Disclosure Regarding Forward-Looking Statements

HILLENBRAND

Throughout this presentation, we make a number of “forward-looking statements” that are within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995, and that are intended to be covered by the safe harbor provided under these sections. As the words imply, these are statements about future sales, earnings, cash flow, results of operations, uses of cash, financings, share repurchases, ability to meet deleveraging goals, and other measures of financial performance or potential future plans or events, strategies, objectives, beliefs, prospects, assumptions, expectations, and projected costs or savings or transactions of the Company that might or might not happen in the future, as contrasted with historical information. Forward-looking statements are based on assumptions that we believe are reasonable, but by their very nature are subject to a wide range of risks. If our assumptions prove inaccurate or unknown risks and uncertainties materialize, actual results could vary materially from Hillenbrand’s (the “Company”) expectations and projections. Words that could indicate that we are making forward-looking statements include the following:

intend	believe	plan	expect	may	goal	would	project
become	pursue	estimate	will	forecast	continue	could	anticipate
target	encourage	promise	improve	progress	potential	should	impact

This is not an exhaustive list but is intended to give you an idea of how we try to identify forward-looking statements. The absence of any of these words, however, does not mean that the statement is not forward-looking.

Here is the key point: *Forward-looking statements are not guarantees of future performance or events, and actual results or events could differ materially from those set forth in any forward-looking statements.* Any number of factors, many of which are beyond our control, could cause our performance to differ significantly from what is described in the forward-looking statements. These factors include, but are not limited to: risks related to the Russian Federation’s invasion of Ukraine (referred to herein as the “Ukraine War”) and resulting geopolitical instability and uncertainty, which could have a negative impact on our ability to sell to, ship products to, collect payments from, and support customers in certain regions, in addition to the potential effect of supply chain disruptions that could adversely affect profitability; the impact of contagious diseases such as the COVID-19 pandemic and the escalation thereof due to variant strains of the virus and the societal, governmental, and individual responses thereto, including supply chain disruption, loss of contracts and/or customers, erosion of some customers' credit quality, downgrades of the Company's credit quality, closure or temporary interruption of the Company's or suppliers' manufacturing facilities, travel, shipping and logistical disruptions, domestic and international general economic conditions, such as inflation, exchange rates and interest rates; loss of human capital or personnel, and general economic calamities; increased costs, poor quality, or unavailability of raw materials or certain outsourced services and supply chain disruptions; increasing competition for highly skilled and talented workers as well as labor shortages; the risk of business disruptions associated with information technology, cyber-attacks, or catastrophic losses affecting infrastructure; risks that the integration of Milacron disrupts current operations or poses potential difficulties in employee retention or otherwise affects financial or operating results; the ability to recognize the benefits of the acquisition of Milacron or any other acquisition or disposition, including potential synergies and cost savings or the failure of the Company or any acquired company to achieve its plans and objectives generally; impairment charges to goodwill and other identifiable intangible assets; competition in the industries in which we operate, including on price or from nontraditional sources in the death care industry; impacts of decreases in demand or changes in technological advances, laws, or regulation on the revenues that we derive from the plastics industry; our reliance upon employees, agents, and business partners to comply with laws in many countries and jurisdictions; the impact of incurring significant amounts of indebtedness and any inability of the Company to respond to changes in its business or make future desirable acquisitions; the ability of the Company to comply with financial or other covenants in its debt agreements; global market and economic conditions, including those related to the financial markets; our level of international sales and operations; cyclical demand for industrial capital goods; continued fluctuations in mortality rates and increased cremations; the dependence of our business units on relationships with several large customers and providers; competition faced by our Batesville business from non-traditional sources; the impact to the Company's effective tax rate of changes in the mix of earnings or tax laws and certain other tax-related matters; involvement in claims, lawsuits and governmental proceedings related to operations; uncertainty in the United States political and regulatory environment or global trade policy; adverse foreign currency fluctuations; labor disruptions; and the effect of certain provisions of the Company's governing documents and Indiana law that could decrease the trading price of the Company's common stock. Shareholders, potential investors, and other readers are urged to consider these risks and uncertainties in evaluating forward-looking statements and are cautioned not to place undue reliance on the forward-looking statements. For a more in-depth discussion of these and other factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading “Risk Factors” in Part I, Item 1A of Hillenbrand’s Form 10-K for the year ended September 30, 2021, filed with the Securities and Exchange Commission ("SEC") on November 17, 2021, and in Part II, Item 1A of Hillenbrand’s Form 10-Q for the quarter ended March 31, 2022, filed with the SEC on May 9, 2022. The forward-looking information in this release speaks only as of the date hereof, and we assume no obligation to update or revise any forward-looking information.

