- In September 2021, our Board of Directors approved a comprehensive long-term capital allocation plan designed to achieve an investment grade balance sheet, return significant capital to shareholders over time, and enable investment in accretive growth. The plan includes (i) debt repayment of approximately \$1.0 billion annually through 2024 until consolidated investment grade credit metrics are met, (ii) the initiation of a quarterly dividend, with an initial dividend of \$0.33 per share for the third quarter of 2021, payable November 17, 2021, and (iii) a new three-year, \$1.0 billion share repurchase program, inclusive of any amounts remaining under the previous authorization as of September 30, 2021, effective October 1, 2021.

The study is published in the *American Chemical Society Sustainable Chemistry & Engineering Journal*.

## CEO COMMENT

“Our strong third quarter results are the product of our operational excellence as well as the continued strength in the global LNG market,” said Jack Fusco, Cheniere’s President and Chief Executive Officer. “As we look ahead to 2022, we look forward to substantial completion on Train 6 at Sabine Pass in the first quarter, approximately a year ahead of the guaranteed completion schedule, fully realizing our original 9-train vision, and expanding on that platform with a positive FID on Corpus Christi Stage 3.”

“Our 2022 guidance ranges are driven by Train 6 commencing in the first quarter and sustained higher margins available in the market. We look forward to reinforcing our reputation for operational excellence and delivering results within the guidance ranges next year.”

“We have recently executed two new long-term SPAs with ENN and Glencore. These transactions showcase the global demand for securing flexible, reliable LNG supply for the long term as well as Cheniere’s role as a leading global LNG supplier. Strength in the LNG market, coupled with Cheniere’s commercial momentum, supports our confidence in a Stage 3 FID in 2022.”

## SUMMARY AND REVIEW OF FINANCIAL RESULTS

<i>(in millions, except LNG data)</i>	Three Months Ended September 30,			Nine Months Ended September 30,		
	2021	2020	% Change	2021	2020	% Change
Revenues	\$ 3,200	\$ 1,460	119%	\$ 9,307	\$ 6,571	42%

Net income (loss) <sup>2</sup>	\$ (1,084)	\$ (463)	(134)%	\$ (1,020)	\$ 109	<i>nm</i>
Consolidated Adjusted EBITDA <sup>1</sup>	\$ 1,053	\$ 477	121%	\$ 3,528	\$ 2,909	21%
LNG exported:						
Number of cargoes	141	55	156%	413	261	58%
Volumes (TBtu)	500	193	159%	1,476	920	60%
LNG volumes loaded (TBtu)						
	500	187	167%	1,475	920	60%

Net income decreased \$621 million and \$1.1 billion for the three and nine months ended September 30, 2021, respectively, as compared to the corresponding 2020 periods, primarily due to an increase in derivative losses from changes in fair value and settlements of \$3.4 billion and \$4.5 billion (pre-tax and excluding the impact of non-controlling interests). This impact was partially offset by increased volume and revenue per MMBtu of LNG as well as an income tax benefit generated by the pre-tax derivative losses in our earnings, and the proportion of such earnings attributable to non-controlling interests, during the three and nine months ended September 30, 2021, respectively.

Substantially all after-tax derivative losses relate to the use of commodity derivative instruments, principally those indexed to international LNG prices. While operationally we seek to eliminate commodity risk by utilizing derivatives to mitigate price volatility for commodities procured or sold over a period of time, as a result of the significant appreciation in forward international LNG commodity curves during the three and nine months ended September 30, 2021, we incurred \$3.2 billion and \$4.0 billion, respectively, of non-cash changes in fair value attributed to positions indexed to such prices (pre-tax and excluding the impact of non-controlling interest), primarily related to our Integrated Production Marketing (“IPM”) agreements, as well as certain physical and financial derivatives to hedge exposure to commodity markets in which we have contractual agreements to purchase or sell physical LNG. Our IPM agreements are structured to provide stable margins on purchases of natural gas and sales of LNG over the life of the agreement and have a fixed fee component, similar to that of LNG sold under our long-term, fixed fee LNG SPAs. However, the long-term duration and international price basis of our IPM agreements make them particularly susceptible to fluctuations in fair market value from period to period.

