BioSig Technologies, Inc. (NASDAQ: BSGM) is a medical technology company commercializing a proprietary biomedical signal processing platform designed to improve the electrophysiology (EP) marketplace. With the global EP market projected to reach $10.1B in 2024 with a 11.3% growth rate, BioSig has commenced a targeted commercial release of its PURE EP™ System, generating its first commercial sale in December 2020. The Company’s first product is a computerized system designed to reveal the full range of cardiac signals and to provide physicians with signal clarity during procedures performed to address cardiac arrhythmias. The PURE EP™ System received FDA 510(k) clearance in August 2018. Physicians using BioSig’s PURE EP™ System have successfully completed over 1,300 patient cases to date. Systems are currently installed at multiple locations, including Texas Cardiac Arrhythmia Institute at St. David’s Medical Center, Mayo Clinic’s Florida, Minnesota and Arizona campuses, Massachusetts General Hospital, the University of Pennsylvania, Deborah Heart and Lung Center, and Houston Methodist.

Data Source: 2019 DRG MedTech 360 Report

Key Growth Drivers

1) Advanced Technology — The non-invasive PURE EP System is a computerized system intended for acquiring, digitizing, amplifying, filtering, measuring and calculating, displaying, recording and storing of electrocardiographic and intracardiac signals for patients undergoing electrophysiology EP procedures in an EP laboratory under the supervision of licensed healthcare practitioners who are responsible for interpreting the data. The PURE EP System aims to minimize noise and artifacts, and acquire high-fidelity cardiac signals. Improving cardiac signals may potentially increase the diagnostic value of these signals, thereby possibly improving accuracy and efficiency of the EP studies and ablation procedures.

2) Market Opportunity — 2019 DRG Medtech 360 Report states the global EP device market is expected to exceed more than US $10.1 billion by 2024 and is growing at a compound annual growth rate (CAGR) of 11.3%. The Company also operates within the rapidly emerging field of bioelectronic medicine, estimated at $25.11 billion in 2020 with projected annual growth of 10.27%.

3) KOL Support — PURE EP has been used and valued by many of the industry’s leading electrophysiology physicians, including Dr. Andrea Natale of Texas Cardiac Arrhythmia Institute, and Dr. G. Joseph Gallinghouse. The Company achieved proof of concept validation through UCLA, and has performed numerous pre-clinical studies at Mayo Clinic, MN under the leadership of Samuel J. Asirvatham, M.D., Mayo Clinic’s Vice-Chair of Innovation and Medical Director, Electrophysiology Laboratory.

Recent Highlights

- Entered into a new installation agreement with St. Elizabeth’s Medical Center
- Unblinding of clinical data from PURE EP™ 2.0 Study showed signal superiority to standard of care
- Successfully completed over 1,300 patient cases with its PURE EP™ System
- Entered into a new installation agreement for evaluation with Medical City North Hills in North Richland Hills, Texas
- Increased expected procedures to more than 1,500 in 2021
- Completed enrollment in the PURE EP™ 2.0 clinical study
- Landed commercial sales to Mayo Clinic locations across multiple states
- Awarded U.S. Patent Claims for the Noise-Filtering Methods for its Signal Processing Technology
- Expanded Collaboration with Mayo Clinic on AI and machine learning technologies
- Deployed Vuzix M400 Smart Glasses for remote servicing capabilities
- Achieved first commercial sale — Texas Cardiac Arrhythmia Institute (HCA)
**Investment Highlights**

- $24.5 Million cash and no debt*
- Achieved first revenues
- Conducted First Clinical Trial with PURE EP™ System
- Significant Insider Ownership
- 10-year Strategic Collaboration with Mayo Clinic
- IP Strategy Led by Sherpa Technology Group and Sterne Kessler Goldstein & Fox—37 allowed/issued design and utility patents
- FDA clearance achieved
- Proven Management Team and Board of Directors
- Global and Growing Addressable Market
- Operates Within Rapidly Emerging Field of Bioelectronic Medicine
- High-Growth Sector Earns Innovation Premium, Aggressive M&A

**Current Cardiac Arrhythmia Epidemic (in 18 or 14.4M Americans)**

Two of the most prevalent, complex and potentially deadly types of arrhythmias today are Atrial Fibrillation (AF) and Ventricular Tachycardia (VT). Ventricular arrhythmias account for approximately 300,000 sudden deaths per year in the United States alone. Catheter ablation is fast becoming a first-line therapy, driving demand for improved technologies. AF is the most common arrhythmia affecting 33.5 million people worldwide, with as many as 6.1 million people in the U.S. now and expected 8-12 million by 2050. AF increases the risk of stroke 4x to 5x and contributes to ~750,000 hospitalizations per year. The direct cost of AF is approximately $6B annually; adding other indirect costs brings AF total cost to $26B.

**Proven Team**

BioSig is operated by a proven management team and a premier Board of Directors with high levels of inside equity ownership.

BioSig brought together leading physicians, executives and engineering experts from leading medical centers of excellence, healthcare programs, Fortune 500 Companies and elite educational institutions for its Advisory Board including Mayo Clinic, Mount Sinai Medical Center, UCLA, Johnson & Johnson, Nasdaq and Prudential Securities.

**Kenneth L. Londoner, Chairman & CEO,** has a wealth of knowledge and experience that spans many decades and includes founding, running, and serving as Director to a number of life science companies. Mr. Londoner began his career with J. & W. Seligman & Co., Inc., a leading institutional money management firm where he rose from research analyst to managing $3.5 billion in mutual funds, pension funds, and international assets.

**Steve Chaussy,** CFO has acted as a consultant for small publicly traded entities with a special emphasis towards SEC reporting and compliance; and served as CFO for a large private distribution and wholesaling company, where he gained international experience.

**Directors**

- **Donald E. Foley, Director** - Former CEO & Chair: Wilmington Trust; Sr VP, Treas & Dir: ITT Corp; Asst Treas: International Paper Co.
- **David Weild IV, MBA, Director** - Current Chairman & CEO; Weild & Co.; Former Vice Chairman: NASA; Former Head of Corporate Finance & Equity Markets: Prudential Securities
- **Patrick J. Gallagher, MBA, Director** - Mg Dir: Laidlaw & Co.; Kinex Pharmaceuticals; Director: Cingulate Therapeutics, BDR Research Group, GC Capital Partners, Kidder Peabody
- **Samuel E. Navarro, Director** - Managing Partner: Gravitas Healthcare, LLC; Former Managing Director and Global Head of Medical Technology Investment Banking; Cowen & Company
- **Anthony Zook, Director** - Former Vice President & Executive Officer at AstraZeneca Plc
