# UiPath Named a Leader in ISG Provider Lens™ Next-Gen ADM Solutions 2022 report for Low-Code/No-Code Development Platforms

*Industry analyst firm cites UiPath unified platform value proposition, its developer community, and its comprehensive features as key differentiators*

NEW YORK--(BUSINESS WIRE)-- UiPath (NYSE: PATH), a leading [enterprise automation](#) software company, today announced it has been named a Leader in the [ISG Provider Lens™ Next-Gen ADM Solutions 2022 – Low-Code/No-Code Development Platforms report](#). The report recognizes UiPath as an innovation leader at the convergence of enterprise automation and low-code application development, and notes that “UiPath Apps is a top choice for customers looking to rapidly develop automation-powered applications.”

[UiPath Apps](#) enables both professional and citizen developers to create custom user experiences, unify data from disparate sources, and drive consumption of automation. The ISG Provider Lens 2022 report states, “UiPath Apps is a low-code offering to create customized UX-focused applications...Automation permeates every facet of application development, allowing both professional and citizen developers to automate tasks through bots and digital assistants.”

UiPath Apps, available on the industry’s only end-to-end business automation platform, allows customers to engage the full breadth of automation to achieve transformational business outcomes. In addition, [UiPath Test Suite](#) makes it simple to automate testing for software, automation, and quality assurance teams.

The report continues, “UiPath’s low-code apps offering is an extension of its already successful and proven automation suite. Therefore, enterprises seeking transformation through automation are better suited to opt for UiPath Apps to realize its actual value.”

“Automation is a powerful engine for developers who are building applications that propel businesses to achieve results,” said Ted Kummert, Executive Vice President, Products & Engineering at UiPath. “We are excited to receive recognition as a Leader in the ISG Provider Lens report because we believe that our low-code apps deliver the most engaging experiences powered by automation. The automations that connect with our apps have the full power of the UiPath Platform behind them, and work across the widest possible set of applications and data sources to get work done.”

The UiPath Business Automation Platform is an easy-to-use, scalable, and open platform that allows everyone – from RPA developers and testers to citizen developers and business

end users – to collaborate and position automation squarely at the core of everyday work. UiPath offers capabilities that support every phase of the automation lifecycle and deployment options that give organizations immediate management of their software robots.

UiPath is scheduled to release new features to customers beginning Oct. 31, 2022, to further enable developers to create next-gen business apps. With UiPath Studio Web, a browser-based automation development tool, the power of automation creation will become available to cross-platform users and make it easy to distribute automation at scale in an organization. The planned release will include new capabilities to simplify the creation of public-facing processes and apps for customer service and value chain scenarios to streamline customer experiences. In addition, UiPath offers a Connection Builder to simplify API connection to both in-house applications and specialized industry solutions and greatly expand the automations and apps developers can build.
