Moore's Law Turns 50 Today

Today marks the [50th anniversary of Moore's Law](#), an unspoken agreement between the electronics industry and the world economy that inspires engineers, inventors and entrepreneurs to think about what is possible. Moore's Law enables much of today's innovation - wearable technology, genomic sequencing, smart cities –and is helping industries tackle seemingly intractable problems and turning fantastic ideas into profitable business ventures. What will the next 50 years hold?

About Intel

Intel (NASDAQ:INTC) is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices. As a leader in corporate responsibility and sustainability, Intel also manufactures the world's first commercially available "conflict-free" microprocessors. Additional information about Intel is available at newsroom.intel.com and blogs.intel.com and about Intel's conflict-free efforts at conflictfree.intel.com.
