Titan Announces Upcoming TP-2021 Implant Data Presentation at Neuroscience 2021

SOUTH SAN FRANCISCO, Calif., Nov. 5, 2021 /PRNewswire/ -- Titan Pharmaceuticals, Inc. announced that data from continuing studies of its ProNeura®-based TP-2021 implant in an established animal model of chronic pruritus will be presented at the Society for Neuroscience 2021 Meeting, being held virtually, on November 8.

About Chronic Pruritus

Chronic pruritus is an unpleasant and often debilitating condition, resulting in the need to scratch that lasts more than 6 weeks. It is a prevalent and potentially debilitating symptom associated with both cutaneous and systemic conditions. Due to its complex pathogenesis and numerous contributing factors, effective treatment of chronic pruritus therapy remains challenging.

About Titan Pharmaceuticals

Titan Pharmaceuticals, Inc. (NASDAQ: TTNP), based in South San Francisco, CA, is a development stage company developing proprietary therapeutics with its ProNeura® long-term, continuous drug delivery technology. The ProNeura technology has the potential to be used in developing products for treating a number of chronic conditions, where maintaining consistent, around-the-clock blood levels of medication may benefit the patient and improve medical outcomes.
