtain U.S. GAAP audits for entities subject to SSAP No. 97 and thereby restore their equity value for purposes of inclusion in capital and surplus

(8) Other invested assets include primarily the Company's investment in joint ventures, limited liability companies and other forms of partnerships. These investments are accounted for using an equity method as defined in SSAP No. 97 or SSAP No. 48, "Joint Ventures, Partnerships, and Limited Liability Companies" ("SSAP No. 48"), depending upon whether the investee is a Subsidiary, Controlled, or Affiliated Entity, as defined in SSAP No. 97. These entities are valued based on the underlying audited U.S. GAAP equity of the investee, or alternatives permitted by SSAP No. 97 and SSAP No. 48, as applicable.

(9) Derivatives used by the Company include swaps, futures, forwards, and options and may be exchange-traded or contracted in the over-the-counter market. Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, surplus and other funds within "Derivatives" at their estimated fair value. To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship. Any derivative premiums that are not paid at inception of the derivative are recorded separately for the estimated fair value of the derivative as a portion of the Payable for Securities or Receivable for Securities line items on the balance sheet.

(10) The Company considers anticipated investment income when calculating its premium deficiency reserves in accordance with SSAP No. 54, “Individual and Group Accident and Health Contracts” (“SSAP No. 54”).

(11) Accident and health reserves represent the estimated value of the future payments, adjusted for contingencies and interest. The remaining reserves for active life reserves and unearned premiums are valued using the preliminary term method, gross premium valuation method, or a pro rata portion of gross premiums. Reserves are also held for amounts not yet due on hospital benefits and other coverages.

(12) The Company has not modified its capitalization policy from the prior period.

(13) The Company does not have any pharmaceutical rebates receivable.

(14) Repurchase agreements and reverse repurchase agreements are agreements between a seller and a buyer, whereby the seller of securities sells and simultaneously agrees to repurchase the same or substantially the same securities from the buyer at an agreed upon price and, usually, at a stated date. Repurchase agreements (securities sold under agreements to repurchase) are generally accounted as secured borrowings. The assets transferred are not removed from the balance sheet, the cash collateral received is invested and reported on balance sheet and accounted for based on the type of investment. The Company obtains collateral in an amount at least equal to 95% of the fair value of the securities sold. An offsetting liability is reported in “Aggregate write-ins for liabilities”. For reverse repurchase agreements (securities purchased under agreements to resell), an asset is recorded in “Cash, cash equivalents, and short-term investments” to reflect the receivable from the counterparty. Dollar repurchase agreements and reverse dollar repurchase agreements involve debt instruments that are pay-through securities collateralized with GNMA, FNMA and FHLMC and similar securities. The Company typically uses "to be announced" ("TBAs") securities in the dollar repurchase and reverse dollar repurchase agreements which are accounted for as derivatives. Dollar repurchase and reverse dollar repurchase agreements are reported in "Derivatives" with the change in value reported as "Change in net unrealized capital gains (losses)". "Net Realized Capital Gains (Losses)" are recorded upon termination of the agreements. Income and expenses related to these transactions used to earn spread income are reported as "Net investment income."

(15) Securities lending transactions are transactions where the Company loans securities to a third party, primarily large brokerage firms. These transactions are accounted for as secured borrowings. Cash collateral received is invested and reported on the balance sheet and accounted for based on the type of investment. The Company obtains collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. A liability to return capital received is reported in “Payable for securities lending.” Income and expenses associated with securities lending transactions used to earn spread income are reported in "Net investment income."

(16) Contract loans are stated at unpaid principal balances.

(17) Net realized capital gains (losses) are computed using the specific identification method. Net realized investment gains and losses are generated from numerous sources, including the sale of bonds, stocks, other type of investments, as well as adjustments to the cost basis of investments for other-than-temporary impairments. Realized investment gains and losses are also generated from the termination of derivatives that do not qualify for hedge accounting. Amortized cost of investments is adjusted for impairments considered other than temporary. All bonds, preferred stocks and common stocks with unrealized losses are subject to review to identify other-than-temporary impairments in value. Several factors must be considered to determine whether a decline in value of a security is other than temporary, including:

a) the reasons for the decline in value (credit event, currency or interest related, including general spread widening);

NOTES TO FINANCIAL STATEMENTS

b) a company's ability and intent to hold its investment for a period of time to allow for recovery of value;
c) a company's intent to sell its investment before recovery of the cost of the investment;
d) the financial condition of and near-term prospects of the issuer; and
e) for stocks, the extent and duration of the decline.

For bonds, excluding loan-backed and structured securities, when it is determined that there is an other-than-temporary impairment, the Company records a write down to the estimated fair value of the bond, which reduces its amortized cost. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains (Losses)" and applied to the AVR, and interest related impairments are directly applied to the IMR, on an after-tax basis. The AVR is used to stabilize surplus from fluctuations in the market value of bonds, stocks, mortgage loans, real estate, limited partnerships and other investments. Changes in the AVR are accounted for as direct increases or decreases in surplus. The IMR captures interest related realized gains and losses on sales (net of taxes) of bonds, preferred stocks, mortgage loans, interest related other-than-temporary impairments (net of taxes) and realized gains or losses (net of taxes) on terminated interest rate related derivatives, which are amortized into net income over the expected years to maturity of the investments sold or the item being hedged by the derivative using the grouped method.

The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. Estimated fair values for bonds, other than private placement bonds, are generally based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for private placement bonds are typically determined primarily by using a discounted cash flow model, which relies upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality of the issuer and the reduced liquidity associated with private placements. In determining the estimated fair value of certain securities, including those that are distressed, the discounted cash flow model may also use unobservable inputs, which reflect management's own assumptions about the inputs market participants would use in pricing the asset.

For loan-backed and structured securities, when an other-than-temporary impairment has occurred because the entity does not expect to recover the entire amortized cost basis of the security, the amount of the other-than-temporary impairment recognized as a realized loss shall equal the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains (Losses)" and applied to the AVR, and interest related impairments are directly applied to the IMR, on an after-tax basis. Additionally, the amortized cost of the security, less the other-than-temporary impairment recognized as a realized loss, shall become the new amortized cost basis of the investment. When the entity has the intent to sell or cannot assert ability and intent to hold to recovery, the security is impaired to its fair value basis.

For stocks, when it is determined that there is an other-than-temporary impairment, the Company records a write down in the Statement of Operations and Changes in Capital and Surplus within "Net Realized Capital Gains (Losses)" to the estimated fair value, which reduces the cost basis. Impairment losses on stocks are applied to AVR as they are not interest rate related. The new cost basis of an impaired security is not adjusted for subsequent increases in the estimated fair value. Estimated fair values for publicly traded common stock are based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for privately traded common stock are determined using valuation and discounted cash flow models that require a substantial level of judgment.

(18) Separate account assets and liabilities are generally reported at estimated fair value and represent segregated funds, which are invested for certain policyholders, pension funds and other customers under SSAP No. 56, "Separate Accounts" ("SSAP No. 56"). However, there are some separate account assets and liabilities that support products with guarantees and are carried at the same basis as the general account. The assets consist primarily of common stocks, long-term bonds, real estate, mortgages and short-term investments. The assets of each account are legally segregated and are not subject to claims that arise out of any other business of the Company. The liabilities include reserves established to meet withdrawal and future benefit payment contractual provisions. Investment risks associated with fair value changes are generally borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Mortality, policy administration and surrender charges on the accounts are included in "Miscellaneous income."