Consolidated Adjusted EBITDA increased \$576 million, or 121%, and \$619 million, or 21%, during the three and nine months ended September 30, 2021, respectively, as compared to the comparable 2020 periods, due primarily to increased volume and margin per MMBtu of LNG delivered.

During the three and nine months ended September 30, 2020, we recognized \$171 million and \$932 million, respectively, in LNG revenues associated with cancelled LNG cargoes, of which \$47 million would have been recognized subsequent to September 30, 2020 had the cargoes been lifted pursuant to the delivery schedules with the customers. LNG revenues during the three months ended September 30, 2020 excluded \$458 million that would have otherwise been recognized during the quarter if the cargoes were lifted pursuant to the delivery schedules with the customers. We did not have any such revenue timing impacts during the three months ended September 30, 2021. LNG revenues during the nine months

ended September 30, 2021 exclude \$38 million that would have been recognized during the period if the cargoes were lifted pursuant to the delivery schedules with the customers.

Share-based compensation expenses included in income totaled \$28 million and \$91 million for the three and nine months ended September 30, 2021, respectively, compared to \$27 million and \$84 million for the three and nine months ended September 30, 2020, respectively.

Our financial results are reported on a consolidated basis. Our ownership interest in Cheniere Partners (NYSE American: CQP) as of September 30, 2021 consisted of 100% ownership of the general partner and a 48.6% limited partner interest.

## **BALANCE SHEET MANAGEMENT**

### **Capital Resources**

As of September 30, 2021, our total consolidated liquidity position was over \$6 billion. We had cash and cash equivalents of \$2.2 billion on a consolidated basis, of which \$1.7 billion was held by Cheniere Partners. In addition, we had current restricted cash of \$419 million, \$1.25 billion of available commitments under our Revolving Credit Facility, \$840 million of available commitments under the Cheniere Corpus Christi Holdings, LLC (“CCH”) Working Capital Facility, \$750 million of available commitments under Cheniere Partners’ credit facilities, and \$804 million of available commitments under the SPL Working Capital Facility.

### **Key Financial Transactions and Updates**

In October 2021, we amended and restated our \$1.25 billion Revolving Credit Facility (“Cheniere Revolving Credit Facility”) with 23 financial institutions. The amendment extended the maturity through October 2026, reduced the interest rate and commitment fees, which can be further reduced based on our credit ratings and may be positively or negatively adjusted up to 5 basis points on the interest rate and up to one basis point on the commitment fees based on the achievement of defined ESG milestones, and makes certain other changes to the terms and conditions of the existing revolving credit facility. Borrowings under the Cheniere Revolving Credit Facility will initially bear interest at a rate of London Interbank Offered Rate (LIBOR) plus 162.5 basis points per annum.

In September 2021, Cheniere Partners issued \$1.2 billion of 3.25% Senior Notes due 2032 (the “2032 CQP Senior Notes”). Net proceeds from the 2032 CQP Senior Notes were used to redeem a portion of the outstanding \$1.1 billion aggregate principal amount of the 5.625% Senior Notes due 2026 (the “2026 CQP Senior Notes”) in September 2021 pursuant to a tender offer and consent solicitation. In October 2021, the remaining net proceeds from the 2032 CQP Senior Notes were used to redeem the remaining outstanding aggregate principal amount of the 2026 CQP Senior Notes and, together with cash on hand, redeem \$318 million of the 6.25% Senior Secured Notes due 2022 (the “2022 SPL Senior Notes”).

In August 2021, CCH issued \$750 million of fully amortizing 2.742% Senior Secured Notes due 2039 (the “2.742% CCH Senior Secured Notes”). Net proceeds from the 2.742% CCH Senior Secured Notes were used to prepay a portion of the principal amount outstanding under CCH’s amended and restated credit facility due 2024.

During 2021, SPL entered into a series of note purchase agreements for the sale of approximately \$482 million aggregate principal amount of Senior Secured Notes due 2037, on a private placement basis (the “2037 SPL Private Placement Senior Secured Notes”). The 2037 SPL Private Placement Senior Secured Notes are expected to be issued in the fourth quarter of 2021, subject to customary closing conditions, and the net proceeds will be used to redeem a portion of the 2022 SPL Senior Notes. The 2037 SPL Private Placement Senior Secured Notes will be fully amortizing, with a weighted average life of over 10 years and a weighted average interest rate of 3.07%.

