Sunrun Reports First Quarter 2020 Financial Results

298,000 Customers, an increase of 23% year-over-year

Net Earning Assets of \$1.6 billion, an increase of 12% year-over-year

Transitioned to a Digital Sales and Streamlined Operating Model to Provide Essential Service and Reduce Soft Costs

SAN FRANCISCO, May 06, 2020 (GLOBE NEWSWIRE) -- Sunrun (Nasdaq: RUN), the nation's leading provider of residential solar, storage and energy services, today announced financial results for the first quarter ended March 31, 2020.

"Sunrun has dramatically increased our corporate metabolism over the past few weeks. We've made the process of going solar nearly contact-free for our customers, launched digital selling, made investments in our technology platform, and accelerated process improvements. We will emerge a stronger business," said Lynn Jurich, Sunrun's Chief Executive Officer and co-founder. "Our orders reached a single-day all-time high at the end of April as consumers are choosing to power through. Sunrun's services give people peace of mind financially and enable them to safeguard their families against the increasingly unreliable electricity grid when they need power most, all while making the planet a better place to live."

Key Operating Metrics

In the first quarter of 2020, Megawatts Deployed (MW) increased to 97 MW from 86 MW in the first quarter of 2019, a 13% year-over-year improvement.

Creation Cost per watt was \$3.09 in the first quarter of 2020, compared to \$3.46 in the first quarter of 2019, an 11% year-over-year improvement.

NPV created in the first quarter of 2020 was \$81 million. Unlevered NPV in the first quarter of 2020 was \$0.98 per watt, representing approximately \$7,100 per customer.

Gross Earning Assets as of March 31, 2020 were \$3.9 billion, up \$695 million, or 22%, from the prior year. Net Earning Assets as of March 31, 2020 were \$1.6 billion, up \$170 million, reflecting a 12% increase from the prior year.

Cash, including restricted cash, increased \$56.3 million from the prior year. Cash Generation was \$5 million in the first quarter of 2020. The company defines Cash Generation as the increase in total cash, including restricted cash, less any increases in recourse debt, and adjusted for certain items. In the first quarter of 2020, Cash Generation was adjusted for \$0.4 million investment in the company's Investment Tax Credit safe harbor program.

First Quarter 2020 GAAP Results

Total revenue grew to \$210.7 million in the first quarter of 2020, up \$16.2 million, or 8%, from the first quarter of 2019. Customer agreements and incentives revenue was \$99.1 million, a decline of \$0.7 million, or 1%, compared to the first quarter of 2019, owing to a shift in tax equity fund mix which has different revenue accounting treatment for incentives. Customer agreements revenue was \$94.3 million, an increase of \$15.7 million, or 20%, from the first quarter of 2019. Solar energy systems and product sales revenue was \$111.6 million, an increase of \$17.0 million, or 18%, compared to the first quarter of 2019. Customer agreements revenue, solar energy systems revenue and product sales revenue was \$205.9 million in total, an increase of \$32.7 million, or 19%, compared to the first quarter of 2019.

Total cost of revenue was \$169.9 million, an increase of 15% year-over-year. Total operating expenses were \$273.7 million, an increase of 15% year-over-year.

Net loss attributable to common stockholders was \$28.0 million, or \$0.23 per share, in the first quarter of 2020.

Financing Activities

As of May 6, 2020, considering only closed tax equity and debt capital commitments, the company's pre-arranged financings provide capital to fund approximately 220 MW of leased projects beyond what was deployed through the end of first quarter of 2020, at above 90% of contracted Project Value. The company also has additional project finance capital to fund installations at lower advance rates.

Conference Call Information

Sunrun is hosting a conference call for analysts and investors to discuss its first quarter 2020 results and business outlook at 2:00 p.m. Pacific Time today, May 6, 2020. A live audio webcast of the conference call along with supplemental financial information will be accessible via the "Investor Relations" section of the Company's website at <http://investors.sunrun.com>. The conference call can also be accessed live over the phone by dialing (877) 470-1078 (domestic) or (615) 247-0087 (international) using ID #4879901. A replay will be available following the call via the Sunrun Investor Relations website or for one week at the following numbers (855) 859-2056 (domestic) or (404) 537-3406 (international) using ID #4879901.

