Vaunt to Exhibit at NBAA Schedulers & Dispatchers 2025, Unveiling New Feature to Drive Subscriber Growth

ATLANTA--(BUSINESS WIRE)-- Volato Group, Inc. (the “Company” or “Volato”) (NYSE American: SOAR), a leader in private aviation innovation, today announced that Vaunt, its fast-growing private aviation platform, will exhibit at the NBAA Schedulers & Dispatchers Conference, taking place March 25-27, 2025, at the New Orleans Ernest N. Morial Convention Center in New Orleans, LA. At the event, Vaunt will introduce a new feature aimed at accelerating subscriber growth and strengthening its network effect for both operators and travelers.

“Vaunt is building an ecosystem where every additional subscriber adds value for both travelers and operators,” said Matt Liotta, CEO of Volato, who will be available for in-person meetings during the conference. “This new feature is designed to fuel that momentum—making it even easier for users to engage with the platform and helping us unlock the next phase of growth.”

Since integrating flyExclusive’s fleet in late 2024, Vaunt has sustained double-digit ARR growth, widened its user base, and driven increased platform engagement—clear indicators of its ability to scale efficiently and generate recurring revenue streams. The expansion to 111 total aircraft on platform positions Vaunt for continued acceleration in 2025 and cements its role within Volato’s broader strategy to redefine private aviation with tech-enabled solutions.

Enhancing Vaunt’s Subscriber Acquisition Engine

The new feature, set to be unveiled at the event, is engineered to boost user acquisition by increasing the utility and stickiness of the Vaunt platform. By making it easier for members to access unique private aviation opportunities, Vaunt is aiming to strengthen its rapidly growing user base and, in turn, provide greater value across its expanding operator network.

Operator-Centric Platform with Scalable Demand

Vaunt recently more than doubled its aircraft network to 111 aircraft through expanded partnerships with JetVia, Koury Aviation, and flyExclusive. The platform has also delivered double-digit ARR growth, underscoring its ability to scale while simultaneously solving inefficiencies in private aviation.

“Every new subscriber means more eyes on operators’ empty legs and more opportunity for them to capture revenue,” added Liotta. “Our growth in users benefits everyone on the platform.”

Strengthening Volato's Broader Strategy

Vaunt's expanding subscriber base supports Volato's larger mission to build scalable aviation platforms that combine operational efficiency with tech-driven customer engagement—positioning the company to deliver lasting value for shareholders and industry partners.

Join the Vaunt Operator Network

Vaunt is actively expanding its third-party operator program, providing operators with access to a highly engaged member base eager for unique private aviation opportunities. If you're an operator interested in joining the Vaunt platform, visit <https://flyvaunt.com/operators/> to learn more and get started.

About Vaunt

Vaunt, a subsidiary of Volato Group, Inc., is an experiential private aviation platform that turns spontaneous travel opportunities into unforgettable moments. More than just a way to fly, Vaunt is a nostalgia maker, giving members access to last-minute, one-of-a-kind travel experiences that aren't just about the destination, but the story they create along the way.

About Volato

Volato is a private aviation company advancing the industry with innovative solutions in aviation software and on-demand flight access. Volato's proprietary Mission Control software drives efficiency across operations and supports operators in managing fractional ownership, charter, and other services. Volato's Vaunt platform connects travelers with available private flights, offering a flexible option for on-demand travel. With a commitment to advanced technology and customer-focused solutions, Volato is building scalable tools to elevate service quality and operational effectiveness in private aviation.