Consolidated Adjusted EBITDA is not intended to represent cash flows from operations or net income (loss) as defined by U.S. GAAP and is not necessarily comparable to similarly titled measures reported by other companies.

We believe Consolidated Adjusted EBITDA provides relevant and useful information to management, investors and other users of our financial information in evaluating the effectiveness of our operating performance in a manner that is consistent with management's evaluation of financial and operating performance.

Consolidated Adjusted EBITDA is calculated by taking net income (loss) attributable to common stockholders before net income (loss) attributable to non-controlling interest, interest expense, net of capitalized interest, changes in the fair value and settlement of our interest rate derivatives, taxes, depreciation and amortization, and adjusting for the effects of certain non-cash items, other non-operating income or expense items, and other items not otherwise predictive or indicative of ongoing operating performance, including the effects of modification or extinguishment of debt, impairment expense and loss on disposal of assets, changes in the fair value of our commodity and FX derivatives prior to contractual delivery or termination, non-cash compensation expense, and non-recurring costs related to our response to the COVID-19 outbreak which are incremental to and separable from normal operations. The change in fair value of commodity and FX derivatives is considered in determining Consolidated Adjusted EBITDA given that the timing of recognizing gains and losses on these derivative contracts differs from the recognition of the related item economically hedged. We believe the exclusion of these items enables investors and other users of our financial information to assess our sequential and year-over-year performance and operating trends on a more comparable basis and is consistent with management's own evaluation of performance.

Distributable Cash Flow, in 2021 and all prior periods, is defined as cash received, or expected to be received, from Cheniere's ownership and interests in Cheniere Partners, cash received (used) by CCH and Cheniere's integrated marketing function (other than cash for capital expenditures) less interest, taxes and maintenance capital expenditures associated with Cheniere and not the underlying entities. Management uses this measure and believes it provides users of our financial statements a useful measure reflective of our business's ability to generate cash earnings to supplement the comparable GAAP measure.

Beginning with our 2022 financial guidance, we have adopted a revised definition for Distributable Cash Flow, which aims to more accurately reflect the consolidated distributable cash flow of each of our subsidiaries, including Cheniere Partners. The revised definition reflects the distributable cash flow of Cheniere Partners before the impacts from capital allocation, less amounts attributable to minority interests. There is no change to our run-rate distributable cash flow guidance as a result of this definition change.

Distributable Cash Flow for 2022 and going forward is defined as cash generated from the operations of Cheniere and its subsidiaries and adjusted for non-controlling interest. The Distributable Cash Flow of Cheniere's subsidiaries is calculated by taking the subsidiaries' EBITDA less interest expense, net of capitalized interest, interest rate derivatives, taxes, maintenance capital expenditures and other non-operating income or expense items, and adjusting for the effect of certain non-cash items and other items not otherwise predictive or indicative of ongoing operating performance, including the effects of modification or extinguishment of debt, amortization of debt issue costs, premiums or discounts, changes in fair value of interest rate derivatives, impairment of equity method investment and deferred taxes. Cheniere's Distributable Cash Flow includes 100% of the Distributable Cash Flow of Cheniere's wholly-owned subsidiaries. For subsidiaries with non-controlling investors, our share of Distributable Cash Flow is calculated as the Distributable Cash Flow of the subsidiary reduced by the economic interest of the non-controlling investors as if 100% of the Distributable Cash Flow were distributed in order to reflect our ownership interests and our incentive distribution rights, if applicable. The Distributable Cash Flow attributable to non-controlling interest is calculated in the same method as Distributions to non-controlling interest as presented on Statements of Stockholders' Equity. This amount may differ from the actual distributions paid to non-controlling investors by the subsidiary for a particular period.

We believe Distributable Cash Flow is a useful performance measure for management, investors and other users of our financial information to evaluate our performance and to measure and estimate the ability of our assets to generate cash earnings after servicing our debt, paying cash taxes and expending sustaining capital, that could be used for discretionary purposes such as common stock dividends, stock repurchases, retirement of debt, or expansion capital expenditures. Distributable Cash Flow is not intended to represent cash flows from operations or net income (loss) as defined by U.S. GAAP and is not necessarily comparable to similarly titled measures reported by other companies.
