## Key Performance Indicators

The Corporation presents certain key financial and nonfinancial performance indicators that management uses when assessing consolidated and/or segment results. The Corporation believes this information is useful because it provides management with information about underlying operational performance and trends. Key performance indicators are presented in Consolidated Financial Highlights on page 2 and on the Key Indicators pages for each segment.

## Business Segment Operations

The Corporation reports the results of operations of its four business segments and All Other on a fully taxable-equivalent (FTE) basis. Additionally, the results for the total Corporation as presented on pages 11 - 13 are reported on an FTE basis.

(1) Pretax, pre-provision income (PTPI) is a non-GAAP financial measure calculated by adjusting pretax income to add back provision for credit losses. Management believes that PTPI is a useful financial measure because it enables an assessment of the Corporation’s ability to generate earnings to cover credit losses through a credit cycle. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on page 33.)

(2) Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. Tangible book value per share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on page 33.)

Current-period information is preliminary and based on company data available at the time of the presentation.

</table>

(1) Regulatory capital ratios at June 30, 2022 are preliminary. We report regulatory capital ratios under both the Standardized and Advanced approaches. The approach that yields the lower ratio is used to assess capital adequacy.

(2) Tangible equity ratio equals period-end tangible shareholders’ equity divided by period-end tangible assets. Tangible common equity ratio equals period-end tangible common shareholders’ equity divided by period-end tangible assets. Tangible shareholders’ equity and tangible assets are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. (See Exhibit A: Non-GAAP Reconciliations - Reconciliation to GAAP Financial Measures on page 33.)

Current-period information is preliminary and based on company data available at the time of the presentation.

(1) FTE basis data is a non-GAAP financial measure. FTE basis is a performance measure used by management in operating the business that management believes provides investors with meaningful information on the interest margin for comparative purposes. The Corporation believes that this presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. Net interest income includes FTE adjustments of $209 million and $221 million for six months ended June 30, 2022 and 2021, $103 million and $106 million for the second and first quarters of 2022, and $105 million, $101 million and $110 million for the fourth, third and second quarters of 2021, respectively.

Current-period information is preliminary and based on company data available at the time of the presentation.

(1) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

(2) Total earning assets and total assets include asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity.

Current-period information is preliminary and based on company data available at the time of the presentation.

---

(1) Represents mobile and/or online active users over the past 90 days.
(2) Represents mobile active users over the past 90 days.
(3) In addition to the credit card portfolio in Consumer Banking, the remaining credit card portfolio is in GWIM.
(4) Loan production amounts represent the unpaid principal balance of loans and, in the case of home equity, the principal amount of the total line of credit.
(5) In addition to loan production in Consumer Banking, there is also first mortgage and home equity loan production in GWIM.

(1) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

(2) For presentation purposes, in segments or businesses where the total of liabilities and equity exceeds assets, the Corporation allocates assets from All Other to match the segments’ and businesses’ liabilities and allocated shareholders’ equity. As a result, total earning assets and total assets of the businesses may not equal total Consumer Banking.

Current-period information is preliminary and based on company data available at the time of the presentation.

</table>

(1) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

(2) Total earning assets and total assets include asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity.

Current-period information is preliminary and based on company data available at the time of the presentation.

</tbody>
</table>

(1) Investment banking fees represent total investment banking fees for Global Banking inclusive of self-led deals and fees included within Business Lending.
(2) Advisory includes fees on debt and equity advisory and mergers and acquisitions.
(3) Investment banking fees represent only the fee component in Global Banking and do not include certain other items shared with the Investment Banking Group under internal revenue sharing agreements.
(4) Prior periods have been revised to conform to current-period presentation.
(5) Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories defined by regulatory authorities. The reservable criticized exposure is on an end-of-period basis and is also shown as a percentage of total commercial reservable utilized exposure, including loans and leases, standby letters of credit, financial guarantees, commercial letters of credit and bankers’ acceptances.
(6) Nonperforming loans, leases and foreclosed properties are on an end-of-period basis. The nonperforming ratio is nonperforming assets divided by loans, leases and foreclosed properties.

Current-period information is preliminary and based on company data available at the time of the presentation.

(1) Effective October 1, 2021, a business activity previously included in the Global Markets segment is being reported as a liquidating business in All Other, consistent with a realignment in performance reporting to senior management. The activity was not material to Global Markets’ results of operations and historical results for the third and second quarters of 2021 were not restated.

(2) Substantially all of Global Markets total revenue is sales and trading revenue and investment banking fees, with a small portion related to certain revenue sharing agreements with other business segments. For additional sales and trading revenue information, see page 23.