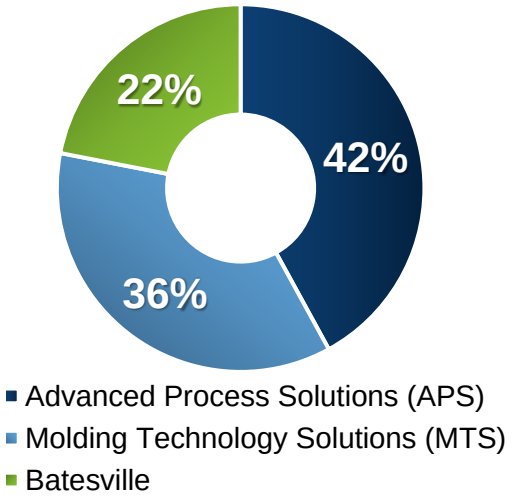
Hillenbrand Snapshot (NYSE: HI)

HILLENBRAND

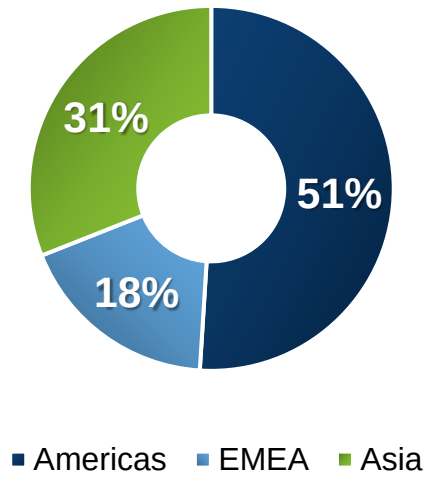
Global Industrial Company that Engineers, Manufactures, and Sells Products and Services into a Variety of End Markets

Founding Year	**1906**
Headquarters	**Batesville, IN**
Employees[1,2]	**~10,500**
Locations[1,2]	**40+**
PF Revenue[1]	**$2.8B**
PF Adj. EBITDA Margin[1]	**19.1%**

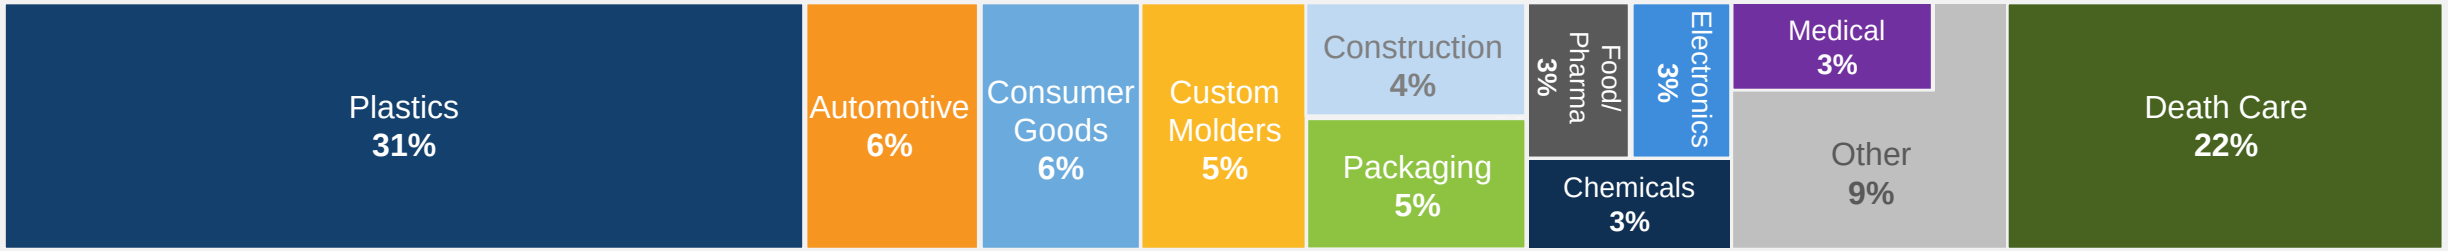
Pro Forma Revenue by Segment[1]



Pro Forma Revenue by Geography[1,3]



Diversified End Markets[1]



[1] All metrics are as of 9/30/2021 and are adjusted for the divested Red Valve, ABEL, and TerraSource Global businesses. Pro forma revenue and adjusted EBITDA margin are non-GAAP measures. See appendix for GAAP reconciliation.
[2] Includes headquarters, significant manufacturing and sales & technical locations. [3] Based on customer location.