(19) Life premiums are recognized as revenue when due from policyholders under the terms of the insurance contract in accordance with SSAP No. 51R, "Life Contracts" ("SSAP No. 51R"). Annuity considerations are recognized as revenue when received. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Premiums due and deferred include amounts uncollected, due and unpaid, and deferred.

(20) Policy reserves are generally based on mortality or morbidity tables and valuation interest rates, which are consistent with statutory requirements and are designed to be sufficient to provide for contractually guaranteed benefits. The Company generally holds reserves greater than those developed using minimum statutory reserving rules. In addition, the Appointed Actuary performs asset adequacy analysis annually to determine whether the policy reserves established are adequate in light of the assets supporting them.

(21) The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is based on statutory results and past experience of the Company, including investment income, net realized investment gains or losses over a number of years, mortality experience and other factors. Dividends declared by the Board of Directors, which have not been paid, are included in "Policy dividends" in the Statutory Statements of Admitted Assets, Liabilities, and Capital and Surplus.

(22) Reinsurance contracts that combine premiums and expenses are accounted for on a gross basis in accordance with SSAP No. 61R, "Life, Deposit-Type and Accident and Health Reinsurance"("SSAP No. 61R") and NAIC statutory instructions.

1D. Going Concern

The Company has not had any condition or event that would cause doubt about its ability to continue as a going concern.

NOTES TO FINANCIAL STATEMENTS

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

The State of New Jersey requires that insurance companies domiciled in the State of New Jersey prepare their statutory basis financial statements in accordance with the NAIC Accounting Practices and Procedures manual (the "Manual"), subject to any deviations prescribed or permitted by the Department.

Accounting changes adopted to conform to the provisions of the Manual are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

During the fourth quarter of 2021, the Company determined that benefits on certain retirement contracts assumed from the Company's affiliate, The Prudential Life Insurance Company, LTD, were understated in prior periods by $88 million. A correction for this error was recorded directly through surplus on line 53 of the Summary of Operations in the current period, with a related adjustment of $22 million in deferred taxes reported through line 40, Change in Net Deferred Income Tax.

During the third quarter of 2021, the Company determined that MODCO reserve adjustments on reinsurance ceded related to Closed Block Contracts were overstated in the prior year by $11 million. A correction related to the prior year was recorded through line 53 in the Summary of Operations during the third quarter of 2021.

During the second quarter of 2021, it was determined that reserves related to Group Annuity Contracts were understated in the prior year by $28 million. A correction related to the prior year was recorded through line 53 in the Summary of Operations during the second quarter of 2021.

During the second quarter of 2021, the Company determined that reserves for assumed Universal Life product were overstated, current federal income tax receivable was overstated, and net admitted deferred tax asset was understated in the prior year by $158 million, $14 million, and $23 million, respectively. A correction related to the prior year was recorded through lines 53 (net of tax $8 million), 40, and 41, in the Summary of Operations in 2021.

In the first quarter of 2021, the Company determined that common stocks, net admitted deferred tax asset and federal and foreign income taxes incurred were understated by $158 million, $23 million and $7 million, respectively, in the prior year. A correction related to the prior year was recorded through lines 38, 41 and 53, respectively, in the Summary of Operations in the first quarter of 2021.

During the second quarter of 2020, it was determined that reserves related to Group Annuity Contracts were understated in the prior year by $77 million. A correction related to the prior year was recorded through line 53 in the Summary of Operations during the second quarter of 2020.

In January 2021, the NAIC extended the expiration dates of INT 20-03 and INT 20-07. INT 20-03 provided relief for mortgage loan restructurings that meet certain criteria and are due to COVID-19 to not be assessed as a troubled debt restructuring (“TDR”). INT 20-07 provided relief for debt security restructurings that meet certain criteria and are due to COVID-19 to not be classified as minor modifications. This Company elected to apply this relief pursuant to these INTs in 2021.

In July 2020, the NAIC revised SSAP No. 86, “Derivatives” (“SSAP No. 86”) to clarify that the reporting of derivatives with financing premiums should exclude financing components. The revisions require the present value of the derivative premium receivable (and/or payable) to be separately reported, and it proposes these additional data elements be factored into the counterparty risk assessment for RBC calculations. The Company has adopted the revised guidance.

In May 2020, the NAIC modified SSAP No. 41, “Surplus Notes” (“SSAP No. 41”). The modifications require enhanced disclosures on surplus note arrangements including the original issue amount, fair value received, lifetime and current interest approved, and principal recognized, extent of linkages and netting with other instruments or parties, any related parties, and the use of proceeds to purchase assets. The Company has adopted the enhanced surplus notes disclosures that are effective for annual periods ending December 31, 2020.

In 2020, the NAIC revised SSAP No. 2R, “Cash, Cash Equivalents, Drafts and Short-Term Investments”, and SSAP No. 103R, “Transfers and Servicing of Financial Assets and Extinguishment of Liabilities” (“SSAPs No. 2R, and No. 103R”). The revisions incorporate concepts that will restrict the classification of rolling related party or affiliated investments as cash equivalents or short-term investments. The investment schedule will identify investments (or substantially similar investments) that remain on the short-term and cash equivalent schedules for more than one consecutive year. The Company has adopted the revised guidance and enhanced the investment disclosures for annual periods ending December 31, 2020.

In April 2020, the NAIC adopted the overall guidance in FASB ASU 2020-04 – Reference Rate Reform (Topic 848) which provides an optional expedient, allowing for the continuation of certain contracts that are modified in response to reference rate reform. Additionally, it provides waivers from derecognizing hedging transactions, and exceptions for assessing hedge effectiveness as a result of transitioning away from certain interbank offering rates. The Company has elected to prospectively apply this guidance.

In May 2020, the NAIC revised SSAP No. 26R by incorporating a new footnote to clarify that if a debt instrument has been modified in accordance with SSAP No. 36, "Troubled Debt Restructuring" ("SSAP No. 36") or SSAP No. 103R, the assessment of other-than-temporary impairment (“OTTI”) shall be based on modified contractual terms of the debt instrument and it did not have a material effect on the financial statements. There is no impact to the Company’s OTTI assessment as such clarification is consistent with the Company’s pre-existing OTTI policy for the debt instruments in the scope of SSAP No. 26R.

In May 2020, the NAIC adopted revisions to SSAPs No. 3, “Accounting Changes and Correction of Errors”, and No. 51R, “Life Contracts” relating to the Valuation Manual (VM-21), Actuarial Guideline 43 (“AG 43”), and risk-based capital instructions to implement a new variable annuity statutory framework. Changes include: (i) aligning economically-focused hedge assets with liability valuations; (ii) reforming standard scenarios for AG 43 and C3 Phase II; (iii) standardizing capital market assumptions and aligning total asset requirements and reserves, and (iv) requiring Companies to classify reserving changes relating to adoption of VM-21 as a change in valuation basis, with additional disclosures regarding the phase-in period beginning Jan. 1, 2020. The cumulative effect of the change in valuation basis is reported directly through surplus. The Company’s adoption of this revised statutory framework on VM-21 and AG 43 did not materially impact the financial statements.

In April 2016, the NAIC adopted a principle-based reserving (PBR) approach for life insurance products. PBR replaces the reserving methods for life insurance products for which the former formulaic basis for reserves may not accurately reflect the risks or costs of the obligations of the insurer. Although PBR became effective on January 1, 2017, there is a three-year phase-in period starting from January 1, 2017 through January 1, 2020 where companies have the option to value some or all appliable life insurance policies using PBR.

