Helios Technologies Launches First Ever CAN Keypad Product in New Select Series Line

SARASOTA, Fla.--(BUSINESS WIRE)-- Helios Technologies, Inc. (NYSE: HLIO) (“Helios” or the “Company”), a global leader in highly engineered motion control and electronic controls technology, is proud to unveil the SK51, the debut model in the all-new Select Keypad Series of rugged, programmable CAN Keypads. Engineered and built by Enovation Controls, part of Helios’ Electronics segment, the SK51 is built to deliver smart switching, seamless integration, and rugged control for virtually any CAN-based application or even a pre-existing display.

This press release features multimedia. View the full release here: https://www.businesswire.com/news/home/20250428648174/en/

CAN Keypads SK51

Compact and durable, the SK51 features a five-button layout with tactile silicone buttons and crisp LED backlighting, with optional button customization available for those looking to tailor the keypad to specific preferences. Each button is fully programmable with 24-bit RGB color options, giving operators complete control over appearance, brightness, and flash behavior. With its IP67-rated sealed front and high-impact ABS housing, the SK51 performs reliably in the harshest environments. Later this year, additional models are planned for launch with more buttons to provide even more control and optionality.

“Entering the CAN Keypad space demonstrates our commitment to having a sharper focus on accelerating the cadence on high value, new product launches this year. The SK51 is compact, configurable, and up for any challenge, meeting the demands of the environments our customers and their applications operate in. This product innovation stems from customer-driven insights integrated into our product development process, enabling us to deliver a broader portfolio of system solutions and strengthen our position as the preferred supplier for our customers,” said Sean Bagan, President, Chief Executive Officer and Chief Financial Officer of Helios.

As the first in the Select Series, the SK51 represents the start of a powerful new platform from Enovation Controls. It enhances operator experience, while adapting to their required functions and form providing durability and control without compromise. The easy add on capability enables it to instantly enhance our customer’s electronics solutions creating immediate value for the end user.

“Our team set out to develop a keypad that delivers professional-grade functionality in a sleek, and value-driven form factor,” said Billy Aldridge, SVP, Managing Director –

Electronics Segment. “The SK51 hits the mark, giving OEMs and system designers an intuitive and dependable input and programmable control solution that looks as good as it performs.”

About Enovation Controls

Enovation Controls is a fast-growing and innovative manufacturer of electronic controls and displays for diverse markets. As an international leader in fully tailored solutions, Enovation Controls offers a broad range of displays, controls, and instrumentation products for various applications. With an internationally diverse team, we serve customers around the world through our global sales, manufacturing, and engineering operations. Enovation Controls partners directly with OEMs and supports a worldwide network of authorized distributors and system integrators. Visit us at www.enovationcontrols.com and follow us on LinkedIn.