Four Pillar Strategy to Drive Long-Term Shareholder Value

HILLENBRAND

Strengthen and Build Platforms Organically and through M&A

Emerging capabilities in food, recycling, biopolymers, and battery

Manage Batesville for Cash

Complements APS and MTS businesses with stable cash flow

Build Scalable Foundation Utilizing Hillenbrand Operating Model (HOM)

Continued opportunity as we roll out HOM across MTS segment

Effectively Deploy Strong Free Cash Flow

Strong and flexible balance sheet to deploy capital for long-term returns

Q2 Highlights

- ✓ Outlook for demand remains strong and near-record backlog of $1.7 billion, up 14% compared to prior year on a pro forma basis[1], provides solid foundation for future growth during uncertain macro environment
- ✓ Batesville remained relentlessly focused on meeting customer needs and performed above our expectations
- ✓ Completed $67 million of share repurchases during the quarter and subsequently through May 5, 2022
- ✓ Planning to host Investor Day in December 2022

Hillenbrand Team Focused on Continued Execution to Drive Long-Term Shareholder Value

[1] Pro forma backlog comparison is adjusted for the divested TerraSource Global business.

Macro Trends to Support Long-term Growth

HILLENBRAND

Broad Secular Macro Trends, Including Eco-friendly Innovations, Support Growth Across Core End Markets and Applications

Packaging	Medical	Consumer Goods	Construction	Electronics	Automotive	Food
Improve food shelf life, freshness, and safety; innovation in recycled or bio-based content	Focus on safety, improved drug and therapy delivery, and durability / disposability	Shortened product lifecycles; innovation in multi-material products; design flexibility	Shift to plastics for durability, lighter weight, and lower maintenance	Shortened product lifecycles; durable plastics help create superior quality and design flexibility	Increased use of lightweight plastics to improve fuel efficiency; improved battery production for EV	More sustainable food sources such as plant-based proteins

