- Second quarter net sales of \$81.3 million were down 9.0% year-over-year
- Net loss of \$0.2 million attributable to common shareholders, or \$0.01 per diluted common share during the second quarter
- Second quarter Adjusted EBITDA of \$3.1 million

LEHI, Utah, Aug. 08, 2017 (GLOBE NEWSWIRE) -- Nature's Sunshine Products, Inc. (NASDAQ:NATR), a leading natural health and wellness company engaged in the manufacture and direct selling of nutritional and personal care products, today reported its financial results for the second quarter ended June 30, 2017.

Management Commentary

"Second quarter financial results were negatively impacted by disruptions associated with the implementation of the Company's Oracle ERP system and the incremental costs of the system, as well as continued pressure in Korea," commented Gregory L. Probert, Chairman and Chief Executive Officer. "The ERP implementation primarily impacted sales in North America and we are working to address the issues. While we are disappointed that sales and profits have been impacted during the initial phase of implementation, I am confident that the long-term benefits of the enhanced ERP system will be evident over the coming years. In Korea, the combination of geopolitical and economic challenges and lower distributor engagement have impacted business activity. We are focused on activities to enhance distributor engagement and improve sales trends."

Mr. Probert continued, "We are pleased with the sequential growth in China during the second quarter. Following the receipt of our China direct selling license in May, we progressed through the initial steps following licensure and saw a positive impact on our sales. While it remains early in the process, we are now in a position to expand our sales efforts and look for further sequential growth as our direct selling efforts build in this key growth market. As we expand our efforts in China, we will focus on re-energizing NSP Americas revenue following the disruption encountered during the second quarter and work to enhance distributor business activity in Korea."

Second Quarter 2017 Financial Highlights

 Net sales of \$81.3 million decreased 9.0% compared to \$89.4 million in the second quarter of 2016. On a local currency basis, net sales decreased 8.9% as compared to the second quarter of 2016. NSP Russia, Central and Eastern Europe net sales increased approximately 6.3 percent compared to the same period in 2016. NSP Americas net sales decreased approximately 11.9 percent compared to the same period in 2016 (or 11.5 percent in local currencies). Synergy WorldWide net sales decreased approximately 8.0 percent compared to the same period in 2016 (or 8.2 percent in local currencies). China and New Markets net sales decreased approximately 8.6 percent compared to the same period in 2016. Net sales were impacted by \$0.1 million of unfavorable foreign currency exchange rate fluctuations.

The Company began the initial implementation of its Oracle ERP system on April 2, 2017, for the Company's NSP Americas segment as well other corporate operations. The implementation of Oracle ERP negatively impacted net sales and profitability during the second quarter of 2017, primarily by causing wait times for calls into the Company's call center to be longer than usual and by causing difficulties within the Company's on-line product ordering system. The Company is addressing these issues and other issues relating to the implementation of the Oracle ERP system may continue to negatively impact net sales and profitability throughout the remainder of 2017.

In the second quarter of 2016, the Company began making pre-opening product sales through Hong Kong while awaiting its direct selling license in China. During the second quarter of 2017, the Company received its direct selling license in China, which allows the Company to expand its business scope in China to include direct selling activities.

- Net loss attributable to common shareholders was \$0.2 million, or \$0.01 per diluted common share, compared to net income of \$2.6 million attributable to common shareholders, or \$0.14 per diluted common share, in the second quarter of 2016.
- The Company's net loss in China attributable to common shareholders was approximately \$0.06 per share.

• Adjusted EBITDA was \$3.1 million, compared to \$6.2 million in the second quarter of 2016. Adjusted EBITDA, which is a non-GAAP financial measure, is defined here as net income/loss from continuing operations before income taxes, depreciation, amortization, share-based compensation expense and other income/loss.

First Six Months of 2017 Financial Highlights

- Net sales of \$164.4 million decreased 4.3%, compared to \$171.8 million in 2016. On a local currency basis, net sales decreased 4.4% compared to 2016. NSP Russia, Central and Eastern Europe net sales increased approximately 13.1 percent compared to the same period in 2016. China and New Markets net sales increased approximately 32.2 percent compared to the same period in 2016. Synergy WorldWide net sales decreased approximately 8.2 percent compared to the same period in 2016 (or 8.9 percent in local currencies). A modest overall weakening of the U.S. dollar versus local currencies resulted in an approximate 0.2 percent or \$0.3 million increase of its net sales during the quarter.
- Net income attributable to common shareholders was \$2.0 million, or \$0.10 per diluted common share, compared to \$4.6 million, or \$0.24 per diluted common share, in 2016.
- The Company's net loss in China attributable to common shareholders was approximately \$0.14 per share.
- Adjusted EBITDA was \$7.4 million compared to \$10.4 million in 2016.

Non-GAAP Financial Measures

The Company has included information which has not been prepared in accordance with generally accepted accounting principles (GAAP), such as information concerning Adjusted EBITDA and net sales excluding the impact of foreign currency exchange fluctuations. Management utilizes the non-GAAP measure Adjusted EBITDA in the evaluation of its operations and believes that this measure is a useful indicator of the Company's ability to fund its business. This non-GAAP financial measure should not be considered as an alternative to, or more meaningful than, U.S. GAAP net income (loss) as an indicator of the Company's operating performance. Moreover, Adjusted EBITDA, as presented by the Company, may not be comparable to similarly titled measures reported by other companies.

In addition, the Company believes presenting the impact of foreign currency fluctuations is useful to investors because it allows a more meaningful comparison of net sales of its foreign operations from period to period. Net sales excluding the impact of foreign currency fluctuations should not be considered in isolation or as an alternative to net sales in U.S. dollar measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.

Other companies may use the same or similarly named measures, but exclude different items, which may not provide investors with a comparable view of Nature's Sunshine Products' performance in relation to other companies. The Company has included a reconciliation of Adjusted EBITDA to net income (loss), the most comparable GAAP measure, in the attached financial tables.
