

Midwest Energy Emissions Corp to Present at the Energy, Utility & Environmental Conference 2012 (Euec 2012)

WORTINGTON, OH -- (MARKET WIRE) -- 01/11/12 -- Midwest Energy Emissions Corp (OTCBB: MEEC), a leader in mercury emission capture technology for power plants and other coal burning units, announced today that Marc Sylvester, Vice President of Sales and Rick MacPherson, Executive Consultant will present at the Energy, Utility & Environmental Conference 2012 in Phoenix, Arizona on Monday, January 30 at 3:30 p.m. Mountain Time.

The presentation title is Commercial Program Review of Mercury Control Technology Utilizing Sorbent Enhancement Additives. This presentation demonstrates Midwest Energy Emissions Corp's technology to be a cost-effective mercury emission control technology, now in commercial operation on large coal fired power units

About Midwest Energy Emissions Corp.

We develop and deliver patented, cost effective mercury capture systems and technologies to power plants and other coal-burning units in the United States and Canada. Rather than simply selling different types of activated carbon, we take a holistic view of the mercury emissions problem. We provide proprietary technology that allows customers to meet emissions regulations in the most effective and economical manner, with the least disruption to their ongoing operations. With a strong focus on continuous innovation and industry foresight, we deliver customer value and strengthen the communities in which we do business.