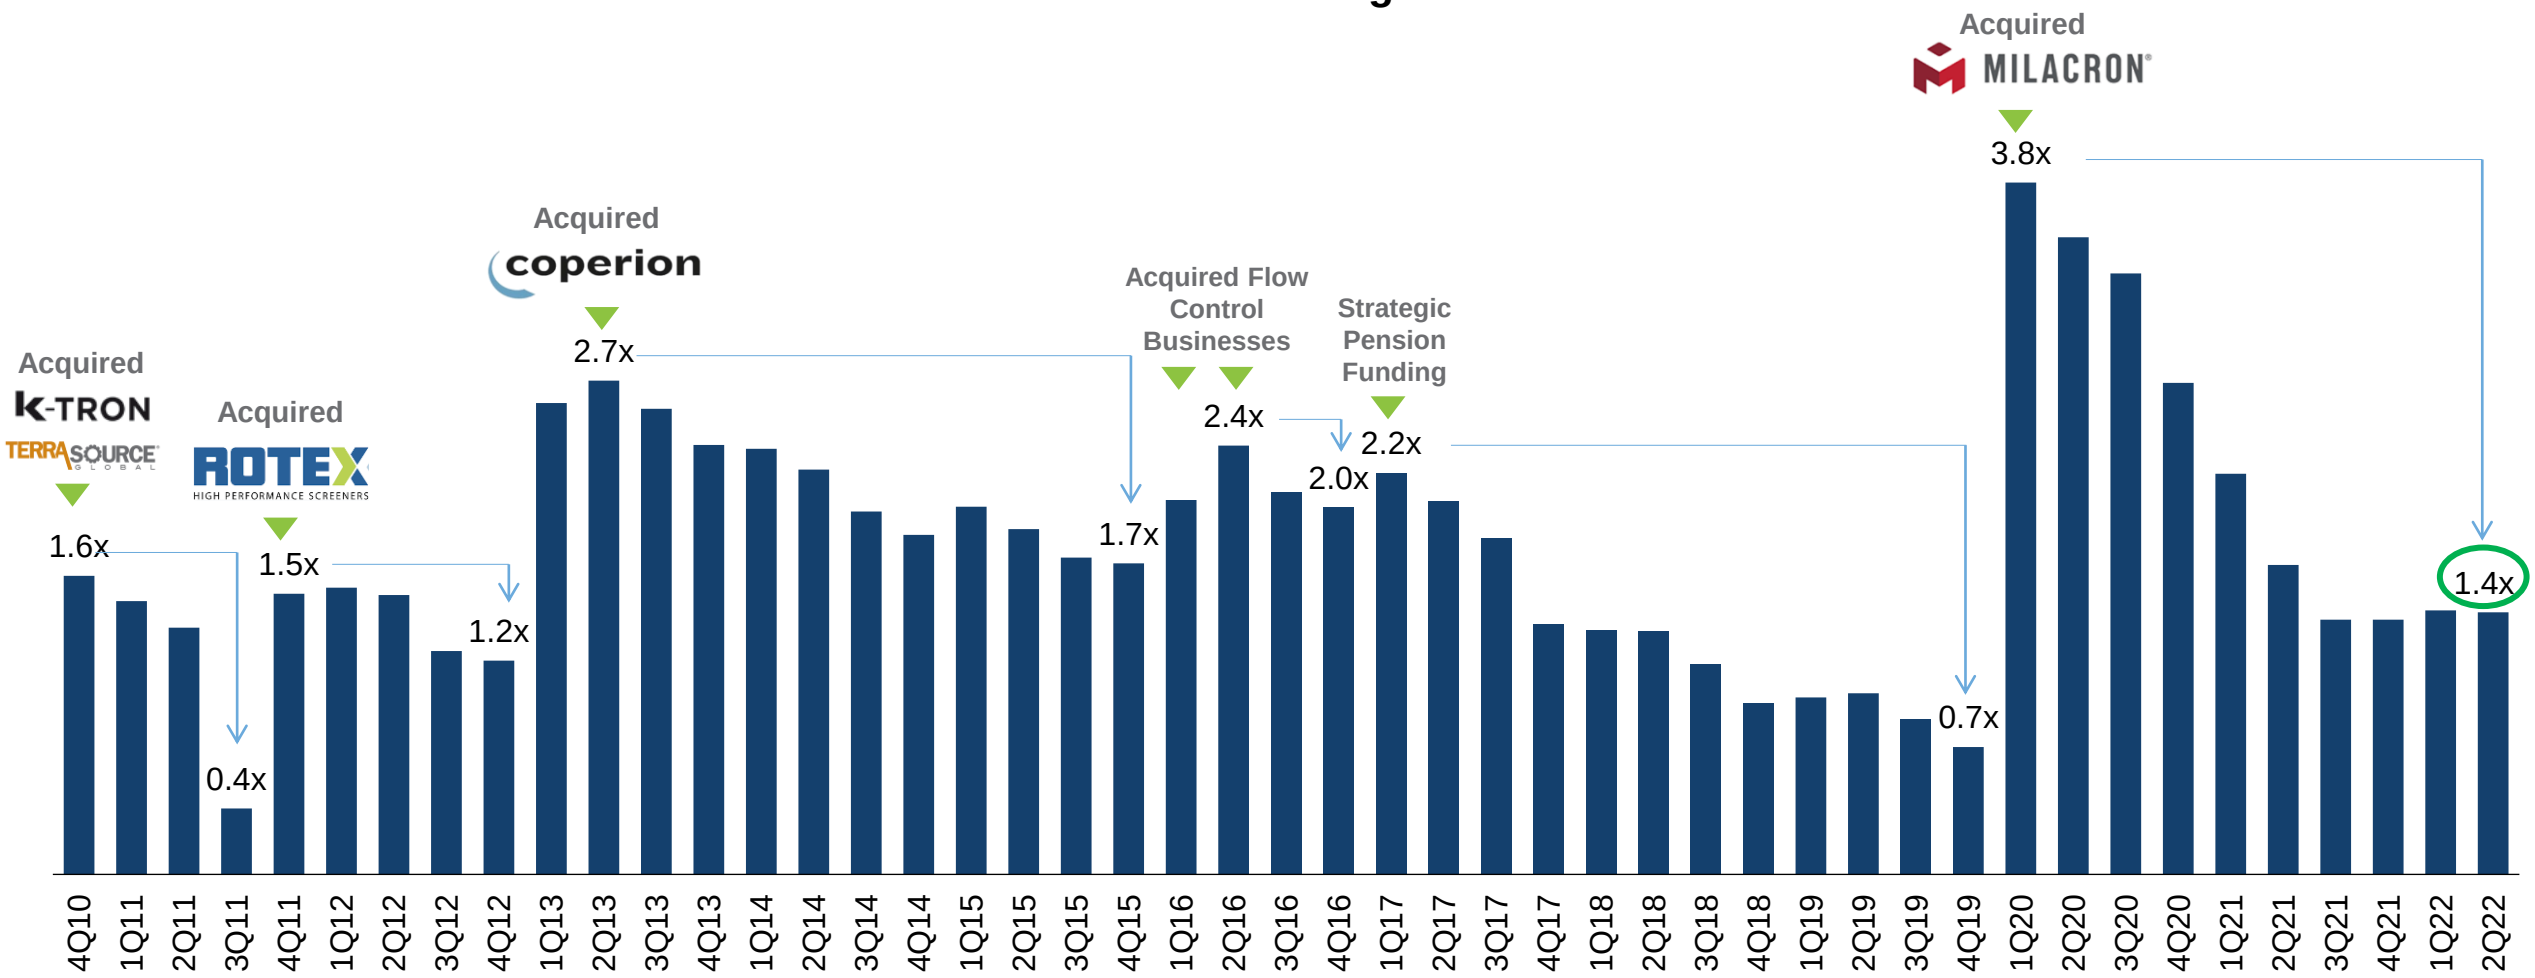
Customer Trends Driven by Sustainability

