

For Immediate Release

Astronics Receives 2019 GOOD DESIGN Award for Portable IFE

Astronics' new Portable IFE, Sierra, wins GOOD DESIGN® Award in transportation category

EAST AURORA, NY, February 4, 2020 – Astronics Corporation (Nasdaq: ATRO), a leading provider of advanced technologies for global aerospace, defense, and other mission critical industries, announced today that it has received the 2019 GOOD DESIGN Award in the transportation category for the design excellence of its portable inflight entertainment (IFE) product, Sierra.

The GOOD DESIGN Awards are presented by the Chicago Athanaeum Museum of Architecture and Design plus the Metropolitan Arts Press Ltd. Founded in Chicago in 1950, the program remains the oldest and world's most recognized authority for design excellence worldwide. Astronics' Sierra was selected for this award from a record number of submissions from the world's leading manufacturers and design firms, representing the most important influential corporations in the design industry.

"We're excited to announce that Sierra has been recognized by the Chicago Athenaeum for the 2019 GOOD DESIGN Award," said Michael Kuehn, President of Astronics Connectivity Systems and Certification (CSC). "Receiving this award acknowledges Sierra as the leader in bringing smart design paired with technology innovation to portable IFE."

Astronics' Sierra is an affordable, scalable IFE solution that delivers IFE as a standalone unit from a single battery or, when installed and powered, can employ multiple units merged into a single network to cover a larger aircraft cabin. Sierra enables passengers to enjoy hundreds of hours of streaming audio, video, digital magazine content, and more. Sierra stands up to the rigors of flight in the overhead bin while delivering streaming content that matches the experience of installed IFE without the need for a supplemental type certificate (STC).

About Astronics Corporation

Astronics Corporation (Nasdaq: ATRO) serves the world's aerospace, defense, and other mission critical industries with proven, innovative technology solutions. Astronics works side-by-side with customers, integrating its array of
