Dubai Air Taxi Network Takes Flight: Joby Completes Landmark Flight and Announces Next Vertiport Locations

- *Completes UAE's first piloted point-to-point air taxi flight, landing at Al Maktoum International Airport (DWC)*
- *Confirms development of three new vertiports: Dubai Mall, Atlantis the Royal and American University of Dubai*
- *Conducting daily flight demonstrations at the Dubai Airshow 2025*

DUBAI, United Arab Emirates--(BUSINESS WIRE)-- Joby Aviation, Inc. (NYSE:JOBY), a company developing electric air taxis for commercial passenger service, today announced the next three vertiports to be added to Dubai's electric air taxi network, alongside Dubai's Road and Transport Authority (RTA) and Skyports Infrastructure, who will be responsible for building the vertiports. The sites, at the American University of Dubai, Atlantis the Royal and the Dubai Mall, will enable Joby to deliver high-speed, emissions-free connections between some of Dubai's most high-profile destinations, as part of its six-year exclusive agreement with the RTA to establish air taxi services in the Emirate.

The news comes as Joby successfully completed a landmark flight test,

becoming the first electric air taxi company to conduct a point-to-point flight in the UAE. On Sunday 9 November, Joby landed its aircraft at Al Maktoum International Airport (DWC) following a 17-minute piloted flight from its test facility in Margham, underscoring Joby's commercial market readiness and ability to operate in shared airspace. Tens of thousands of attendees will have the opportunity to see Joby's aircraft in action at this week's Dubai Airshow, with demonstration flights planned for each day of the show.

His Excellency Mattar Al Tayer, Director General, Chairman of the Board of Executive Directors of Dubai's Roads and Transport Authority (RTA), stated that "the successful completion of the first crewed flight of the electric aerial taxi marks a new milestone in Dubai's distinguished record of leadership and innovation. The successful completion by Joby Aviation of the first air taxi flight between two distinct locations underscores the success of RTA's operational framework for developing Dubai's aerial mobility ecosystem. This

milestone paves the way for a new phase of integration among smart mobility systems across the emirate, further strengthening the confidence of global partners in Dubai's regulatory and technological environment and establishing it as a leading global platform for future mobility trials.

"RTA is steadily progressing towards the commercial launch of the aerial taxi service in 2026, solidifying Dubai's position as the city of the future and a global hub for innovative and sustainable urban mobility solutions, combining efficient infrastructure with high quality of life," His Excellency confirmed.

Joe Ben Bevirt, founder and CEO of Joby Aviation, said: "From flight demonstrations to infrastructure, we're making incredible progress on all fronts as we look ahead to launching commercial passenger service in Dubai next year. By working alongside the RTA, other government agencies and infrastructure partners, we've been able to streamline development of the world's first air taxi service and are closer than ever to making urban air transport an everyday reality for residents and visitors across the UAE."

Today's vertiport announcement brings together three major Dubai property developers - Emaar Properties, Atlantis The Royal, and Wasl Asset Management Group - to deliver a network of valuable and high-traffic sites across the emirate:

- **Dubai Mall:** The world's largest shopping and entertainment destination, attracting nearly 111 million visitors in 2024 to its vast array of attractions, such as the Burj Khalifa.
- **Atlantis the Royal:** A global landmark resort located at the center of Palm Jumeirah, offering unmatched connectivity to premier beachfront destinations, world-class dining, and entertainment.
- **American University of Dubai:** Strategically located to serve both Dubai Marina's vibrant residential and entertainment hub and Dubai Internet City's leading technology and corporate districts.

Alongside the vertiport at Dubai International Airport, which is set to be completed in the first quarter of 2026, these sites will make up the initial vertiport network for Joby's air taxi service in Dubai, which is set to launch in 2026.

About Joby

Joby Aviation, Inc. (NYSE:JOBY) is a California-based transportation company developing an all-electric, vertical take-off and landing air taxi. Joby intends to both operate its fast, quiet, and convenient air taxi service in cities around the world and sell its aircraft to other operators and partners. Forward Looking Statements

This release contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, including but not limited to, statements regarding the development and performance of our aircraft, the growth of our manufacturing capabilities, our regulatory outlook, progress and timing, including our plans to begin carrying passengers in 2026, timing and potential locations of our vertiports, and planned participation in the Dubai airshow; our business plan, objectives, goals and market

opportunity; plans for, and potential benefits of, our strategic partnerships; and our current expectations relating to our business, financial condition, results of operations, prospects, capital needs and growth of our operations. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as “anticipate”, “estimate”, “expect”, “project”, “plan”, “intend”, “believe”, “may”, “will”, “should”, “can have”, “likely” and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. All forward looking statements are subject to risks and uncertainties that may cause actual results to differ materially, including: our ability to launch our air taxi service and the growth of the urban air mobility market generally; our ability to produce aircraft that meet our performance expectations in the volumes and on the timelines that we project; complexities related to obtaining certification and operating in foreign markets; the competitive environment in which we operate; our future capital needs; our ability to adequately protect and enforce our intellectual property rights; our ability to effectively respond to evolving regulations and standards relating to our aircraft; our reliance on third-party suppliers and service partners; uncertainties related to our estimates of the size of the market for our service and future revenue opportunities; and other important factors discussed in the section titled “Risk Factors” in our Annual Report on Form 10-K, filed with the Securities and Exchange Commission (the “SEC”) on February 27, 2025, our Quarterly Reports on Form 10-Q filed with the SEC on May 8, 2025 and August 7, 2025, and in future filings and other reports we file with or furnish to the SEC. Any such forward-looking statements represent management’s estimates and beliefs as of the date of this release. While we may elect to update such forward-looking statements at some point in the future, we disclaim any obligation to do so, even if subsequent events cause our views to change.
