Use of Non-GAAP Financial Information

EBITDA and Adjusted EBITDA are non-GAAP financial measures commonly used in our industry and should not be construed in isolation as substitutions to net income (loss) as indicators of operating performance or as alternatives to cash flow provided by operating activities as a measure of liquidity (each as determined in accordance with GAAP). GrowGeneration defines EBITDA as net income (loss) before interest income, interest expense, income tax expense, depreciation and amortization, and Adjusted EBITDA as further adjusted to exclude certain items such as stock-based compensation, impairment losses, restructuring and corporate rationalization costs, and other non-core or non-recurring expenses and to include income from our marketable securities as these investments are part of our operational business strategy and increase the cash available to us. We believe these non-GAAP measures, when used in conjunction with net income (loss), provide meaningful supplemental information to both management and investors, facilitating the evaluation of performance across reporting periods. Management uses these non-GAAP measures for internal planning and reporting purposes. These non-GAAP measures are not in accordance with, or an alternative for, generally accepted accounting principles and may be different from non-GAAP measures used by other companies. We believe that these non-GAAP financial measures may be useful to investors in their assessment of our operating performance and valuation. In addition, these non-GAAP financial measures address questions routinely received from analysts and investors and, in order to ensure that all investors have access to the same data, we have determined that it is appropriate to make this data available to all investors.

Why GrowGen, Why Now: Three Catalysts Converging in 2026

01 Cannabis Rescheduling Catalyst

- DEA Schedule III reclassification removes 280E tax burden
- Frees ~\$100M+ in annual capital across top MSOs
- MSO capex restarts → cultivation expansion → GrowGen Build™
- State-level legalization momentum continues (20+ states adult-use)
- GrowGen has existing MSO relationships: Verano, GTI, Trulieve, Ascend, Curio Wellness

GrowGen is pre-positioned with the largest cultivators before the restart.

02 CEA Market Secular Tailwind

- U.S. greenhouse produce growing ~8–10% annually
- Food security + reshoring driving domestic indoor ag investment
- Arett Sales partnership: instant access to 1,000s of IGC doors in 32 states
- TheHarvestCo.com re-launch targets home + specialty growers
- Char Coir distribution expanding into greenhouse produce accounts

This market grows regardless of cannabis policy — pure tailwind.

03 GrowGen's Cost Structure Is Now Right-Sized

- 23.4% OpEx reduction in Q1 2026 — \$27M taken out permanently in 2025
- 19 stores: profitable footprint, no more restructuring charges
- \$41.1M cash, zero debt — 3+ years of operating runway
- PL mix at 37% and accelerating — margin engine is running
- Q1 2026 revenue up YoY with 12 fewer stores — stabilization confirmed

Lean, funded, and positioned — GrowGen doesn't need the market to recover to win.

GrowGen has spent three years right-sizing for this moment. The setup — cost structure, brand platform, and market catalysts — is now aligned.