- **Recycling**
- **Recycled Content in New Products**
- **Biomaterials Made into Plastics**
- **Single-material Bottles**
- **Eco-friendly Food Sources**
- **Electric Vehicles (EV)**

Strong Track Record of Rapidly De-leveraging Post-Transaction

HILLENBRAND

Evolution of Net Leverage Over Time[1]



[1] Defined as ("Total Debt – Cash") / TTM pro forma adjusted EBITDA. Pro forma adjusted EBITDA is a non-GAAP measure. Prior periods are as previously disclosed and are available in presentations and SEC filings available on our website. See appendix for GAAP reconciliation.

Integrating Sustainability in How We Do Business

Committed to Transparency and Continued Progress on this Critical Journey; Next Sustainability Report Expected in June 2022

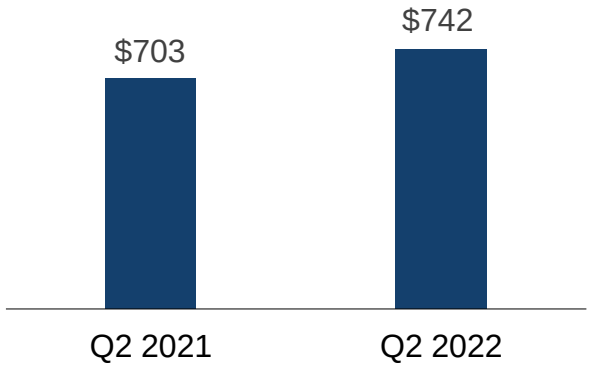
1. Chief Sustainability Officer continues to provide leadership in integrating sustainability into our strategy, culture, and daily operations
2. Collecting energy usage and Scope 1 and 2 emissions at key sites, which we plan to disclose in our upcoming sustainability report; embedded energy reduction strategy within the Hillenbrand Operating Model
3. Developing innovative products and solutions to support customers in their efforts to conserve energy and reduce emissions, improve operational efficiency, and lower their overall cost; announced partnership with Net Impact to collaborate with next generation on innovation around plastics circularity
4. Announced public commitment to DEI and national partnership with Girls, Inc. to focus on STEM and building diverse talent pipelines
5. Continuing to drive safety improvements, including root cause and near-miss analysis and publishing our rolling recordable incident rate
6. Centralizing global supply chain standards, including a focus on diversity in our supply chain

Consolidated Performance – Q2 FY 2022 ($M)

HILLENBRAND

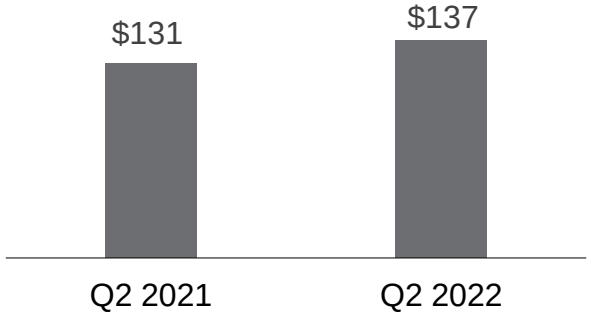
Pro Forma Revenue[1]

