UiPath Recognized as an RPA Leader by Independent Research Firm

Results rank UiPath highest in Current Offering, Strategy, and Market Presence categories in independent analyst report

NEW YORK--(BUSINESS WIRE)-- Leading [enterprise automation](#) software company, UiPath, today announced it has been named a Leader in The Forrester Wave™: Robotic Process Automation, Q1 2021*. Among the 14 vendors evaluated, UiPath earned the highest ranking in each of three categories: Current Offering, Strategy, and Market Presence. The Company also received the highest possible scores in the criteria of product vision; performance; supporting products and services; partner ecosystem; delivery model; enterprise RPA customers; enterprise customers; and product revenue.

The report noted that UiPath has "invested heavily in expanding its range of products to maximize the value that automation brings its customers." It went on to say that UiPath "offers an enterprise-grade and innovative RPA solution augmented by a large ecosystem of partners, making it a good fit for large, global enterprises with demanding needs for support, and governance."

According to the report, "…process mining features, collaborative discovery, assessment tools, and graphical visualizations provide all you need to analyze and track automation ROI and its realization." It noted that "the UiPath Marketplace, shared with Microsoft, Salesforce, Workday, and others, includes over 1,000 reusable components. Embedded AI functionalities classify and extract data from unstructured, semi-structured, and structured documents and reliably scan at high speed…Security, access control, and authentication features are state-of-the-art. The open platform integrates easily with enterprise applications like Google Workplace, Microsoft Office, Oracle, Salesforce, ServiceNow, and Workday."

The Wave examined the rapidly maturing RPA market. To assess and recognize the vendors driving the advancement of RPA, this year's evaluation includes criteria such as bot design and development; bot deployment, management, and analytics; bot governance, platform model, and security; and supporting products and services. Participant evaluations were based on a comprehensive set of 25 evaluation criteria, grouped into three categories: Current Offering, Strategy and Market Presence. As part of Forrester's rigorous review process, the firm also analyzed vendor surveys, conducted customer reference surveys, participated in product demos and examined expert interviews.

"Adoption of RPA continues to grow, and we're seeing significant demand from organizations around the world for our end-to-end Automation Platform and team of experts," said Daniel Dines, UiPath Co-Founder and CEO. "It's rewarding to be recognized by Forrester as a Leader in RPA, as we believe that it validates all the hard work our UiPath team puts into our organization, customers, and partners."