NOTES TO FINANCIAL STATEMENTS

Beginning January 1, 2020, however, all companies not otherwise exempted must adopt and apply PBR for all newly issued life insurance policies. The Company has introduced updated versions of its individual life products in conjunction with the requirement to adopt PBR. These updated products are currently priced to support the principle-based statutory reserve level without the need for reserve financing. The Company has adopted PBR.

3. BUSINESS COMBINATIONS AND GOODWILL

3A. Statutory Purchase Method

Goodwill represents the excess of the amounts the Company paid to acquire subsidiaries and other businesses over the fair value of their net assets at the date of acquisition. When indication of impairment exists, management tests goodwill for the impairment based upon estimates of the fair value of the acquired entity to which the goodwill relates and compares the carrying value of the acquired entity, including the recorded goodwill, to its estimated fair value at that date. Goodwill is considered impaired when the fair value of the investment in the acquired entity is less than the carrying value of the investment, including the recorded goodwill and the decline is considered other-than-temporary. Given changes in facts and circumstances, this test could lead to reductions in goodwill that could have an adverse effect of the Company's financial condition. Below is a chart detailing the goodwill held by the Company as of December 31, 2021:

1 Purchased Entity	2 Acquisition Date	3 Cost of Acquired Entity	4 Original amount of Goodwill	5 Original amount of Admitted Goodwill

Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments and bonds, including mortgage- and asset-backed securities. At December 31, 2021, the Company has sufficient assets to cover its secured borrowing liability.

These programs are typically limited to securities in demand that can be loaned at relatively low financing rates. As such, we believe there is unused capacity available through these programs. Holdings of cash and cash equivalent investments in these short-term spread portfolios allow for further flexibility in sizing the portfolio to better match available financing. Current conditions in both the financing and investment markets are continuously monitored in order to appropriately manage the cost of funds, investment spreads, asset/liability duration matching and liquidity.

Other Invested Assets – There was no non-admitted due and accrued income on other invested assets for the year ended December 31, 2021.

8. DERIVATIVE INSTRUMENTS

The Company uses derivatives to manage risks from changes in interest rates or foreign currency values, to alter interest rate or currency exposures arising from mismatches between assets and liabilities (including duration mismatches), to hedge against changes in the value of assets it owns or anticipates acquiring and other anticipated transactions and commitments, and to replicate the investment performance of otherwise permissible investments. Insurance statutes restrict the Company's use of derivatives primarily to hedging, income generation, and replication activities intended to offset changes in the market value and cash flows of assets held, obligations, and anticipated transactions and prohibit the use of derivatives for speculation.

The Company, at inception, may designate derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment; (2) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability; (3) a foreign-currency fair value or cash flow hedge; (4) a hedge of the foreign currency exposure of a net investment in a foreign operation or (5) a derivative that does not qualify for hedge accounting, including replications.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

Upon termination of a derivative that qualified for hedge accounting, the gain or loss is usually reflected as an adjustment to the basis of the hedged item and is recognized in income consistent with the hedged item. There were no instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur. The qualifying cash flow hedges are related to the variability of the payment or receipt of interest or foreign currency amounts on existing financial instruments and certain forecasted transactions. The maximum length of time for which these variable cash flows are hedged is thirty-nine years.

To the extent that the Company chooses not to designate its derivatives for hedge accounting or designated derivatives no longer meet the criteria of an effective hedge, the changes in their fair value are included in "Change in net unrealized capital gains" without considering changes in fair value of the hedged item. Accruals of interest income, expense and related cash flows on swaps are reported in "Net investment income". Upon termination of a derivative that does not qualify for hedge accounting, the gain or loss is included in "Net realized capital gains (losses)". In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the IMR.

Types of Derivative Instruments and Derivative Strategies

Derivative instruments used by the Company include currency swaps, currency forwards, interest rate swaps, interest rate options, total return swaps, treasury futures, equity options (including rights and warrants), equity futures, interest rate forwards and credit default

NOTES TO FINANCIAL STATEMENTS

swaps. For those hedge transactions which qualify for hedge accounting, the change in the carrying value or cash flow of the derivative is recorded in a manner consistent with the changes in the carrying value or cash flow of the hedged asset, liability, firm commitment or forecasted transaction. For hedges of net investments in a foreign operation, changes in fair value of such derivatives, to the extent effective, are recorded in “Change in net unrealized capital gains”. In measuring effectiveness, with respect to certain hedge relationships, the Company's risk management strategy may define specific risk being hedged and it may exclude specific components of derivatives gains or losses unrelated to the defined risk; such excluded components are recognized in "Change in net unrealized capital gains" over the term of the hedge relationship.

Interest Rate Contracts

Interest rate swaps, options, interest rate forwards, and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it owns or anticipates acquiring or selling. Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

In exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and receives/posts variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures with regulated futures commission’s merchants who are members of a trading exchange.

Equity Contracts

Equity index options and futures are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range.

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and LIBOR based on a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices.

Foreign Exchange Contracts

Currency derivatives, including currency forwards and currency swaps, are used to reduce risks from fluctuations in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell.

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the impact of changes in currency exchange rates on U.S. dollar equivalent earnings generated by certain of its non-USD denominated businesses, international operations, and investments. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party.

Other Contracts

The Company, from time to time, uses TBA forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company enhance the return on its investment portfolio, and can provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Additionally, pursuant to the Company’s mortgage dollar roll program, TBAs or mortgage-backed securities are transferred to counterparties with a corresponding agreement to repurchase them at a future date. These transactions do not qualify as secured borrowings and are accounted for as derivatives.

Credit Contracts

Credit default swaps are used by the Company in conjunction with fixed income investments as replication synthetic asset transactions (“RSAT”). RSATs are derivative transactions entered into in conjunction with other investments in order to produce the investment characteristics of otherwise permissible investments. Credit default swaps used in RSATs are carried at amortized cost with premiums received on such transactions recorded to “Net investment income” over the life of the contract and loss payouts, if any, are recorded as “Net realized capital gains/(losses)”. The Company also uses credit default swaps to hedge exposures in its investment portfolios. Such contracts are not designated as replications, and they are used in relationships that do not qualify for hedge accounting.

Counterparty Credit Risk

The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial derivative transactions. Generally, the credit exposure of the Company’s OTC derivative transactions are represented by the contracts with a positive fair value (market value) at the reporting date after taking into consideration the existence of netting agreements. Also, the Company enters into exchange-traded futures and transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

Substantially all of the Company’s OTC derivative contracts are transacted with a subsidiary. In instances where the Company transacts with unaffiliated counterparties, the Company manages credit risk by entering into derivative transactions with highly rated major international financial institutions and other credit worthy counterparties, and by obtaining collateral where appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

* Non-performance risk (“NPR”) is the risk that financial obligations will not be fulfilled by the counterparty. SSAP No. 100, “Fair Value Measurements,” (“SSAP No. 100”), rejects consideration of NPR for fair value calculations of liabilities, including derivative liabilities. However, SSAP No. 100 does not reject consideration of NPR for valuation of a company's asset positions. The change in the valuation of the company’s net asset affiliated derivative position as a result of NPR consideration as of December 31, 2021 and December 31, 2020 was $1 and $0, respectively.

Certain of the Company’s derivative contracts require premiums to be paid at a series of specified future dates over the life of the contract or at maturity. The discounted value of these future settled premiums is included in the measurement of the estimated fair value of each derivative along with all other contractual cash flows.