+5%



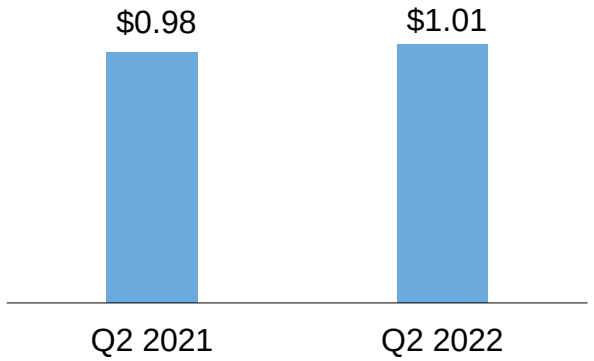
Pro Forma Adj. EBITDA[1]

+4%



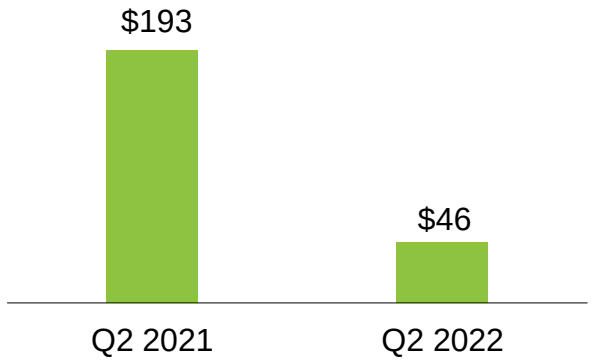
Adj. EPS[1]

+3%



Operating Cash Flow

-76%



Performance Highlights

- Revenue increased 5% on a pro forma basis[1] primarily driven by higher volume of large plastics projects in Advanced Process Solutions and the impact of pricing across all three operating segments; excluding the impact of foreign currency, revenue increased 8% on a pro forma basis
- Adj. EBITDA[1] of $137 million increased 4% on pro forma basis, while adj. EBITDA margin[1] of 18.5% decreased 20 basis points primarily due to cost inflation
- GAAP EPS of $0.74 decreased from $1.03 in the prior year due to the non-repeat of a gain on the sale of ABEL; adj. EPS[1] of $1.01 increased $0.03 or 3% as favorable pricing, productivity improvements, and higher volume were partially offset by inflation, a higher tax rate, increased strategic investments, and the impact of foreign currency exchange
- Operating Cash Flow of $46 million was down $147 million vs. prior year primarily due to timing of working capital

Business Update

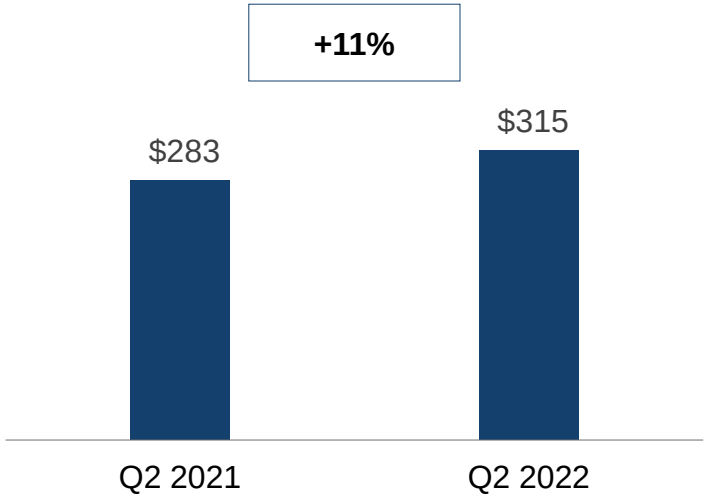
- Industrial demand remained healthy in the quarter; total backlog of $1.7 billion provides a strong foundation during this uncertain macro environment
- Batesville performed above expectations in Q2; expect Q3 volume to be significantly lower sequentially, but additional pricing surcharge being implemented to offset continued headwind from inflation
- Supply chain disruptions and inflation escalated in the quarter due to the return of COVID-related shutdowns in China and the war in Ukraine; we expect Q3 volume to be negatively impacted in MTS, particularly for hot runner equipment, due to the shutdowns in China
- Overall Hillenbrand offset approximately 90% of material and supply chain inflation with price in the quarter; we continue to anticipate price-cost coverage will improve to ~100% as we exit the fiscal year
- Due to timing of working capital, cash flow is expected to be stronger in 2H compared to 1H

[1] Pro forma comparisons are adjusted for the divested ABEL and TerraSource Global businesses. Pro forma revenue, adjusted EPS, adjusted EBITDA, and adjusted EBITDA margin are non-GAAP measures. See appendix for GAAP reconciliation.

