Titan Pharmaceuticals To Present At 29th Annual ROTH Conference

SOUTH SAN FRANCISCO, Calif., March 7, 2017 /PRNewswire/ --Titan Pharmaceuticals, Inc. (NASDAQ: TTNP), a pharmaceutical company developing proprietary therapeutics for the treatment of select chronic diseases utilizing its ProNeura™ long-term, continuous drug delivery technology, announced today that Titan President and CEO Sunil Bhonsle will present at the 29th annual ROTH Conference on Monday, March 13 at 3:30 p.m. at The Ritz-Carlton in Laguna Niguel, Calif.

Mr. Bhonsle will review the company's ongoing ProNeura-based product development programs and also provide an update on Probuphine®, which was approved by the U.S. Food and Drug Administration in May 2016 for the maintenance treatment of opioid addiction. The presentation will be available as a live and archived webcast at http://wsw.com/webcast/roth31/ttnp. The replay will be available for 90 days following the live broadcast. Interested parties may also access the webcast from the Titan website at www.titanpharm.com.

About Titan Pharmaceuticals
Titan Pharmaceuticals Inc. (NASDAQ: TTNP), based in South San Francisco, CA, is developing proprietary therapeutics primarily for the treatment of serious medical disorders. The company's lead product is Probuphine®, a novel and long-acting formulation of buprenorphine for the long-term maintenance treatment of opioid dependence. Probuphine employs Titan's proprietary drug delivery system ProNeura™, which is capable of delivering sustained, consistent levels of medication for three months or longer. Titan has granted commercial rights in the U.S. and Canada for Probuphine to Braeburn Pharmaceuticals. Approved by the U.S. Food and Drug Administration in May 2016, Probuphine is the first and only commercialized treatment of opioid dependence to provide continuous, around-the-clock blood levels of buprenorphine for six months following a single procedure. The ProNeura technology has the potential to be used in developing products for treating other chronic conditions such as Parkinson's disease and hypothyroidism, where maintaining consistent, around-the-clock blood levels of medication may benefit the patient and improve medical outcomes.
