Sonnet BioTherapeutics Announces Review of Strategic Alternatives

PRINCETON, NJ / ACCESSWIRE / May 22, 2024 /Sonnet BioTherapeutics Holdings, Inc. (NASDAQ:SONN) (the "Company" or "Sonnet"), a clinical-stage company developing targeted immunotherapeutic drugs, announced today that its Board of Directors has initiated a process to explore and review a range of strategic alternatives focused on maximizing stockholder value.

Sonnet has engaged Chardan Capital Markets, LLC ("Chardan") to act as its financial advisor for this process. With assistance from Chardan and its other advisors, the Company will assess a full range of strategic alternatives, including but not limited to, business development, strategic partnerships, joint ventures, acquisitions, mergers, business combinations, in-licensing, or other strategic transactions.

The Company has not set a timetable for the conclusion of its review and has not made any decisions related to strategic alternatives at this time. The Company does not intend to comment further with respect to this review unless or until its Board of Directors has approved a definitive course of action, the review process has concluded, or it is determined that other disclosure is appropriate.

There can be no assurance that this evaluation will result in any definitive documentation to consummate one or more transactions, or other strategic changes or outcomes, or, that the terms of any such transactions, changes, or outcomes will be favorable. Even if the Company enters into a definitive agreement, the Company may not be successful in completing a transaction, change or outcome, or, if it completes such a transaction, change or outcome, it may not ultimately enhance value or deliver expected benefits.

About Sonnet BioTherapeutics Holdings, Inc.

Sonnet BioTherapeutics is an oncology-focused biotechnology company with a proprietary platform for innovating biologic drugs of single or bifunctional action. Known as FHAB (Fully Human Albumin Binding), the technology utilizes a fully human single chain antibody fragment (scFv) that binds to and "hitch-hikes" on human serum albumin (HSA) for transport to target tissues. Sonnet's FHAB was designed to specifically target tumor and lymphatic tissue, with an improved therapeutic window for optimizing the safety and efficacy of immune modulating biologic drugs. FHAB is the foundation of a modular, plug-and-play construct for potentiating a range of large molecule therapeutic classes, including cytokines, peptides, antibodies, and vaccines.
