**Qualcomm Announces Agreement with Apple for Chip Supply**

Qualcomm Technologies, Inc. to supply Snapdragon® 5G Modem-RF Systems for smartphone launches in 2024, 2025 and 2026

Terms and conditions similar to previous agreement

**Long-term Financial Planning Assumption**

20 percent share of chipset supply for the smartphone launch in 2026

**Patent Licensing**

The global patent license agreement, effective as of April 2019, remains unchanged

Direct license between Apple and Qualcomm Incorporated: six-year term, with two-year option to extend

---

Reinforces Qualcomm’s track record of sustained leadership across 5G technologies and products
Note Regarding Forward-Looking Statements

In addition to historical information, this presentation contains forward-looking statements that are inherently subject to risks and uncertainties, including but not limited to statements regarding our chipset supply agreement with Apple and the anticipated dollar value thereof, and our long-term financial planning assumption of a 25 percent share of supply for the phone launch in 2026. Forward-looking statements are generally identified by words such as “estimates,” “guidance,” “expects,” “anticipates,” “intends,” “plans,” “believes,” “seeks” and similar expressions. Actual results may differ materially from those referred to in the forward-looking statements due to a number of important factors, including but not limited to: Apple’s product cycles, the timing of Apple’s phone launches and the volume of Apple products sold; our dependence on a small number of customers and licensees, and particularly from their sale of premium-tier devices; our customers (including but not limited to Apple) vertically integrating; a significant portion of our business being concentrated in China, which is exacerbated by U.S./China trade and national security tensions; our ability to extend our technologies and products into new and expanded product areas, and industries and applications beyond mobile handsets; our strategic acquisitions, transactions and investments, and our ability to consummate strategic acquisitions; our dependence on a limited number of third-party suppliers; risks associated with the operation and control of our manufacturing facilities; security breaches of our information technology systems, or other misappropriation of our technology, intellectual property or other proprietary or confidential information; our ability to attract and retain qualified employees, and recent changes to our hybrid work model; the continued and future success of our licensing programs, which requires us to continue to evolve our patent portfolio and to renew or renegotiate license agreements that are expiring; efforts by some OEMs to avoid paying fair and reasonable royalties for the use of our intellectual property, and other attacks on our licensing business model; potential changes in our patent licensing practices, whether due to governmental investigations, legal challenges or otherwise; adverse rulings in governmental investigations or proceedings or other legal proceedings; our customers’ and licensees’ sales of products and services based on CDMA, OFDMA and other communications technologies, including 5G, and our customers’ demand for our products based on these technologies; competition in an environment of rapid technological change, and our ability to adapt to such change and compete effectively; failures in our products or in the products of our customers or licensees, including those resulting from security vulnerabilities, defects or errors; difficulties in enforcing and protecting our intellectual property rights; claims by third parties that we infringe their intellectual property; our use of open source software, impacts of the COVID-19 pandemic, or any similar health crisis that may arise in the future, and government policies and other measures adopted in response thereto; the cyclical nature of the semiconductor industry, declines in global, regional or local economic conditions, or our stock price and earnings volatility; our ability to comply with laws, regulations, policies and standards; our indebtedness; and potential tax liabilities. These and other risks are set forth in our Quarterly Report on Form 10-Q for the fiscal quarter ended June 25, 2023 filed with the Securities and Exchange Commission (SEC). Our reports filed with the SEC are available on our website at [www.qualcomm.com](http://www.qualcomm.com). We undertake no obligation to update, or continue to provide information with respect to, any forward-looking statement or risk factor, whether as a result of new information, future events or otherwise.