About Sunrun

Sunrun Inc. (Nasdaq:RUN) is the nation's leading home solar, battery storage, and energy services company. Founded in 2007, Sunrun pioneered home solar service plans to make local clean energy more accessible to everyone for little to no upfront cost. Sunrun's innovative home battery solution, Brightbox, brings families affordable, resilient, and reliable energy. The company can also manage and share stored solar energy from the batteries to provide benefits to households, utilities, and the electric grid while reducing our reliance on polluting energy sources. For more information, please visit www.sunrun.com.

Forward Looking Statements

This press release contains forward-looking statements within the meaning of Section 21E

of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995, including statements regarding our market leadership, competitive advantages, business plan, investments, market adoption rates, our future financial and operating performance, the impact of the COVID-19 on the Company and its business and operations, transitioning to a digital sales model, reductions to our workforce and labor-related costs, our operational and financial results such as growth, value creation, Cash Generation, Megawatts Deployed, investment tax credit safe harbor strategy, estimates of Gross and Net Earning Assets, Project Value, estimated Creation Costs, gross orders, demand, customer acquisition costs, NPV and the assumptions related to the calculation of the foregoing metrics, as well as our expectations regarding our growth, financing activities, and financing capacity, and factors outside of our control such as public health emergencies and natural disasters. The risks and uncertainties that could cause our results to differ materially from those expressed or implied by such forward-looking statements include, but are not limited to: the availability of additional financing on acceptable terms; changes in the retail prices of traditional utility generated electricity; the impact of COVID-19 on the Company and its business and operations; worldwide economic conditions, including slow or negative growth rates in global and domestic economies and weakened consumer confidence and spending; changes in policies and regulations including net metering and interconnection limits or caps; the availability of rebates, tax credits and other incentives; the availability of solar panels and other raw materials; our limited operating history, particularly as a new public company; our ability to attract and retain our relationships with third parties, including our solar partners; our ability to meet the covenants in our investment funds and debt facilities; our continued ability to manage costs associated with solar service offerings, our business plan and our ability to effectively manage our growth and labor constraints, and such other risks identified in the reports that we file with the U.S. Securities and Exchange Commission, or SEC, from time to time. All forward-looking statements in this press release are based on information available to us as of the date hereof, and we assume no obligation to update these forward-looking statements.

Key Operating Metrics and Financial Metrics

	Three Months Ended March 31,	
	2020	2019
Megawatts Deployed (during the period)	97	86
Cumulative Megawatts Deployed (end of period)	2,085	1,661
Gross Earning Assets under Energy Contract (end of period)(in millions)	\$ 2,671	\$ 2,153
Gross Earning Assets Value of Purchase or Renewal (end of period)(in millions)	\$ 1,191	\$ 1,014
Gross Earning Assets (end of period)(in millions) (1)	\$ 3,862	\$ 3,167
Net Earning Assets (end of period)(in millions) (1)(2)	\$ 1,602	\$ 1,432

	Three Months Ended March 31,	
	2020	2019
Project Value, Contracted Portion (per watt)	\$ 3.69	\$ 4.01
Project Value, Renewal Portion (per watt)	\$ 0.38	\$ 0.51
Total Project Value (per watt)	\$ 4.07	\$ 4.52
Creation Cost (per watt) (3)	\$ 3.09	\$ 3.46
Unlevered NPV (per watt) (1)	\$ 0.98	\$ 1.06
NPV (in millions)	\$ 81	\$ 77

1. Numbers may not sum due to rounding.
2. Sunrun records income when it delivers tax benefits to its tax equity investors. Under partnership flip transactions this income is recognized beginning at the time of deployment. In pass-through financing transactions, income is recognized later, upon utility interconnection permission (PTO). Income recognition therefore lags in periods when the company is increasing its use of pass-through financing funds. Until PTO is received for a solar system in a pass-through financing obligation structure, the company records the expected value of tax benefits as a short term pass-through financing obligation, similar to deferred revenue accounting. The amount reflected within short-term pass-through financing obligation was \$9.3 million in the first quarter of 2019. As such, the pass-through financing obligation used to calculate Net Earning Assets is reduced by \$9.3 million. There was no amount reflected within short-term pass through financing in the first quarter of 2020.

3. Creation Costs in the first quarter of 2020 exclude approximately \$1.4 million in restructuring costs.

Definitions

Creation Cost includes (i) certain installation and general and administrative costs after subtracting the gross margin on solar energy systems and product sales divided by watts deployed during the measurement period and (ii) certain sales and marketing expenses under new Customer Agreements, net of cancellations during the period divided by the related watts deployed.

