Cemtrex to Present SmartDesk at Microsoft Ignite 2018

Farmingdale, NY, Sept. 25, 2018 (GLOBE NEWSWIRE) -- — [Cemtrex Inc.](#) (Nasdaq: [CETX](#), [CETXP](#), [CETXW](#)), a leading global technology and manufacturing company, today announced the showcase of its flagship smart device, the [SmartDesk](#), at this year's [Microsoft Ignite](#) conference. The event will be held Monday, September 24 through Friday, September 28, 2018 at the Orange County Convention Center in Orlando, Florida. Cemtrex will be on-site at booth #748 to assist in demonstrations of its highly anticipated SmartDesk, as well as its virtual reality (VR) and augmented reality (AR) software application, [WorkbenchXR](#).

Cemtrex's SmartDesk is poised to be most advanced workstation on the market. A blend of futuristic hardware and groundbreaking productivity software, the SmartDesk delivers an efficient user experience in a luxurious package. With a 72-inch, high resolution multi-touch display (with integrated proprietary touch and touchless gestures as well as the ability to draw and scan documents directly on the desk), wireless connectivity for full access to the cloud, and next-generation wireless charging capabilities for mobile devices, the SmartDesk is the next step in the evolution of the modern workplace.

"Every year, thousands of IT, enterprise, and data influencers and enthusiasts converge at Ignite to discover the latest in technology. What better audience is there to introduce the SmartDesk to?" said Saagar Govil, CEO and Chairman of Cemtrex. "SmartDesk and WorkbenchXR are just two ways Cemtrex is changing the workplace experience, and we are excited to see how we can help others drive innovation forward."

[WorkbenchXR](#) is the first AR software application of its kind to help assembly workers in manufacturing environments utilize VR and AR headsets as well as connected "smart tools" to assemble products faster, reduce errors, and improve the quality assurance process. The application helps workers assemble products using custom designed workflows created by the team in an easy and agile manner, and can be utilized for all manufacturing industries where various parts are being assembled.
