Sutro Biopharma to Present at 21st Annual Future Leaders in the Biotech Industry Conference

SAN FRANCISCO, March 24, 2014 /PRNewswire/ -- Sutro Biopharma, a biopharmaceutical company developing a new generation of protein therapeutics, including next-generation antibody drug conjugates and bispecific antibodies, today announced that it will present at the 21st Annual Future Leaders in the Biotech Industry Conference taking place on March 28, 2014, at the Millennium Broadway Hotel & Conference Center in New York City.

William J. Newell, chief executive officer of Sutro, will present a corporate overview and business update.

Date: Friday, March 28, 2014

Time: 11:30 a.m. EDT

Location: Millennium Broadway Hotel & Conference Center, New York City

About Sutro Biopharma

Sutro Biopharma, located in South San Francisco, is developing a new generation of antibody drug conjugate therapeutics and bifunctional antibody-based therapeutics for targeted cancer therapies. These therapeutics will significantly extend the clinical impact of current oncology therapeutic approaches and are beyond what can be envisioned with current, cell-based expression technologies. Sutro's biochemical synthesis technology, which underpins these therapeutics, allows the rapid and systematic exploration of many protein drug variants to identify drug candidates. Once the product candidates are identified, production can be rapidly and predictably scaled up to commercial levels. Sutro has established a Good Manufacturing Practice (cGMP) facility for the production of clinical supplies of materials using its biochemical protein synthesis platform. Sutro has formed multiple partnerships with biopharma companies utilizing its technology, including a collaboration with Celgene Corporation to design and develop novel antibody drug conjugates and bispecific antibodies as well as to manufacture a proprietary Celgene antibody.
