Amtech Systems to Announce First Quarter Fiscal 2011 Financial Results on February 8, 2011

TEMPE, Ariz.--(BUSINESS WIRE)-- Amtech Systems, Inc. (NASDAQ: ASYS), a global supplier of production and automation systems and related supplies for the manufacture of solar cells, semiconductors, and silicon wafers, today reported that it will announce its first quarter fiscal 2011 financial results after the close of regular market trading on Tuesday, February 8, 2011. The Company will report results in a news release issued immediately following the close of the market on February 8, 2011, followed by a conference call to discuss the results starting at 2:00 p.m. Pacific Time (5:00 p.m. ET).

What: Amtech first quarter fiscal 2011 financial results conference call

When: Tuesday, February 8th at 2:00 p.m. Pacific Time (5:00 p.m. ET)

Webcast: A live and archived web cast of the conference call can be accessed from the investors section of Amtech's website at www.amtechsystems.com.

Dial in: To access the live conference call, dial (877) 941-6009 and request the "Amtech" call. From international locations, dial (480) 629-9770.

Replay: An audio replay of the conference call can be accessed at (800) 406-7325. From international locations, dial (303) 590-3030. The replay will be available starting approximately two hours after the call and remain in effect for one week. The required pass code is 4407587#.

About Amtech Systems, Inc.

Amtech Systems, Inc. manufactures capital equipment, including silicon wafer handling automation, thermal processing equipment and related consumables used in fabricating solar cells and semiconductor devices. Semiconductors, or semiconductor chips, are fabricated on silicon wafer substrates, sliced from ingots, and are part of the circuitry, or electronic components, of many products including solar cells, computers, telecommunications devices, automotive products, consumer goods, and industrial automation and control systems. The Company's wafer handling, thermal processing and consumable products currently address the diffusion, oxidation, deposition, PECVD, and PSG removal steps used in the fabrication of solar cells, semiconductors, MEMS and the polishing of newly sliced silicon wafers.