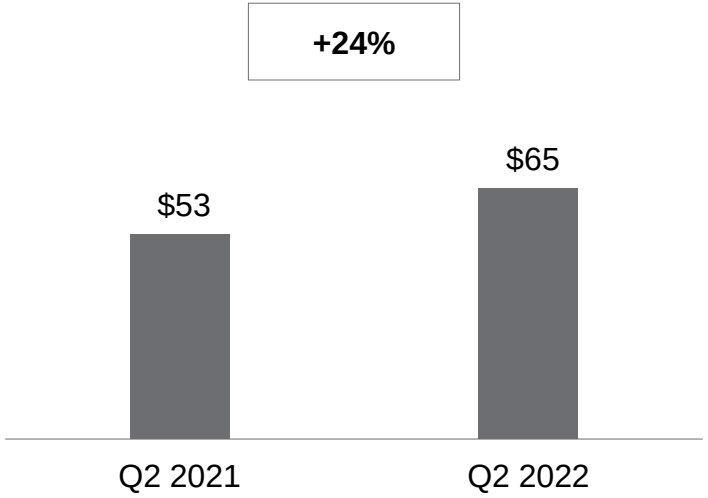
Segment Performance: Advanced Process Solutions ($M)

HILLENBRAND

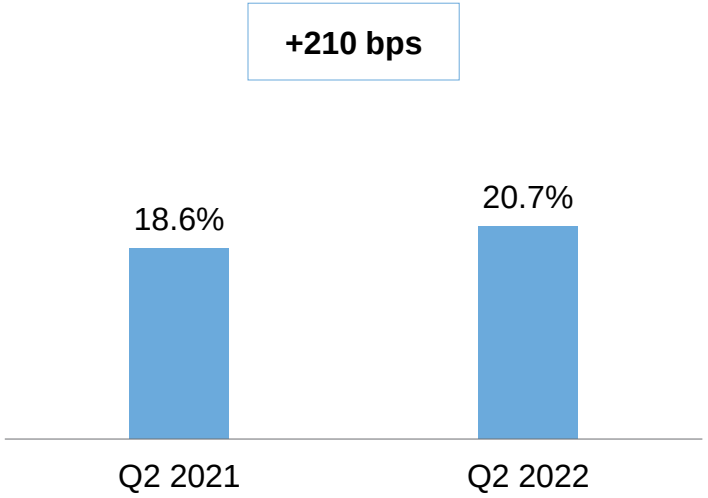
Pro Forma Revenue[1]



Pro Forma Adj. EBITDA[1]



Pro Forma Adj. EBITDA Margin[1]



Performance Highlights

- Revenue of $315 million increased 11% on a pro forma basis[1] driven by higher volume of large plastics projects, favorable pricing, and higher sales of aftermarket parts and service; excluding the impact of foreign currency, revenue increased 16% on a pro forma basis
- Adj. EBITDA of $65 million increased 24% on a pro forma basis[1], or 30% excluding the impact of foreign currency; adj. EBITDA margin[1] of 20.7% increased 210 basis points as favorable pricing, operating leverage from higher volume, and productivity improvements more than offset inflation and strategic investments
- Backlog of $1.3 billion increased 13% on a pro forma basis[1] compared to the prior year, or 17% excluding the impact of foreign currency exchange, largely driven by increased demand for large polyolefin systems and aftermarket parts and service

Business Update

- Demand outlook remains solid for large plastics projects, particularly in Asia and the Middle East; continued focus on accelerating growth in strategic end markets of food, recycling, biopolymer, and battery
- Another strong quarter of aftermarket orders; however, aftermarket revenue conversion continued to be impacted by supply chain challenges, which have been exacerbated by the return of COVID-related shutdowns in China and the war in Ukraine
- Due to higher-than-expected inflation in 2H, additional actions are being taken and we continue to expect price to generally cover material and supply chain inflation

