BDC Background

Created by Congress in 1980 through the Small Business Investment Incentive Act of 1980 to facilitate the flow of capital to small and mid-sized U.S. businesses

Highly regulated by the SEC under the Investment Company Act of 1940 (1940 Act)

Provide a way for individual investors to participate in debt and equity investments in private companies

Leverage

- Regulatory restrictions on utilization of debt capital require BDCs to maintain conservative leverage
- Must maintain an asset to debt coverage ratio (the Regulatory Asset Coverage Ratio) of at least 2.0x, unless the BDC has satisfied all applicable requirements, including, but not limited to, obtaining board or shareholder approval to decrease the Required Regulatory Asset Coverage Ratio to 1.5x as provided for under the Small Business Credit Availability Act passed in December 2017
- MSIF received board of directors approval to decrease its Regulatory Asset Coverage Ratio to 1.5x on January 29, 2025; as a result, effective on January 29, 2026, the Regulatory Asset Coverage Ratio of 1.5x became effective for MSIF

Full Transparency

- Detailed schedule of all investments (and related key terms) in quarterly and annual reporting
- Quarterly fair value mark to market accounting

Income Tax Treatment

- As a Regulated Investment Company (RIC), BDCs generally do not pay corporate income taxes
- To maintain RIC status and avoid paying corporate income taxes, BDCs must distribute at least 90% of taxable income (other than net capital gain) to investors
- To avoid a 4% federal excise tax on undistributed income, BDCs must distribute in each calendar year the sum of (1) 98% of their net ordinary income for the calendar year and (2) 98.2% of their realized capital gains (both long-term and short-term)
- Tax treatment is similar to Real Estate Investment Trusts (REITs)

Conservative Leverage – Regulatory

Passage of the Small Business Credit Availability Act in December 2017 provided the opportunity for BDCs to obtain board or shareholder approval to access additional leverage by lowering their Regulatory Asset Coverage Ratio to 1.50x (from 2.00x)

MSIF received board approval, effective as of January 29, 2025, to adopt the 1.50x Regulatory Asset Coverage Ratio; as a result, on January 29, 2026, the Regulatory Asset Coverage Ratio of 1.50x became effective for MSIF

MSIF operates at conservative regulatory leverage levels, in all cases with significant cushion to the current 1.50x minimum Regulatory Asset Coverage Ratio applicable to MSIF

Interest Rate Impact and Sensitivity

MSIF's financial results are subject to impact from changes in interest rates; MSIF maintains a capital structure with the goal to minimize such impact

- 46% of outstanding debt obligations have fixed interest rates⁽⁵⁾
- 54% of outstanding debt obligations have floating interest rates⁽⁵⁾
- 77% of debt investments bear interest at floating rates,⁽⁵⁾ the majority of which contain contractual minimum index rates, or “interest rate floors” (weighted-average floor of approximately 130 basis points)⁽⁶⁾
- Results in increases in net investment income (NII) if market interest rates increase, and reductions to NII if market interest rates decrease, subject to the impact to MSIF's incentive fee on income expense

The following table illustrates the approximate annual changes in the components of MSIF's NII due to hypothetical increases (decreases) in interest rates⁽¹⁾⁽²⁾ (dollars in thousands, except per share data):

Basis Point Increase (Decrease) in Interest Rate	Increase (Decrease) in Interest Income	(Increase) Decrease in Interest Expense ⁽³⁾	Increase (Decrease) in Pre-Incentive Fee NII	(Increase) Decrease in Incentive Fee on Income Expense ⁽¹⁾	Increase (Decrease) in NII	Increase (Decrease) in NII per Share ⁽⁴⁾
(100)	\$ (8,378)	\$ 3,500	\$ (4,878)	\$ 1,574	\$ (3,304)	\$ (0.07)
(75)	(6,283)	2,625	(3,658)	964	(2,694)	(0.06)
(50)	(4,187)	1,750	(2,437)	426	(2,011)	(0.04)
(25)	(2,091)	875	(1,216)	213	(1,003)	(0.02)
25	2,093	(875)	1,218	(213)	1,005	0.02
50	4,145	(1,750)	2,395	(419)	1,976	0.04
75	6,186	(2,625)	3,561	(623)	2,938	0.06
100	8,226	(3,500)	4,726	(827)	3,899	0.09

