Midwest Energy Emissions Corp. to Present at the LD Micro Invitational Wednesday, June 8, 2016

LEWIS CENTER, OH -- (Marketwired) -- 05/31/16 -- Midwest Energy Emissions Corp. (OTCQB: MEEC) ("ME2C" or the "Company"), an emerging leader in mercury emissions control technology for the global coal-power industry, has been invited to present at the Sixth Annual LD Micro Invitational in Los Angeles, California, on Wednesday, June 8, 2016, at 9:00 a.m. Pacific time.

Richard MacPherson, CEO of ME2C, will be giving the presentation and holding one-on-one meetings with investors throughout the day.

The presentation will also be webcast and available for 90 days following the live presentation. The webcast can be viewed at <http://wsw.com/webcast/ldmicro10/meec> and on the investor relations section of the ME2C website.

The conference will be held at the Luxe Sunset Bel Air Hotel and will feature 195 companies in the small/micro-cap space.

About Midwest Energy Emissions Corp. (ME2C)

[Midwest Energy Emissions Corp.](http://www.midwestemissions.com) (OTCQB: MEEC) delivers patented and proprietary solutions to the global coal-power industry to remove mercury from power plant emissions, providing performance guarantees, and leading-edge emissions services. The U.S. Environmental Protection Agency (EPA) MATS rule requires that all coal- and oil-fired power plants in the U.S., larger than 25 mega-watts, must remove roughly 90% of mercury from their emissions starting April 15, 2015. In June 2015, the U.S. Supreme Court remanded MATS back to the U.S. Court of Appeals for the D.C. Circuit for further review, but left the rule in place. The D.C. Circuit has since remanded the rule to the EPA for further consideration, but without vacatur, allowing MATS to remain in effect until the EPA issues a final finding. On April 14, 2016, the EPA issued a final supplemental finding upholding the rule and concluding that a cost analysis supports the MATS rule. ME2C expects legal challenges to the rule will continue. ME2C has developed patented technology and proprietary products that have been shown to achieve mercury removal levels compliant with MATS at a significantly lower cost and with less operational impact than currently used methods, while preserving the marketability of fly-ash for beneficial use. About LD Micro

LD Micro was founded in 2006 with the sole purpose of being an independent resource in the microcap space. What started out as a newsletter highlighting unique companies has transformed into an event platform hosting several influential conferences annually

(Invitational, Summit, and Main Event).

In 2015, LDM launched the first pure microcap index (the LDmi) to exclusively provide intraday information on the entire sector. LD will continue to provide valuable tools for the benefit of everyone in the small and microcap universe. Visit www.ldmicro.com for more information.
