SPLNG Estimated Cash Flows
(With Trains 1 – 4 Operational)

($ in millions)	Annualized
Total	$ 127
Chevron	133
SPL	290
Other	10
Total Revenues	**560**
Total Expenses	**(65)**
EBITDA (1)	**$ 495**
Debt Service (2)	(130)
Distributable cash flow to CQP	**$ 365**

(1) EBITDA is a non-GAAP measure. EBITDA is computed as total revenues less non-cash deferred revenues, operating expenses, assumed commissioning costs and state and local taxes. It does not include depreciation expenses and certain non-operating items. Because we have not forecasted depreciation expense and non-operating items, we have not made any forecast of net income, which would be the most directly comparable financial measure under generally accepted accounting principles, or GAAP, and we are unable to reconcile differences between forecasts of EBITDA and net income. EBITDA has limitations as an analytical tool and should not be considered in isolation or in lieu of an analysis of our results as reported under GAAP, and should be evaluated only on a supplementary basis.

(2) Assumes refinancing of the 2016 and 2020 notes at an interest rate comparable to existing SPL interest rates.

Note: The above represents a single financing scenario. Estimates are as of June 2013. Estimates represent a summary of internal forecasts, are pre-tax, are based on current assumptions and are subject to change. Actual performance may differ materially from, and there is no plan to update, the forecast. See "Forward Looking Statements" slide.

(1) Assumes $6.00 / MMBtu natural gas price and that Offtakers lift 100% of their full contractual entitlement. Amounts are net of estimated natural gas to be used for the liquefaction process.

(2) EBITDA is a non-GAAP measure. EBITDA is computed as total revenues less non-cash deferred revenues, operating expenses, assumed commissioning costs and state and local taxes. It does not include depreciation expenses and certain non-operating items. Because we have not forecasted depreciation expense and non-operating items, we have not made any forecast of net income, which would be the most directly comparable financial measure under GAAP, and we are unable to reconcile differences between forecasts of EBITDA and net income.
