Barrett Business Services, Inc. Announces Amended Operating Results for Fourth Quarter and 12-Months Ended December 31, 2001 and Schedules Investor Conference Call

PORTLAND, Ore., April 3 /PRNewswire-FirstCall/ --

Barrett Business Services, Inc. (Nasdaq: BBSI) reported today that it has amended its previously announced operating results for the 2001 fourth quarter and 12-months ended December 31, 2001 by recognizing a \$1,837,000 after-tax charge in connection with post-year end adverse development of the estimated future expense of workers' compensation claims and, to a lesser extent, an increased provision for estimated bad debt expense related to one customer. Of the total after-tax charge of \$1,837,000 (\$3,000,000 pretax), \$1,745,000 (\$2,850,000 pretax) was attributable to higher workers' compensation expense and \$92,000 (\$150,000 pretax) was related to an increased estimate for bad debt expense. For the fourth quarter ended December 31, 2001, the Company's amended net loss totaled \$2,269,000, an increase of \$1,837,000 from the February 6, 2002 reported net loss of \$432,000. The basic and diluted net loss per share for the 2001 fourth quarter were \$.38. Cash flow per share (defined as net (loss) income plus depreciation and amortization divided by weighted average diluted shares outstanding) for the 2001 fourth quarter was a negative \$.24. The amended net loss for the year ended December 31, 2001 amounted to \$2,422,000, an increase of \$1,837,000 from the previously reported net loss of \$585,000. The basic and diluted net loss

per share for 2001 were \$.39. Cash flow per share for 2001 was a positive \$.14.

Revenues for the 2001 fourth quarter and 12-months ended December 31, 2001 were unchanged at \$50.7 million and \$216.7 million, respectively.

During February and March 2002, the Company's third party administrator ("TPA") for California workers' compensation claims reported significant increases in the estimated future costs of claims to the Company. The increases in estimated future costs were due in part to adverse development of previous estimates for future claims costs, the TPA's recent completion of a review of all claims files it had assumed from the Company's predecessor TPA during 2001, and a change in claims reserving practices mandated by the State of California. Due to the increased estimates for future claims costs, the Company engaged its outside actuary to analyze the financial effect of the revised costs estimates, which in turn resulted in the Company's recognition of the additional charge for workers' compensation expense for 2001.

William W. Sherertz, President and Chief Executive Officer, commented that, "I believe this charge will have minimal, if any, effect on the future cash flow of the Company, as the increased estimated future claims expense is primarily related to older claims. It has been our experience that the newer or current year injury claims precipitate greater cash needs because of the medical attention required by our injured employees. From an operational standpoint, a significant number of the older claims originated from two customers served by one branch office. We have made personnel changes at the branch and corporate offices, changed customer service procedures to ensure that we have a more appropriate match between the customers' personnel needs and our available employees, and improved communications with our new California TPA firm. Although the cost of workers' compensation claims in

California is far higher than any other zone within the Company, we believe that our management team has effectively addressed the operational issues. On a more positive note, we are encouraged that the burden of these increased cost estimates for prior year claims will not affect current and future year earnings."