- (1) Assumes no changes in the portfolio investments or outstanding debt obligations existing as of March 31, 2026; the pro forma changes in the incentive fee on income expense are calculated pursuant to the terms set forth in MSIF's advisory agreement based upon the incentive fee on income expense for the first quarter of 2026, net of the voluntary permanent incentive fee on income waiver for the first quarter of 2026, in each case on an annualized basis, as adjusted for the pro forma change in pre-incentive fee NII resulting from the assumed interest income and interest expense changes reflected in the table, with no other changes in investment income or expense and with the voluntary permanent incentive fee on income waiver assumed to remain at the first quarter of 2026 annualized amount; there is no guarantee that any incentive fee on income waivers will occur in the future, and any such waivers are entirely at the discretion of the Adviser
- (2) Assumes that all SOFR and Prime rates would change effective immediately on the first day of the period; however, the actual contractual index rate reset dates will vary in future periods generally on either a monthly or quarterly basis across both the debt investments and the Credit Facilities (as defined in the Endnotes for page 13) resulting in a delay in the realization of the increases or decreases in interest income or expense
- (3) The hypothetical (increase) decrease in interest expense would be impacted by the changes in the amount of debt outstanding under the Credit Facilities, with interest expense (increasing) decreasing as the debt outstanding under the Credit Facilities increases (decreases)
- (4) Per share amount is calculated using shares outstanding as of March 31, 2026
- (5) As of March 31, 2026, based on par
- (6) Weighted-average interest rate floor calculated based on debt principal balances as of March 31, 2026

Although MSIF believes that this analysis is indicative of the impact of interest rate changes to NII as of March 31, 2026, the analysis does not take into consideration future changes in the credit market, credit quality or other business or economic developments that could affect NII. Accordingly, MSIF can offer no assurances that actual results would not differ materially from the analysis above. See further discussion and analysis in Item 3 of MSIF's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2026.

Private Loan Investment Strategy

Private Loan portfolio investments are primarily debt investments in privately held companies which have primarily been originated directly by Main Street or, to a lesser extent, through Main Street's strategic relationships with other credit funds on a collaborative basis (often referred to in the debt markets as "club deals" because of the small lender group size)

MSIF's Private Loan investments are typically made to a company owned by or being acquired by a private equity fund

MSIF's investments in new portfolio companies are solely focused on its Private Loan investment strategy

Investment objectives

- Access proprietary investments with attractive risk-adjusted return characteristics
- Generate cash yield to support MSIF's dividends to shareholders

Investment characteristics

- Targets companies with annual revenue between \$25 million and \$500 million and annual EBITDA between \$7.5 million and \$50 million
- Proprietary investments primarily originated directly by Main Street or, to a lesser extent, through strategic relationships with other investment funds on a collaborative basis
- Current Private Loan portfolio companies have weighted-average EBITDA of approximately \$30.6 million⁽¹⁾

Investments primarily in secured debt investments

- First lien debt investments
- Floating rate debt investments
- Limited equity investments

8% – 12% targeted gross yields

- Weighted-average effective yield of 10.5%⁽²⁾
- Net returns positively impacted by modest use of leverage
- Floating rate debt investments provide matching with MSIF's floating rate Credit Facilities⁽³⁾

LMM Investment Portfolio

LMM investment portfolio differentiates MSIF from its competitors and provides attractive risk-adjusted returns

MSIF's permanent capital structure as a publicly traded investment firm allows MSIF to maintain a long-term to permanent expected holding period for its LMM investments, providing significant benefits to both MSIF and its LMM portfolio companies

MSIF maintains a legacy portfolio of debt and equity investments in LMM companies

- MSIF no longer makes investments in new LMM portfolio companies, but will continue to participate in follow-on investments in its existing LMM portfolio companies alongside Main Street

Investment objectives

- Attractive cash yield from secured debt investments (12.1%⁽¹⁾ weighted-average cash coupon as of March 31, 2026); plus
- Dividend income, fair value appreciation and periodic capital gains from equity investments

Investments are structured for (i) protection of capital, (ii) high recurring income and (iii) meaningful capital gain opportunity

- Typical entry enterprise values between 4.5x – 7.0x EBITDA
- Typical entry leverage multiples between 2.0x – 4.0x EBITDA to MSIF debt investment

Focus on self-sponsored, “one-stop” financing opportunities

- Co-investments with Main Street in partnership with business owners, management teams and entrepreneurs
- Provide highly customized financing solutions
- Recapitalization, buyout, growth and acquisition capital

Investments in established, profitable companies

Investments have low correlation to the broader debt and equity markets and attractive risk-adjusted returns

Unique LMM investment structures, combined with MSIF's goal to be a long-term partner, results in a highly diversified and high-quality investment portfolio

Total Investment Portfolio

Diversity provides structural protection to investment portfolio, revenue sources, income, cash flows and shareholder dividends

Includes complementary Private Loan debt investments and LMM debt and equity investments