(3) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

---

(1) Includes Global Banking sales and trading revenue of $498 million and $274 million for the six months ended June 30, 2022 and 2021, and $319 million and $179 million for the second and first quarters of 2022, and $98 million, $138 million and $170 million for the fourth, third and second quarters of 2021, respectively.

(2) For this presentation, sales and trading revenue excludes net debit valuation adjustment (DVA) gains (losses) which include net DVA on derivatives, as well as amortization of own credit portion of purchase discount and realized DVA on structured liabilities. Sales and trading revenue excluding net DVA gains (losses) represents a non-GAAP financial measure. We believe the use of this non-GAAP financial measure provides additional useful information to assess the underlying performance of these businesses and to allow better comparison of period-to-period operating performance.

(3) Net DVA gains (losses) were $227 million and $(36) million for the six months ended June 30, 2022 and 2021, and $158 million, $69 million, $2 million, $20 million and $34 million for the second and first quarters of 2022 and the fourth, third and second quarters of 2021, respectively. FICC net DVA gains (losses) were $220 million and $(37) million for the six months ended June 30, 2022 and 2021, and $160 million, $60 million, $4 million, $16 million and $28 million for the second and first quarters of 2022 and the fourth, third and second quarters of 2021, respectively. Equities net DVA gains (losses) were $7 million and $1 million for the six months ended June 30, 2022 and 2021, and $2 million, $9 million, $2 million, $4 million and $6 million for the second and first quarters of 2022 and the fourth, third and second quarters of 2021, respectively.

---

Current-period information is preliminary and based on company data available at the time of the presentation.

### Notes:

1. Effective October 1, 2021, a business activity previously included in the Global Markets segment is being reported as a liquidating business in All Other, consistent with a realignment in performance reporting to senior management. The activity was not material to Global Markets’ results of operations and historical results for the third and second quarters of 2021 were not restated.

2. All Other primarily consists of asset and liability management (ALM) activities, liquidating businesses and certain expenses not otherwise allocated to a business segment. ALM activities encompass interest rate and foreign currency risk management activities for which substantially all of the results are allocated to our business segments.

3. Includes elimination of segments’ excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity of $1.2 trillion and $1.0 trillion for the six months ended June 30, 2022 and 2021, $1.1 trillion and $1.2 trillion for the second and first quarters of 2022, and $1.2 trillion, $1.1 trillion and $1.1 trillion for the fourth, third and second quarters of 2021, respectively.

4. Includes elimination of segments’ excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity of $1.1 trillion, $1.2 trillion, $1.2 trillion, $1.2 trillion and $1.1 trillion at June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, respectively.

Current-period information is preliminary and based on company data available at the time of the presentation.

</table>

(1) Includes loans and leases, standby letters of credit and financial guarantees, derivative assets, assets held-for-sale, commercial letters of credit, bankers’ acceptances, securitized assets, foreclosed properties and other collateral acquired. Derivative assets are carried at fair value, reflect the effects of legally enforceable master netting agreements and have been reduced by cash collateral of $35.8 billion, $34.1 billion and $32.3 billion at June 30, 2022, March 31, 2022 and June 30, 2021, respectively. Not reflected in utilized and committed exposure is additional non-cash derivative collateral held of $51.9 billion, $45.6 billion and $37.1 billion, which consists primarily of other marketable securities, at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

(2) Total utilized and total committed exposure includes loans of $5.1 billion, $6.5 billion and $6.1 billion and issued letters of credit with a notional amount of $37 million, $48 million and $80 million accounted for under the fair value option at June 30, 2022, March 31, 2022 and June 30, 2021, respectively. In addition, total committed exposure includes unfunded loan commitments accounted for under the fair value option with a notional amount of $3.6 billion, $4.0 billion and $5.2 billion at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

(3) Includes U.S. small business commercial exposure.

(4) Includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (e.g., syndicated or participated) to other financial institutions.

(5) Industries are viewed from a variety of perspectives to best isolate the perceived risks. For purposes of this table, the real estate industry is defined based on the primary business activity of the borrowers or the counterparties using operating cash flows and primary source of repayment as key factors.

(6) Includes $2.1 billion, $3.0 billion and $15.7 billion of PPP loan exposure across impacted industries at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