The table below summarizes the net amount of undiscounted future settled premium payments (receipts), by year, as of December 31, 2021:

9. INCOME TAXES

The application of SSAP No. 101, "Income Taxes for Accounting Guidance" ("SSAP No. 101") requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary, to reduce the deferred tax asset to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carry back years as well as projected taxable earnings, exclusive of reversing temporary differences and carry forwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the deferred tax assets; and, (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization

NOTES TO FINANCIAL STATEMENTS

is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized. The Company has not recorded a valuation allowance as of December 31, 2021 and December 31, 2020.

The U.S. Tax Cuts and Jobs Act of 2017 (the "Tax Act of 2017"), was enacted into law on December 22, 2017 and is generally effective starting in 2018. The Tax Act of 2017 changes the taxation of businesses and individuals by lowering tax rates and broadening the tax base through the acceleration of taxable income and the deferral or elimination of certain deductions, as well as changing the system of taxation of earnings of foreign subsidiaries. The most significant changes for the Company are: (1) the reduction of the corporate tax rate from 35% to 21%; (2) revised methodologies for determining deductions for tax reserves and the dividends received deduction ("DRD"); and (3) an increased capitalization and amortization period for acquisition costs related to certain products.

Non-Taxable Investment Income. The U.S. Dividends Received Deduction ("DRD") reduces the amount of dividend income subject to U.S. tax and accounts for a significant amount of the non-taxable investment income shown in the table

NOTES TO FINANCIAL STATEMENTS

above. More specifically, the U.S. DRD constitutes $21,299,044 of the total $83,841,699 of 2021 non-taxable investment income and $17,891,353 of the total $62,611,958 of 2020 non-taxable investment income. The DRD for the current period was estimated using information from 2020, current year investment results, and current year's equity market performance. The actual current year DRD can vary based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from fund investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

Low-Income Housing and Other Tax Credits. These amounts include incentives within the U.S. tax code for the development of affordable housing aiming at low-income Americans. The Company routinely makes such investments that generate a tax credit which reduces the Company's effective tax rate.

Changes in Tax Law - The CARES Act. On March 27, 2020, the Coronavirus Aid, Relief, and Economic Security Act (the "CARES Act") was enacted into law. One provision of the CARES Act amends the Tax Act of 2017 and allows companies with net operating losses ("NOLs") originating in 2020, 2019 or 2018 to carry back those losses for up to five years. For 2021, the Company has recorded an income tax benefit of $3,805,879 from carrying the estimated 2018 NOL back to tax years that have a 35% tax rate.

E. Additional Tax Disclosures

Total	$0	$341,528,600	$341,528,600

3. The aggregate amount of deposits admitted under IRC § 6603 is $0.

F. The Company's liability for income taxes includes the liability for unrecognized tax benefits and interest that relate to tax years still subject to review by the IRS or other taxing authorities. The completion of review or the expiration of the Federal statute of limitations for a given audit period could result in an adjustment to the liability for income taxes.

The Company's unrecognized tax benefits were $7,518,454 and $16,916,521 as of December 31, 2021 and December 31, 2020, respectively. The Company does not anticipate any significant changes within the next twelve months to its total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

The Company classifies all interest and penalties related to tax uncertainties as income tax expense (benefit). In 2021 and 2020, the Company recognized $572,300 and $700,353, respectively, in the statement of operations and in the statement of financial positions for tax related interest and penalties.

11B. FHLB (Federal Home Loan Bank) Agreements

(1) The Company is a member of the Federal Home Loan Bank of New York (“FHLBNY’). Membership allows the Company access to the FHLBNY’s financial services, including the ability to obtain collateralized loans and to issue collateralized funding agreements. Under applicable law, the funding agreements issued to the FHLBNY have priority claim status above debt holders of the Company. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be maintained at certain specified levels relative to outstanding borrowings. FHLBNY membership requires the Company to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Borrowings by the Company from the FHLBNY are limited to a term of 10 years. The FHLBNY may further restrict the term of borrowings by the Company due to changes in an internal FHLBNY credit rating of the Company that is based on financial strength ratings and RBC ratio. Currently there are no restrictions on the term of borrowings from the FHLBNY.

NJDOBI permits the Company to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. As of December 31, 2021, the 5% limitation equates to a maximum amount of pledged assets of $7,710,369,600 and an estimated maximum borrowing capacity (after taking into account required collateralization levels) of approximately $6,859,328,362 of which $1,047,125,000 was outstanding. Nevertheless, FHLBNY borrowings are subject to the FHLBNY’s discretion and to the availability of qualifying assets at the Company.

As of December 31, 2021, the Company had pledged assets with a fair value of $1,208,812,986 supporting aggregate outstanding collateralized funding agreements. As of December 31, 2021, outstanding funding agreements, totaling $1,047,125,000 are included in “Policyholders’ account balances.” The fair value of qualifying assets that were available to the Company but not pledged amounted to $3,700,346,348 as of December 31, 2021.

NOTES TO FINANCIAL STATEMENTS

12. RETIREMENT PLANS, DEFERRED COMPENSATION, POST EMPLOYMENT BENEFITS AND COMPENSATED ABSENCES AND OTHER POSTRETIREMENT BENEFIT PLANS

A. The Company has funded and non-funded non-contributory defined benefit pension plans ("Pension Benefits"), which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service (the "traditional formula"), while benefits for other employees are based on an account balance that takes into consideration age, length of service and earnings during their career (the "cash balance formula"). At December 31, 2021, approximately 89% of the Company's Pension Benefits relate to its domestic qualified pension plan, which initially determined benefits based on the traditional formula. Effective January 1, 2001, active domestic employees covered under this plan were given the option to convert from the traditional formula to the cash balance formula, and all new domestic employees began accruing benefits under the cash balance formula. As of December 31, 2021, approximately 67% and 33% of the benefit obligation under this plan relates to participants under the traditional formula and cash balance formula, respectively. At December 31, 2021, the vast majority of active employees under this plan are accruing benefits under the cash balance formula.

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents ("Other Postretirement Benefits"). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company's U.S. employees are eligible to receive Other Postretirement Benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service.

On November 30, 2021, the Company announced that it will modify the Retiree Medical Savings Account ("RMSA") program, one of the components of Other Postretirement Benefits. The RMSA program will no longer be offered to new employees effective January 1, 2022, while active employees will no longer receive service credits and retirees will no longer receive interest credits at some point after June 30, 2022. In addition, the Company added a 20-year time limit for retirees to utilize the RMSA (previously there was no time limit).

B. The plan fiduciaries for the Company's pension and postretirement plans have developed guidelines for asset allocations reflecting a percentage of total assets by asset class, which are reviewed on an annual basis. Asset allocation targets as of December 31, 2021 are as follows:

	Pension Investment Policy Guidelines 2021		Postretirement Investment Policy Guidelines 2021	
	Minimum	Maximum	Minimum	Maximum
Asset category				
U.S. Stocks	2%	6%	34%	75%
International Stocks	2%	8%	2%	25%
Bonds	49%	64%	9%	43%
Short Term Investments	0%	13%	0%	27%
Real Estate	2%	17%	0%	0%
Other	5%	33%	0%	0%

The investment goal of the domestic pension plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds and other investments. The cash requirements of the pension obligation, which include a traditional formula principally representing payments to annuitants and a cash balance formula that allows lump sum payments and annuity payments, are designed to be met by the bonds and short-term investments in the portfolio.

The investment goal of the domestic postretirement plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds, and other investments, while meeting the cash requirements for the postretirement obligation that includes a medical benefit including prescription drugs, a dental benefit and a life benefit.