Total investment portfolio at fair value consists of approximately 60% Private Loan / 37% LMM⁽¹⁾ / 2% Middle Market⁽²⁾ / 1% Other Portfolio⁽²⁾ investments

- Weighted-average effective yield of 11.0%⁽⁶⁾

Non-GAAP Information

Adjusted net investment income is net investment income as determined in accordance with U.S. Generally Accepted Accounting Principles, or U.S. GAAP, excluding the impact of the capital gains incentive fee. MSIF believes presenting adjusted net investment income and the related per share amount is useful and appropriate supplemental disclosure for analyzing MSIF's financial performance since the calculation of the capital gains incentive fee is based on realized gains and losses and unrealized fair value appreciation and depreciation, none of which are included in net investment income. However, adjusted net investment income is a non-U.S. GAAP measure and should not be considered as a replacement for net investment income or other earnings measures presented in accordance with U.S. GAAP and should be reviewed only in connection with such U.S. GAAP measures in analyzing MSIF's financial performance.

Adjusted net investment income before taxes is net investment income as determined in accordance with U.S. GAAP, excluding the impact of any tax expenses included in net investment income and the capital gains incentive fee. MSIF believes presenting adjusted net investment income before taxes and the related per share amount is useful and appropriate supplemental disclosure for analyzing MSIF's financial performance since (i) the calculation of the capital gains incentive fee is based on realized gains and losses and unrealized fair value appreciation and depreciation, none of which are included in net investment income, and (ii) tax expenses included in net investment income may include (a) excise tax expense, which is not solely attributable to net investment income, and (b) deferred taxes, which are not payable in the current period. However, adjusted net investment income before taxes is a non-U.S. GAAP measure and should not be considered as a replacement for net investment income, net investment income before taxes or other earnings measures presented in accordance with U.S. GAAP and should be reviewed only in connection with such U.S. GAAP measures in analyzing MSIF's financial performance.

Net Debt to NAV Ratio is calculated as the Debt to NAV Ratio as determined in accordance with U.S. GAAP, except that total debt is reduced by cash and cash equivalents. MSIF believes presenting the Net Debt to NAV Ratio is useful and appropriate supplemental disclosure for analyzing its financial position and leverage. However, the Net Debt to NAV Ratio is a non-U.S. GAAP measure and should not be considered as a replacement for the Debt to NAV Ratio and other financial measures presented in accordance with U.S. GAAP. Instead, the Net Debt to NAV Ratio should be reviewed only in connection with such U.S. GAAP measures in analyzing MSIF's financial position.

Page 28: MSIF Income Statement Summary

- (1) Positive percentage represents an increase and negative percentage represents a decrease to the Net Increase in Net Assets Resulting from Operations
- (2) Excludes capital gains incentive fee expense
- (3) See Non-GAAP Information disclosures on page 26 of this presentation
- (4) Change in ANII Before Taxes Margin and ANII Margin is based upon the basis point difference (increase/(decrease))
- (5) This fee equals (a) 17.5% of MSIF's incentive fee capital gain, which is calculated as MSIF's (i) cumulative net realized gains (net of any related net income tax expense), minus (ii) cumulative unrealized depreciation (net of any related income tax benefit, and excluding any unrealized appreciation), minus (b) the aggregate amount of any previously paid capital gains incentive fee, in each case from the MSIF Listing date through the applicable calendar year ended. In accordance with U.S. GAAP, at the end of each reporting period, MSIF estimates the capital gains incentive fee and adjusts the accrual for the fee based upon a hypothetical liquidation of its investment portfolio at the then current fair value. Therefore, the calculation of the accrual equals (a) MSIF's cumulative change in net fair value, including both (i) the cumulative net realized gain/loss and (ii) the cumulative net unrealized appreciation/depreciation (in both cases, net of any related cumulative net income tax expense or benefit), minus (b) the aggregate amount of any previously paid capital gains incentive fee, in each case from the MSIF Listing date through the applicable period ended. However, any capital gains incentive fee accrued related to the unrealized appreciation is neither earned nor payable to the Adviser until such time that it is realized, and assuming at the end of a calendar year such incentive fee capital gain exists excluding any cumulative unrealized appreciation (in each case, net of any related net income tax expense or benefits). If the calculation results in an increase in the accrual compared to the previous quarter, MSIF records an increase to the capital gains incentive fee accrual. If the calculation results in a decrease to the estimated incentive fee on capital gains when compared to the previous quarter, the accrual for the incentive fee on capital gains is reduced to the extent of such decrease. For the first quarter of 2026, MSIF reduced the accrual on the capital gains incentive fee by \$0.6 million, resulting in an ending capital gains incentive fee accrual of \$2.1 million as of March 31, 2026.
