## **Excision BioTherapeutics to Participate in the Jefferies Healthcare Conference on Thursday, June 9, 2022 at 2:00 p.m. ET**

SAN FRANCISCO, June 07, 2022 (GLOBE NEWSWIRE) -- Excision BioTherapeutics Inc., a biotechnology company developing CRISPR-based therapies intended to cure viral infectious diseases, today announced that company management is scheduled to present at the Jefferies Healthcare Conference on Thursday, June 9, 2022 at 2:00 p.m. Eastern Time in New York City, NY.

A live webcast of the presentation will be available on the Investors section of the Excision website under "News" at <https://www.excision.bio/press>. The webcast will be archived for 60 days.

### **About Excision BioTherapeutics, Inc.**

Excision BioTherapeutics, Inc. is a biotechnology company developing CRISPR-based therapies as potential cures for viral infectious diseases. Excision unites next-generation CRISPR nucleases with a novel gene editing approach and has become the first and only company in history to cure HIV with a therapeutic in an animal model. EBT-101, the company's lead program intended to cure HIV with a single IV infusion, is being evaluated in clinical trials. Excision's pipeline includes one-time potential cures for Herpes Virus, JC Virus, which causes PML, and Hepatitis B virus. The Company's foundational technologies were developed in the laboratories of Dr. Kamel Khalili at Temple University and Dr. Jennifer Doudna at the University of California, Berkeley.