(1) Foreclosed property balances do not include properties insured by certain government-guaranteed loans, principally loans insured by the Federal Housing Administration (FHA), that entered foreclosure of $71 million, $61 million, $52 million, $55 million and $66 million at June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, respectively.
(2) Balances do not include past due consumer credit card, consumer loans secured by real estate where repayments are insured by the FHA and individually insured long-term standby agreements (fully-insured home loans), and in general, other consumer and commercial loans not secured by real estate.
(3) Balances do not include nonperforming loans held-for-sale of $270 million, $336 million, $264 million, $279 million and $348 million and nonperforming loans accounted for under the fair value option of $11 million, $19 million, $21 million, $13 million and $13 million at June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, respectively.
(4) Balances do not include loans held-for-sale past due 30 days or more and still accruing of $179 million, $654 million, $523 million, $222 million and $159 million at June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, respectively, and loans held-for-sale past due 90 days or more and still accruing of $22 million, $50 million, $41 million, $9 million and $70 million at June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, respectively. At June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, there were $34 million, $8 million, $12 million, $9 million and $74 million, respectively, of loans accounted for under the fair value option past due 30 days or more and still accruing interest.
(5) These balances are excluded from total nonperforming loans, leases and foreclosed properties.
(6) Total assets and total loans and leases do not include loans accounted for under the fair value option of $5.5 billion, $7.1 billion, $7.8 billion, $7.6 billion and $7.0 billion at June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021, respectively.
(7) Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories defined by regulatory authorities. The reservable criticized exposure excludes loans held-for-sale, exposure accounted for under the fair value option and other nonreservable exposure.

---

(1) For amounts excluded from nonperforming loans, leases and foreclosed properties, see footnotes to Nonperforming Loans, Leases and Foreclosed Properties table on page 28.

(2) Consumer loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection. Certain troubled debt restructurings are classified as nonperforming at the time of restructuring and may only be returned to performing status after considering the borrower’s sustained repayment performance for a reasonable period, generally six months.

(3) Our policy is not to classify consumer credit card and non-bankruptcy related consumer loans not secured by real estate as nonperforming; therefore, the charge-offs on these loans have no impact on nonperforming activity and, accordingly, are excluded from this table.

(4) Includes U.S. small business commercial activity. Small business card loans are excluded as they are not classified as nonperforming.

(5) Commercial loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection. Troubled debt restructurings are generally classified as performing after a sustained period of demonstrated payment performance.©

</tr>
</tbody>
</table>

(1) Ratios are calculated as allowance for loan and lease losses as a percentage of loans and leases outstanding excluding loans accounted for under the fair value option. Consumer loans accounted for under the fair value option include residential mortgage loans of $79 million, $248 million and $257 million, and home equity loans of $298 million, $320 million and $397 million at June 30, 2022, March 31, 2022 and June 30, 2021, respectively. Commercial loans accounted for under the fair value option include U.S. commercial loans of $2.9 billion, $4.0 billion and $4.4 billion and non-U.S. commercial loans of $2.2 billion, $2.6 billion and $1.9 billion at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

(2) Total loans and leases do not include loans accounted for under the fair value option of $5.5 billion, $7.1 billion and $7.0 billion at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

(3) Includes allowance for loan and lease losses for U.S. small business commercial loans of $921 million, $1.0 billion and $1.4 billion at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

(4) Allowance for loan and lease losses includes $6.6 billion, $6.6 billion and $7.5 billion allocated to products (primarily the Consumer Lending portfolios within Consumer Banking) that are excluded from nonperforming loans and leases at June 30, 2022, March 31, 2022 and June 30, 2021, respectively. Excluding these amounts, allowance for loan and lease losses as a percentage of total nonperforming loans and leases was 129 percent, 118 percent and 134 percent at June 30, 2022, March 31, 2022 and June 30, 2021, respectively.

n/m = not meaningful

Current-period information is preliminary and based on company data available at the time of the presentation.
Exhibit A: Non-GAAP Reconciliations

Bank of America Corporation and Subsidiaries

Reconciliations to GAAP Financial Measures

(Dollars in millions, except per share information)

The Corporation evaluates its business based on the following ratios that utilize tangible equity, a non-GAAP financial measure. Tangible equity represents shareholders’ equity or common shareholders’ equity reduced by goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities (‘adjusted’ shareholders’ equity or common shareholders’ equity). Return on average tangible common shareholders’ equity measures the Corporation’s net income applicable to common shareholders as a percentage of adjusted average common shareholders’ equity. The tangible common equity ratio represents adjusted ending common shareholders’ equity divided by total tangible assets (total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities). Return on average tangible shareholders’ equity measures the Corporation’s net income as a percentage of adjusted average total shareholders’ equity. The tangible equity ratio represents adjusted ending shareholders’ equity divided by total tangible assets. Tangible book value per common share represents adjusted ending common shareholders’ equity divided by ending common shares outstanding. These measures are used to evaluate the Corporation’s use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders’ equity as key measures to support our overall growth goals.

See the tables below for reconciliations of these non-GAAP financial measures to the most closely related financial measures defined by GAAP for the six months ended June 30, 2022 and 2021, and the three months ended June 30, 2022, March 31, 2022, December 31, 2021, September 30, 2021 and June 30, 2021. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. Other companies may define or calculate supplemental financial data differently.
