Viveve to Host Conference Call to Provide Corporate Update and Third Quarter 2019 Results on November 7, 2019

ENGLEWOOD, CO / ACCESSWIRE / October 24, 2019 Viveve Medical, Inc.

(NASDAQ:VIVE), a medical technology company focused on women's intimate health, today announced that it will report its third quarter 2019 financial results after the close of the U.S. financial markets on Thursday, November 7, 2019, and will host a live conference call and webcast to provide a corporate update at 5:00 PM ET the same day.

The conference call may be accessed by dialing 1-833-255-2833 (domestic) or 1-412-902-6728 (international) or via live webcast at <https://services.choruscall.com/links/vive191107.html>. Participants may also pre-register for the conference call at <http://dpreregister.com/10136007>.

A recording of the webcast will be posted on the company's investor relations website following the call at ir.viveve.com and will be available online for 90 days.

About Viveve

Viveve Medical, Inc. is a medical technology company focused on women's intimate health. Viveve is committed to advancing new solutions to improve women's overall well-being and quality of life. The internationally patented Viveve[®] System incorporates cryogen-cooled monopolar radiofrequency (CMRF) technology to uniformly deliver volumetric heating while gently cooling surface tissue to generate neocollagenesis in a single in-office session.

Currently, in the United States, the Viveve System is cleared by the U.S. Food and Drug Administration (FDA) for use in general surgical procedures for electrocoagulation and hemostasis. International regulatory approvals and clearances have been received for vaginal laxity and/or improvement in sexual function indications in over 50 countries. Viveve is conducting VIVEVE II, a multicenter, randomized, double-blind, sham-controlled clinical trial to assess improvement of sexual function in women following vaginal childbirth. Completion of full 250 subject enrollment was announced in early March 2019. The top-line 12-month data read-out of the VIVEVE II trial is expected in April 2020. If successful, VIVEVE II results could support a marketing application for a new U.S. commercial indication.

Viveve continues to advance its clinical development program in stress urinary incontinence (SUI) and plans to initiate a short-term feasibility study upon approval by the Canadian Ministry of Health of the investigational testing application submitted in August 2019. Following the positive yet inconclusive results of the LIBERATE-International trial, the proposed feasibility study will be a single-blind, three-arm, three-month study to compare Viveve's CMRF treatment to cryogen-only treatment and to inert sham treatment in order to

capture short-term safety and effectiveness data on use of the Viveve System for the improvement of SUI in women. Results of the planned three-month feasibility study are targeted for read-out in April 2020. If positive, the results could be used to support Viveve's re-submission of its Investigational Device Exemption to the FDA for approval to conduct the LIBERATE-U.S. trial designed to evaluate the safety and effectiveness of the Viveve System for improvement of SUI in women. The results of these trials, if successful, could support marketing applications in the U.S. and over 30 countries around the world for this new commercial indication.
