Midwest Energy Emissions develops and delivers patented, cost-effective mercury capture systems and technologies to power plants and other coal-burning units in the United States and Canada. As a result of the company's innovative, patented mercury removal technologies, customers can meet the new, highly restrictive government standards while improving their competitive position in an effective and economical manner.

Alan Kelley, CEO of Midwest Energy Emissions, stated, "Years of research and testing with North Dakota's Energy & Environment Research Center (EERC), the premier center of mercury control research, has enabled our company to deliver one of the most effective low-cost and high-capture solutions possible. [MEEC](#) appreciates the opportunity to reach more investors through the sponsorship of the QualityStocks Newsletter, Video and Blogs. QualityStocks is providing a much needed service in the micro-cap and small-cap markets."