To implement the investment strategy, plan assets are invested in funds that primarily invest in securities that correspond to one of the asset categories under the investment guidelines. However, at any point in time, some of the assets in a fund may be of a different nature than the specified asset category.

Assets held with the Company are in either pooled separate accounts or single client separate accounts. Assets held with a bank are either in common/collective trusts or single client trusts. Pooled separate accounts and common/collective trusts hold assets for multiple investors. Each investor owns a "unit of account." The asset allocation targets above include the underlying asset mix in the Pooled Separate Accounts and Common/Collective Trusts. Single client separate accounts or trusts hold assets for only one investor, the domestic qualified pension plan, and each security in the fund is treated as individually owned.

NOTES TO FINANCIAL STATEMENTS

There were no investments in Prudential Financial Common Stock as of December 31, 2021 and December 31, 2020 for either the pension or postretirement plans.

The authoritative guidance around fair value established a framework for measuring fair value. Fair value is disclosed using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as described in Note 20.

The following describes the valuation methodologies used for pension and postretirement plans assets measured at fair value.

Insurance Company Pooled Separate Accounts and Common/Collective Trusts - Insurance company pooled separate accounts are invested via group annuity contracts issued by the Company. Assets are represented by a "unit of account." The redemption value of those units is based on a per unit value whose value is the result of the accumulated values of underlying investments. The unit of account value is used as a practical expedient to estimate fair value.

Equities—See Note 20 for a discussion of the valuation methodologies for equity securities.

U.S. Government Securities (both Federal and State & Other), Non–U.S. Government Securities, and Corporate Debt— See Note 20 for a discussion of the valuation methodologies for fixed maturity securities.

Interest Rate Swaps - See Note 20 for a discussion of the valuation methodologies for derivative instruments.

Registered Investment Companies (Mutual Funds) - Securities are priced at the net asset values ("NAV"), which is the closing price published by the registered investment company on the reporting date.

Short-term Investments - Securities are valued initially at cost and thereafter adjusted for amortization of any discount or premium (i.e., amortized cost). Amortized cost approximates fair value.

Partnerships - The value of interests owned in partnerships is based on valuations of the underlying investments that include private placements, structured debt, real estate, equities, fixed maturities, commodities and other investments.

Hedge Funds - The value of interests in hedge funds is based on the underlying investments that include equities, debt and other investments.

Variable Life Insurance Policies - These assets are held in group and individual variable life insurance policies issued by the Company. Group policies are invested in Insurance Company Pooled Separate Accounts. Individual policies are invested in Registered Investment Companies (Mutual Funds). The value of interest in these policies is the cash surrender value of the policies based on the underlying investments. The variable life insurance policies are valued at contract value which approximates fair value.

D. The domestic discount rate used to value the pension and postretirement obligations at December 31, 2021 and December 31, 2020 is based upon the value of a portfolio of Aa investments whose cash flows would be available to pay the benefit obligation's cash flows when due. The December 31, 2021 portfolio is selected from a compilation of approximately 420 Aa-rated bonds across the full range of maturities. Since yields can vary widely at each maturity point, the Company generally avoids using the highest and lowest yielding bonds at the maturity points, so as to avoid relying on bonds that might be mispriced or misrated. This refinement process generally results in having a distribution from the 10th to 90th percentile. The Aa portfolio is then selected and, accordingly, its value is a measure of the benefit obligation. A single equivalent discount rate is calculated to equate the value of the Aa portfolio to the cash flows for the benefit obligation. The result is rounded to the nearest 5 basis points and the benefit obligation is recalculated using the rounded discount rate.

The pension and postretirement expected long-term rates of return on plan assets for 2021 were determined based upon an approach that considered the allocation of plan assets as of December 31, 2020. Expected returns are estimated by asset class as noted in the discussion of investment policies and strategies below. Expected returns on asset classes are developed using a building-block approach that is forward looking and are not strictly based upon historical returns. The building blocks for equity returns include inflation, real return, a term premium, an equity risk premium, capital appreciation, expenses, the effect of active management and the effect of rebalancing. The building blocks for fixed maturity returns include inflation, real return, a term premium, credit spread, capital appreciation, effect of active management, expenses and the effect of rebalancing
.
The Company applied the same approach to the determination of the expected rate of return on plan assets in 2022. The expected rate of return for 2022 is 6.00% and 7.00% for pension and postretirement, respectively.

E. The Company sponsors voluntary savings plans for employees (401(k) plans). The plans provide for salary reduction contributions by employees and matching contributions by the Company of up to 4% of annual salary for 2021 and 2020. The matching contributions by the Company included in “Other expenses” are $79,607,458 and $82,319,680 for 2021 and 2020 respectively.

F. Not applicable. The Company does not participate in multiemployer pension or postretirement benefit plans.

The surplus notes in the aggregate principal amount of $350,000,000, issued on July 1, 1995 were distributed pursuant to Rule 144A under the Securities Act of 1933, underwritten by Goldman, Sachs & Co., CS First Boston, Merrill Lynch & Co., J.P. Morgan Securities Inc., and Prudential Securities Incorporated, an affiliate, pursuant to SSAP No. 25, Accounting for and Disclosures about Transactions with Affiliates and Other Related Parties ("SSAP 25"), and are administered by the Company as a registrar/paying agent. Under the agreement with external counterparties, the Company received cash proceeds from qualified institutional investors in exchange for the surplus note. The fair value of the Assets received is the greater of a liquidity event price, optional prepayment price, or sale price. Given that there is a disposition option under which the credits linked notes provide liquidity for their full pay price, the carrying value is deemed to approximate the fair value.

The surplus notes are subordinate in right of payment to policy claims, prior claims, and senior indebtedness. The surplus notes have the following restrictions on payment.

Each payment of principal and interest on the surplus notes may be made only with the prior written approval of the Commissioner, for which approval will only be granted if in the judgment of the Commissioner, the then current and projected financial condition of the Company warrants such payment. In addition, pursuant to applicable New Jersey law, any payment of principal or interest on the surplus notes may be only out of surplus, earnings, or profits of the Company.

If these conditions to payment are not met, the applicable scheduled maturity date or scheduled interest payment date will be extended until such time, if any, at which conditions are met. Interest will continue to accrue on any unpaid principal amount of the surplus notes during the period of any such extension. Interest will not accrue on interest.

Effective January 1, 2015, the Company entered into a reinsurance agreement with Prudential Legacy Insurance Company ("PLIC", "Reinsurer"), in which the Company reinsured substantially all of the outstanding liabilities of the Closed Block into a newly established statutory guaranteed separate account. The following information describes the financing arrangement between the Reinsurer and the external counterparties.

The Reinsurer issued a surplus note in the aggregate principal amount of $100,000,000, on November 20, 2019 pursuant to, and is made subject to the terms of, the Amended and Restated Surplus Note Purchase Agreement, dated August 1, 2019, by and between the Reinsurer, the issuer, and Essex LLC, an affiliate. In March 2020, the Reinsurer executed an increase of outstanding notes by $800,000,000 resulting in cumulative outstanding notes of $900,000,000. Under the agreement with external counterparties, the Reinsurer received credit-linked notes issued by Essex LLC in exchange for the surplus note. On December 30th, 2020 the Reinsurer executed a principal redemption in the amount of $500,000,000 and subsequently executed another principal redemption in the amount of $300,000,000 on March 30, 2021. Under the agreement with external counterparties the Company, the issuer, redeemed credit-linked notes issued by Essex LLC, an affiliate. The redemptions left $100,000,000 notes outstanding as of December 31, 2021. The Reinsurer can redeem the principal amount of the outstanding credit-linked notes for cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event. Upon such event, the surplus note issuer would monetize the amount of credit linked notes equal to the amount needed to cure the triggering event which would be provided by external counterparties. At this point, the outstanding principal on the asset would be less than the outstanding principal on the surplus note outstanding. Under the agreements, the external counterparties have agreed to fund any such payments under the credit-linked notes in return for the receipt of fees.

