Veritone to Showcase AI Solutions for Law Enforcement at the 2024 International Association of Chiefs of Police Conference

AI leader to educate conference attendees about solutions to streamline investigations, drive operational efficiency and enhance public trust

DENVER--(BUSINESS WIRE)-- [Veritone, Inc](). (NASDAQ: VERI), a leader in building human-centered enterprise AI solutions, today announced its participation at the International Association of Chiefs of Police from October 19 to 22 in Boston. At its booth (2201) at the Boston Convention and Exhibition Center, Veritone will showcase AI solutions that help public safety agencies accelerate investigations, increase case clearance rates, and enhance public trust, transparency and operational efficiency.

"Public safety agencies are under increasing pressure to do more with less," said Jon Gacek, general manager, Public Sector, Veritone. "At IACP we are eager to demonstrate how our AI-powered solutions, like our Intelligent Digital Evidence Management System, can help agencies automate and accelerate their workflows, increase case clearance rates and enhance trust and transparency with the public."

Visitors to the Veritone booth can experience demonstrations and learn about Veritone's solutions, including:

- **Intelligent Digital Evidence Management System (iDEMS):** Veritone's iDEMS is a Criminal Justice Information Services (CJIS)-compliant solution that consolidates digital evidence across sources in a secure cloud environment. The suite of solutions includes redaction, transcription, translation, facial recognition, object detection and text recognition capabilities, saving agencies time and resources, and ultimately enabling them to build stronger cases faster.
- **AI-Powered Investigations:** Veritone Illuminate allows investigative teams to search, analyze and explore large amounts of video, audio and text evidence while maintaining original formats. Illuminate helps agencies process data more efficiently, delivering faster results for investigations.
- **Redaction and Privacy Protection Tools:** Veritone Redact offers automated redaction of audio and video files, ensuring sensitive information, such as personally identifiable information (PII), is protected. It supports all common camera, video and audio formats and is hosted in AWS GovCloud or Microsoft Azure Government, ensuring CJIS compliance.
- **Person and Vehicle Tracking with AI:** Veritone Track uses advanced AI to enable law enforcement agencies to track persons of interest and vehicles across multiple video sources to help piece together the timeline of an event and improve case clearance rates.
- **Advanced Transcription and Translation Services:** Veritone's solutions offer

transcription in over 62 native languages and translation in more than 115 languages, significantly reducing time and cost and increasing accuracy in multilingual investigations.

- **Suspect Identification:** Veritone IDentify enables law enforcement to match video and photographic evidence with known offender databases to help identify suspects quickly and ensure compliance with privacy laws.
- **Stop Data Collection with Veritone Contact:** Veritone Contact simplifies the collection and analysis of stop data to help agencies comply with legal requirements, such as California's AB 953. The tool ensures quick and accurate gathering of demographic and detailed stop information.
- **HR & Talent Acquisition:** Veritone also supports law enforcement agencies with an AI-powered recruitment tool that helps agencies source and hire the best talent by automating job postings and optimizing candidate searches.