Customers refers to all parties (i) who have executed Customer Agreements or cash sales agreements with us and (ii) for whom we have internal confirmation that the applicable solar energy system has reached notice to proceed or “NTP”, net of cancellations. Customer Agreements refers to, collectively, solar power purchase agreements and solar leases.

Gross Earning Assets represent the remaining net cash flows (discounted at 6%) we expect to receive during the initial term of our Customer Agreements (typically 20 or 25 years) for systems that have been deployed as of the measurement date, plus a discounted estimate of the value of the Customer Agreement renewal term or solar energy system purchase at the end of the initial term. Gross Earning Assets deducts estimated cash distributions to investors in consolidated joint ventures and estimated operating, maintenance and administrative expenses for systems deployed as of the measurement date. In calculating Gross Earning Assets, we deduct estimated cash distributions to our project equity financing providers. In calculating Gross Earning Assets, we do not deduct customer payments we are obligated to pass through to investors in pass-through financing obligations as these amounts are reflected on our balance sheet as long-term and short-term pass-through financing obligations, similar to the way that debt obligations are presented. In determining our finance strategy, we use pass-through financing obligations and long-term debt in an equivalent fashion as the schedule of payments of distributions to pass-through financing investors is more similar to the payment of interest to lenders than the internal rates of return (IRRs) paid to investors in other tax equity structures. We calculate the Gross Earning Assets value of the purchase or renewal amount at the expiration of the initial contract term assuming either a system purchase or a five year renewal (for our 25-year Customer Agreements) or a 10-year renewal (for our 20-year Customer Agreements), in each case forecasting only a 30-year customer relationship (although the customer may renew for additional years, or purchase the system), at a contract rate equal to 90% of the customer’s contractual rate in effect at the end of the initial contract term. After the initial contract term, our Customer Agreements typically automatically renew on an annual basis and the rate is initially set at up to a 10% discount to then-prevailing power prices. Gross Earning Assets Under Energy Contract represents the remaining net cash flows during the initial term of our Customer Agreements (less substantially all value from SRECs prior to July 1, 2015), for systems deployed as of the measurement date.

Gross Earning Assets Under Energy Contract represents the remaining net cash flows during the initial term of our Customer Agreements (less substantially all value from SRECs prior to July 1, 2015), for systems deployed as of the measurement date.

Gross Earning Assets Value of Purchase or Renewal is the forecasted net present value

we would receive upon or following the expiration of the initial Customer Agreement term (either in the form of cash payments during any applicable renewal period or a system purchase at the end of the initial term), for systems deployed as of the measurement date.

Megawatts Deployed represents the aggregate megawatt production capacity of our solar energy systems, whether sold directly to customers or subject to executed Customer Agreements (i) for which we have confirmation that the systems are installed on the roof, subject to final inspection, (ii) in the case of certain system installations by our partners, for which we have accrued at least 80% of the expected project cost, or (iii) for multi-family and any other systems that have reached NTP, measured on the percentage of the project that has been completed based on expected project cost.

Net Earning Assets represents Gross Earning Assets less both project level debt and pass-through financing obligations, as of the same measurement date. Because estimated cash distributions to our project equity financing partners are deducted from Gross Earning Assets, a proportional share of the corresponding project level debt is deducted from Net Earning Assets.

NPV equals Unlevered NPV multiplied by leased megawatts deployed in period.

NTP or **Notice to Proceed** refers to our internal confirmation that a solar energy system has met our installation requirements for size, equipment and design.

Project Value represents the value of upfront and future payments by customers, the benefits received from utility and state incentives, as well as the present value of net proceeds derived through investment funds. Specifically, Project Value is calculated as the sum of the following items (all measured on a per-watt basis with respect to megawatts deployed under Customer Agreements during the period): (i) estimated Gross Earning Assets, (ii) utility or upfront state incentives, (iii) upfront payments from customers for deposits and partial or full prepayments of amounts otherwise due under Customer Agreements and which are not already included in Gross Earning Assets and (iv) finance proceeds from tax equity investors, excluding cash true-up payments or the value of asset contributions in lieu of cash true-up payments made to investors. Project Value includes contracted SRECs for all periods after July 1, 2015.

Unlevered NPV equals the difference between Project Value and estimated Creation Cost on a per watt basis.