NOTES TO FINANCIAL STATEMENTS

Under these transactions, because valid rights of set-off exist, interest payments on the surplus notes and on the credit-linked notes are settled on a net basis. As of December 31st, 2021, 100% of interest payments are offset solely due to administrative offsetting. Administrative offsetting occurs throughout the duration of the surplus note agreement which eliminates or reduces the exchange of cash or assets that would normally occur. As of December 31st, 2021, $32,907,854 of interest payments have been remitted.

Assets purchased from the proceeds of the surplus notes were credit-linked notes which are reported on Schedule D with an NAIC designation of 1. The book adjusted carrying value of these assets are $100,000,000 as of December 31, 2021. The fair value of the credit-linked notes received is the greater of a liquidity event price, optional prepayment price, or sale price. Given that there is a disposition option under which the credits linked notes provide liquidity for their full par price, the carrying value is deemed to approximate the fair value.

13L/M. The Company has not had any quasi-reorganizations.

In June 2020, the court issued an order: (i) granting plaintiffs' motion for certification of the settlement class; (ii) approving the proposed nationwide class settlement agreement; (iii) approving the class notice; (iv) awarding attorneys' fees and costs to plaintiffs and a reduced incentive award to Behfarin; and (v) dismissing the action with prejudice, but maintaining jurisdiction over the settlement. The complaint asserts claims for violation of California law, breach of contract, unfair competition, and bad faith violation of the implied covenant of good faith and fair dealing, and seeks unspecified damages, declaratory and injunctive relief. In August 2020, defendants filed an answer to the complaint and a motion to stay the action pending the California Supreme Court's decision, in McHugh v. Protective Life Insurance, on the question of whether the California lapse statutes apply to policies that were in force when the statutes went into effect on January 1, 2013, or solely to policies issued after that date. The Moreland court granted defendants' motion to stay in October 2020. Subsequently, in August 2021, the California Supreme Court in McHugh determined that the California lapse statutes apply to policies that were in force as of January 1, 2013. In October 2021, the Moreland court lifted the stay order.

NOTES TO FINANCIAL STATEMENTS

20. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement - Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 - Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short-term investments, common stocks and derivative contracts that trade on an active exchange market.

Level 2 - Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. The Company's Level 2 assets and liabilities include: bonds (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain common stock securities (mutual funds, which do not trade in active markets because they are not publicly available), short-term investments and certain cash equivalents (primarily commercial paper), and certain over-the-counter ("OTC") derivatives.

Level 3 - Fair value is based on at least one significant unobservable input for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value. The Company's Level 3 assets and liabilities primarily include: certain private bonds and common stock securities, certain manually priced public common stock and bonds, certain commercial mortgage loans and certain highly structured OTC derivative contracts.

Bonds carried at the lower of amortized cost or market value - The fair values of the Company's public bonds are generally based on prices obtained from independent pricing services. Prices for each bond are generally sourced from multiple pricing vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. The pricing hierarchy is updated for new financial products and recent pricing experience with various vendors. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2, as they are primarily based on observable pricing for similar assets and/or other market observable inputs. Typical inputs used by these pricing services include but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flow, prepayment speeds and default rates. If the pricing information received from third-party pricing services is deemed not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service or classify the securities as Level 3. If the pricing service updates the price to be more consistent with the presented market observations, the security remains within Level 2.

Internally-developed valuations or indicative broker quotes are also used to determine fair value in circumstances where vendor pricing is not available, or where the Company ultimately concludes that pricing information received from the independent pricing service is not reflective of market activity. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may over-ride the information with an internally-developed valuation. As of December 31, 2021 and December 31, 2020, over-rides on a net basis were not material. Pricing service over-rides, internally-developed valuations and indicative broker quotes are generally included in Level 3 in the fair value hierarchy.

The Company conducts several specific price monitoring activities. Daily analyses identify price changes over pre-determined thresholds defined at the financial instrument level. Various pricing integrity reports are reviewed on a daily and monthly basis to determine if pricing is reflective of market activity or if it would warrant any adjustments. Other procedures performed include, but are not limited to, reviews of third-party pricing services methodologies, reviews of pricing trends and back testing.

The fair values of private bonds, which are primarily originated by internal private asset managers, are primarily determined using discounted cash flow models. These models primarily use observable inputs that include Treasury or similar base rates plus estimated credit spreads to value each security. The credit spreads are obtained through a survey of private market intermediaries who are active in both primary and secondary transactions, and consider, among other factors, the credit quality and the reduced liquidity associated with private placements. Internal adjustments are made to reflect variation in observed sector spreads. Since most private placements are valued using standard market observable inputs and inputs derived from, or corroborated by, market observable data including, but not limited to observed prices and spreads for similar publicly traded issues, they have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are significant to the price of a security, a Level 3 classification is made.

Cash Equivalents and Short-Term Investments - Cash equivalents and short-term investments include money market instruments, commercial paper and other highly liquid debt instruments. Certain money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are classified as Level 1. The remaining instruments in this category are generally fair valued based on market observable inputs and these investments have primarily been classified within Level 2.

Preferred Stocks carried at the lower of amortized cost or market value - Preferred stocks consist principally of publicly traded and privately traded preferred stock. The fair values of most publicly traded preferred stock securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded preferred stock securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded preferred stock the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded preferred stock securities are classified within Level 3. Fair values of perpetual preferred stock based on observable market inputs are classified within Level 2. However, when prices from independent pricing services are based on indicative broker quotes as the directly observable market inputs become unavailable, the fair value of perpetual preferred stock is classified as Level 3.

NOTES TO FINANCIAL STATEMENTS

Common Stocks carried at market value -Common stocks consist principally of investments in common stocks of publicly traded companies, privately traded securities, as well as common stock mutual fund shares. The fair values of most publicly traded common stocks are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using discounted cash flow, earnings multiple and other valuation models that require a substantial level of judgment around inputs and therefore are classified within Level 3. The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares. The fair values of common stocks are based on prices obtained from independent pricing services. These prices are then validated for reasonableness against recently traded market prices. Accordingly, these securities are generally classified within Level 2 in the fair value hierarchy.

Derivative Instruments - Derivatives are recorded at fair value either as assets, within “Derivatives,” or as liabilities, within “Miscellaneous liabilities: Derivatives.” The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, non-performance risk (“NPR”), liquidity and other factors. For derivative positions included within Level 3 of the fair value hierarchy, liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying derivative position.

The Company’s exchange-traded futures may include Treasury futures and equity futures. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company’s derivative positions are traded in the OTC derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input from external market data providers, third-party pricing vendors and/or recent trading activity. The Company’s policy is to use mid-market pricing in determining its best estimate of fair value. The fair values of most OTC derivatives, including interest rate and cross-currency swaps, currency forward contracts, credit default swaps, and “to be announced” (“TBA”) forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models’ key inputs include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, NPR, volatility and other factors.

The Company’s cleared interest rate swaps and credit derivatives linked to an index are valued using models that utilize actively quoted or observable market inputs, including the secured overnight financing rate ("SOFR"), obtained from external market data providers, third-party pricing vendors and/or recent trading activity. These derivatives are classified as Level 2 in the fair value hierarchy.

