## **SEI Partners with Area Universities to Fuel Innovation**

### **Students Present Original Programming Ideas to SEI Wealth Platform<sup>SM</sup> Developers**

OAKS, Pa., Dec. 12, 2016 (GLOBE NEWSWIRE) -- SEI (NASDAQ:SEIC) continues to demonstrate its commitment to higher education and students' professional development through its strategic partnerships with local universities and colleges. Most recently, the SEI Wealth Platform (the Platform) co-sponsored a Hackathon Challenge at Temple University, in addition to hosting a Lehigh University student presentation for one of the school's Capstone Projects.

Attended by 100 students from local universities, this first Hackathon was organized by Temple University students. As a Gold Sponsor, SEI created the "Best Financial Hack" Challenge, won by a group of three students, who submitted a penny stock app with well-considered functionality and an organized business model. Additionally, SEI deemed one student as the winner for the most functional project of the Hackathon, highlighting the ability to view and manage multiple livestreams from varying sources in a side-by-side browser. All four winning students will receive a Google Home device, as well as a visit to SEI's campus for a tour, lunch, and opportunity to meet with developers outside of the classroom.

Students from Lehigh University's Computer Science for Business program visited SEI's campus in December to present their Capstone Project, which recommended programming modules for type-ahead search capabilities on the Platform. In its second year, this partnership with Professor Dennis Foster provides students the ability to complete their Capstone Project as part of their coursework.

"It's a pleasure for us to partner with local universities to provide learning and development opportunities for the future's young professionals," said Ryan Hicke, Senior Vice President of SEI Wealth Platform. "We are strongly committed to the ongoing development and retention of technology talent in the region. We are impressed by the level of talent out there and will continue to find ways to foster engagement opportunities."

In early 2017, SEI, in conjunction with Drexel University, will release a white paper that details a study performed in the university's innovation lab to enhance the Platform's end-user experience.

## About the SEI Wealth Platform<sup>SM</sup>

The SEI Wealth Platform (the Platform) is an outsourcing solution for wealth managers encompassing wealth processing services and wealth management programs, combined with business process expertise.