The majority of the Company’s derivative agreements are with highly rated major international financial institutions. To reflect the market’s perception of its own and the counterparty’s NPR, the Company incorporates additional spreads over London Interbank Offered Rates (“LIBOR”) into the discount rate used in determining the fair value of OTC derivative assets and liabilities after taking into account of collateral.

Derivatives classified as Level 3 include structured products. These derivatives are valued based upon models, such as Monte Carlo simulation models and other techniques that utilize significant unobservable inputs. Level 3 methodologies are validated through periodic comparison of the Company’s fair values to external broker-dealer values.

Separate Account Assets at fair value -Separate account assets primarily include bonds, treasuries, common stock and mutual funds for which values are determined consistent with similar instruments described above under “Bonds carried at the lower of amortized cost or market value” and “Common Stocks carried at market value.”

Effective January 1, 2018, the Company adopted changes to SSAP No. 100, Fair Value (“SSAP 100”), to allow NAV per share as a practical expedient to fair value either when specifically named in an SSAP or when specific conditions exist. This adoption removes the requirement to categorize within the fair value hierarchy all investments measured at net asset value per share (or its equivalent) as a practical expedient. As a result of the adoption of this guidance, certain separate account assets are no longer classified in the fair value hierarchy.

However, SSAP No. 100 does not reject consideration of NPR for valuation of a company's asset positions. As of December 31, 2021, consideration of NPR for the Company's affiliated derivative net asset position resulted in a $1 increase in value.

Bonds: Fixed Maturities (excluding NAIC 6 rated Bonds) - The fair values of public fixed maturity securities are generally based on prices from third-party pricing services, which are reviewed for reasonableness; however, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities, the fair value is based on indicative broker quotes, if available, or determined using a discounted cash flow model or internally-developed models. For private fixed maturities, fair value is determined using a discounted cash flow model. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Mortgage Loans - The fair value of commercial mortgage loans is based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, plus an appropriate credit spread for loans of similar quality, average life and currency. The quality ratings for these loans, a primary determinant of the appropriate credit spread and a significant component of the pricing process, are based on internally-developed methodology. Certain commercial mortgage loans are valued incorporating other factors, including the terms of the loans, the relative strength of the underlying collateral, the principal exit strategies for the loans, prevailing interest rates and credit risk.

Contract Loans - The Company's valuation technique for contract loans is to discount cash flows at the current contract loan coupon rate. Contract loans are fully collateralized by the cash surrender value of underlying insurance policies. As a result, the carrying value of the contract loans approximates the fair value.

Cash, Cash Equivalents and Short-Term Investments - The Company believes that due to the short-term nature of certain assets, the carrying value approximates fair value. These assets include cash, cash equivalent instruments and certain short-term investments, which are recorded at amortized cost and are not securities.

Other Invested Assets - The estimated fair value of other invested assets is determined using the methodologies as described above for bonds, mortgage loans or short-term investments, including affiliated assets based on the nature of the investment. Excluded from the disclosure are those other invested assets that are not considered to be financial instruments subject to this disclosure including investments carried on the equity method.

Deposit-Type Contracts & Separate Account Liabilities - Only the portion of deposit-type contracts and separate account liabilities related to products that are investment contracts (those without mortality and morbidity risk) are reflected in the table above. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are generally derived using discounted projected cash flows based on interest rates that are representative of the Company's financial strength ratings, and hence reflect the Company's own NPR. For guaranteed

investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are generally derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products, the fair value is the market value of the assets supporting the liabilities.

Notes Payable and Other Borrowing - The fair value of debt is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Securities Sold Under Agreements to Repurchase - The Company receives collateral for selling securities under agreements to repurchase. Repurchase agreements are also generally short-term in nature, and therefore, the carrying amounts of these instruments approximate fair value.

Cash Collateral for Loaned Securities - Cash collateral for loaned securities represents the collateral received or paid in connection with loaning or borrowing securities, similar to the securities sold under agreement to repurchase above. Due to the short-term nature of these transactions, the carrying value approximates fair value.

Separate Account Liabilities-Investment Contracts - Only the portion of separate account liabilities related to products that are investments contracts are reflected in the table above. Separate account liabilities are recorded at the amount credited to the contractholder, which reflects the change in fair value of the corresponding separate account assets including contractholder deposits less withdrawals and fees; therefore, carrying value approximates fair value.

D. The Company did not have any assets or liabilities that were not practicable to value at fair value as of December 31, 2021.

E. Certain Separate Account investments are measured at fair value using the NAV per share (or its equivalent) practical expedient and have not been classified in the fair value hierarchy. Separate account assets using NAV as a practical expedient consist of joint venture and limited partnership interests in real estate, bond, hedge, insurance and other funds. All of these investments have individually varying investment strategies which also have a variety of redemption terms and conditions including certain fund interests that are restricted until maturity. The Company believes that using NAV as a practical expedient for these investments is a fair and close approximation of the investment's liquidation value.

21. OTHER ITEMS

21A. Extraordinary Items

The Company did not have extraordinary items during 2021 or 2020.

21B. Troubled Debt Restructuring Debtors

The Company did not have any troubled debt restructuring during 2021.

21C. Other Disclosures and Unusual Items

On July 21, 2021, PFI entered into an agreement with Great-West Life & Annuity Insurance Company ("Great-West") pursuant to which PFI has agreed to sell to Great-West its Full Service Retirement business written by the Company and its Connecticut subsidiary, PRIAC, primarily through a combination of (i) the sale of all outstanding equity interests of certain legal entities, including PRIAC; (ii) the ceding of certain insurance policies through reinsurance; and (iii) the sale, transfer and/or novation of certain in-scope contracts and brokerage accounts. The transaction is expected to close by the first half of 2022, subject to the receipt of regulatory approvals and the satisfaction of customary closing conditions.

The agreement pertains exclusively to the Full-Service business written by the Company and PRIAC and therefore excludes any contractual rights and obligations, assets, liabilities and surplus associated with any non-Full-Service business written by the Company and PRIAC (the "Excluded Business"). This population of Excluded Business primarily consists of the Company's and PRIAC's Institutional Investment Products which includes Longevity Risk Transfer ("LRT" business) products, Guaranteed Cost and Pripar contracts ("PRT" business) and certain separate accounts.

In order to exclude these assets from the sale of PRIAC, PRIAC intends to novate to the Company, through assumption reinsurance, the rights and obligations, assets, liabilities and surplus associated with any Excluded Business prior to the close of the sale which is expected to occur in early 2022. The LRT Excluded Business was novated effective December 31, 2021. The impact of the novation on the Company was an increase in assets of $258.6M, an increase in liabilities of $257.3M and an increase in surplus of $1.3M. The PRT and separate account components of the Excluded Business novated subsequent to December 31, 2021 (effective on February 1, 2022).The estimated impact the PRT and separate account novation will have on the Company upon novation is an increase in assets of $6,848.3M, an increase in liabilities of $6,758.6M and an increase in surplus of $89.7M.

On January 1, 2015, the Company entered into a reinsurance agreement with its subsidiary PLIC, in which the Company reinsured substantially all of the outstanding liabilities of its regulatory closed block (the "Closed Block"), primarily on a coinsurance basis. The only exceptions to the 100% coinsurance arrangement are as follows (1) the policyholder dividend liability which will be reinsured from the Company to PLIC on a 100% modified coinsurance basis (2) 10% of the Closed Block's New York policies, which will be retained by the Company on both the coinsurance and modified coinsurance agreements; and (3) certain Closed Block policies that were previously reinsured externally. In connection with this reinsurance transaction, the Company ceded approximately $58 billion of assets into a newly established statutory guaranteed separate account of PLIC. Concurrently, the Company ceded approximately $5 billion of assets to PLIC to support the securities lending program. The Closed Block is a regulatory mechanism that consists of Prudential Insurance's liabilities for certain participating individual life insurance policies and annuities issued in the United States that were, together with certain assets, allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with

NOTES TO FINANCIAL STATEMENTS

revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses, and taxes and to provide for continuation of the Closed Block policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues.

Also effective January 1, 2015, the Company recaptured existing agreements whereby the Company reinsured 90% of the Closed Block's long-term risk under modified coinsurance agreements and reinsured 90% of the Closed Block's short-term risk with its captive reinsurance subsidiary, NJCAP on a coinsurance basis. Concurrently, NJCAP cancelled its $2 billion letter of credit facility it had entered into in connection with the reinsurance arrangement.

As a result of an agreement with the New York State Department of Financial Services ("NY DFS") regarding the Company's reserving methodologies for certain variable annuity and life insurance products, the Company holds additional statutory reserves on a New York basis, which reduces its New York statutory surplus. The Company is not domiciled in New York, and these changes do not impact statutory reserves reported in the Company's state of domicile, or any states other than New York, and therefore do not impact its RBC ratio; however, the agreed reserve methodologies may require the Company to increase additional New York statutory reserves in the future. New York's version of PBR, which became effective in January 2020, allows for modifications to the NAIC valuation model and New York's modifications might require the Company to increase its New York Statutory Reserves. If the Company were required to establish material additional reserves on a New York statutory accounting basis or post material amounts of additional collateral with respect to annuity or insurance products, its ability to deploy capital held within the Company for other purposes could be affected.

In October 2017, the NAIC adopted the Insurance Data Security Model Law. The model law requires that insurance companies establish a cybersecurity program and includes specific technical safeguards as well as requirements regarding governance, incident planning, data management, system testing, vendor oversight and regulator notification. New York implemented a similar law in March 2017 and other states have either implemented the Model Law or are anticipated to implement it in the near future.

The Company is monitoring regulatory guidance and rulemaking in these areas, and may be subject to increased compliance costs and regulatory requirements. In order to respond to the threat of security breaches and cyber-attacks, the Company developed a program overseen by the Chief Information Security Officer and the Information Security Office that is designed to protect and preserve the confidentiality, integrity, and continued availability of all information owned by, or in the care of the Company. As part of this program, the Company also maintains an incident response plan. The program provides for the coordination of various corporate functions and governance groups, and serves as a framework for the execution of responsibilities across businesses and operational roles. The program establishes security standards for the Company's technological resources, and includes training for employees, contractors and third parties. As part of the program, the Company conducts periodic exercises and a response readiness assessment with outside advisors to gain a third-party independent assessment of the Company's technical program and its' internal response preparedness. The Company regularly engages with the outside security community and monitors cyber threat information.

(1) While there is no market standard definition, we define sub-prime mortgages as residential mortgages that are originated to weaker quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan to value ratios, or limited documentation.

(2) The Company did not have direct exposure through investments in sub-prime mortgage loans.

(3) The Company's exposure to sub-prime mortgage loans is through other investments. The following table sets forth the composition of our asset-backed securities collateralized by sub-prime mortgages as of December 31, 2021.

(4) The Company did not have underwriting exposure to sub-prime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

21G. Retained Assets

The Company offers retained asset accounts, called Alliance Accounts (the "Account" or "Accounts"), as a settlement option available to beneficiaries when an insured dies. The beneficiary is provided with information at the time of claim about each of the various settlement options available as well as the opportunity to select any of the available settlement options. For group life insurance policies, if the beneficiary does not select a settlement option, they are provided an Account as permitted by applicable state law. In 2021, the Company stopped offering the Account as a settlement option for all individual life insurance and non-custodial annuity contract beneficiaries.

When an Account is opened the beneficiary receives a book of drafts, similar to a checkbook. The beneficiary owns the Account in full while the funds are held in the Company's General Account. The beneficiary can access the death benefit proceeds immediately by writing a draft for any amount desired, up to and including the full death benefit.

The Accounts earn interest immediately when established. The interest is accrued daily, compounded daily and credited every month and is accrued until all funds are withdrawn. The interest rate may change without notice, but will not change more often than once a month. Some Accounts may be subject to certain minimum interest rates. The interest rate credited to Accounts may be more or less than the rate the Company earns on the funds held in its General Account. During 2021, interest rates credited to Accounts ranged from 0.50% to 3.50%. There were no changes to interest rates credited during 2021.

There are no recurring fees for the maintenance or administration of an Account. Fees are only paid for special services such as returned drafts ($10 per draft), stop payment requests ($12 per draft) and draft or statement copy requests ($2 per draft or statement).

Amounts attributable to the Accounts are included in "Liability for deposit–type contracts" on the Statement of Liabilities, Surplus and Other Funds and in "Supplemental Contracts" on Exhibit 7 - "Deposit-type Contracts".

Actuarial Guideline XVLIII- NAIC Valuation of Life Insurance Policies Model Regulation (#830) ("AG 48") prescribes an actuarial method to determine the portion of the assets held by captive reinsurance companies to support reserves for certain term and universal life policies that must be a "primary security". AG 48 provides that reserves in excess of those calculated with the prescribed actuarial method may be supported or financed with a broader range of assets, referred to as "other security". The requirements in AG 48 became effective on January 1, 2015, and apply to term and universal life insurance policies written from and after January 1, 2015, or written prior to January 1, 2015, but not included in a captive reserve financing arrangement as of December 31, 2014. While the Company does not have ceded business subject to AG 48 requirements, certain of the Company's insurance subsidiaries cede a portion of statutory reserves for term and universal life policies to captive reinsurance companies and are subject to AG 48. As of December 31, 2021, primary securities held in trusts for the benefit of these subsidiaries, combined with primary securities held into trusts subsequent to December 31, 2021, but before March 1, 2022, as permitted by AG 48, were sufficient to meet the required level of primary securities for AG 48 covered business. The Company does not promise surrender values in excess of the legally computed reserves.

(2) Reserves on policies issued at or subsequently subject to a premium for extra mortality or otherwise issued on lives classed as substandard for the plan of contract issued or on special class lives, including paid-up insurance, are reported in Section A of Exhibit 5 according to mortality and interest bases applicable to the respective years of issue. In addition, an extra mortality reserve is held for ordinary life insurance policies classed as group conversions, or otherwise substandard, equal to the excess, if any, over a basic reserve, of a substandard reserve based on mortality rates appropriately increased over the standard class mortality rates. For all other such policies, the extra mortality reserve is one-half the appropriate net additional premium. The Tabular Less Actual Reserve Released (Page 7, Line 5) has been determined by formula as described in the instructions for Page 7.

The Tabular Cost (Page 7, Line 9) has been determined by formula as described in the instructions for Page 7 except for certain variable and universal life insurance policies for which tabular cost has been determined from the basic data for the calculation of policy reserves.

(5) For the determination of Tabular Interest on funds not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as one hundredth of the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.

(6) The Company had no change in life or annuity reserves due to a change in valuation basis as of December 31, 2021.

Separate Accounts assets and liabilities represent segregated funds, which are administered for pension and policyholders. Investment risks associated with market value changes are generally borne by the policyholders, except to the extent of minimum guarantees made by the Company with respect to certain accounts.