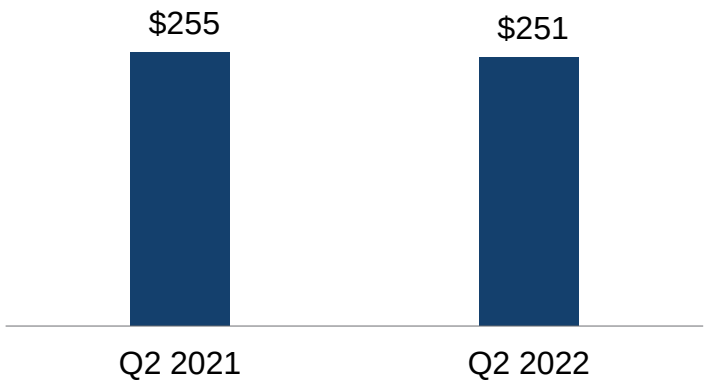
[1] Pro forma comparisons are adjusted for the divested ABEL and TerraSource Global businesses. Pro forma revenue, adjusted EPS, adjusted EBITDA, and adjusted EBITDA margin are non-GAAP measures. See appendix for GAAP reconciliation.

Segment Performance: Molding Technology Solutions ($M)

HILLENBRAND

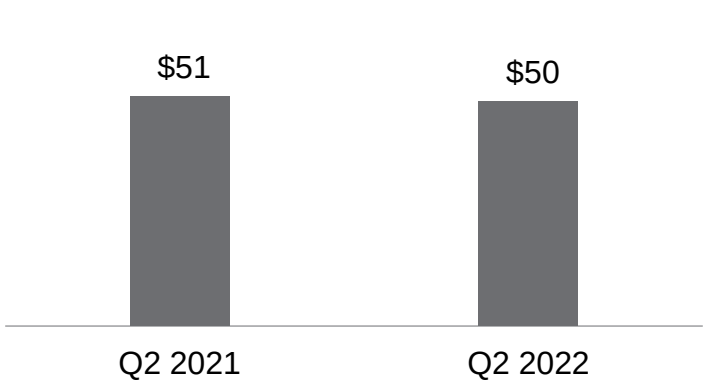
Revenue

-2%



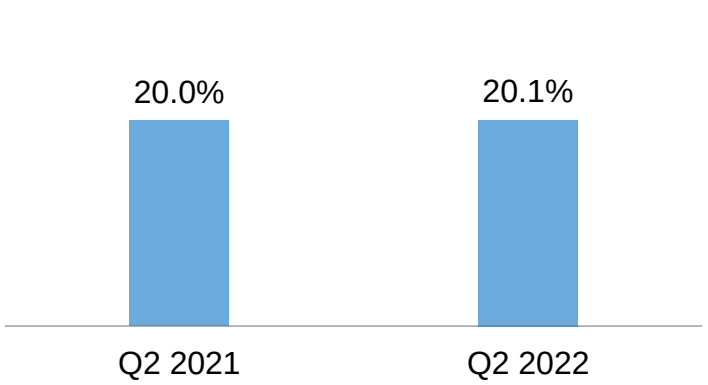
Adj. EBITDA[1]

-1%



Adj. EBITDA Margin[1]

+10 bps



Performance Highlights

- Revenue of $251 million decreased 2% year over year, but was flat excluding the impact of foreign currency exchange, as favorable pricing and higher volume from the hot runner product line was offset by a decline in volume of the injection molding and extrusion product lines
- Adj. EBITDA[1] of $50 million was down 1% compared to the prior year, or flat excluding the impact of foreign currency exchange, while adj. EBITDA margin[1] of 20.1% increased 10 basis points as favorable pricing and productivity improvements were mostly offset by inflation
- Record backlog of $418 million increased 15% year over year primarily driven by injection molding equipment; backlog was up 3% sequentially

Business Update

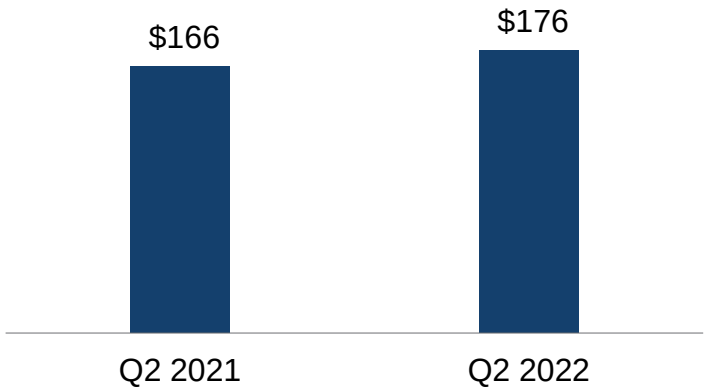
- Demand remains healthy across most key end markets and applications, however, we continue to see constraints due to supply chain and labor shortages negatively impacting our revenue conversion
- We expect COVID-related shutdowns in China to have a negative impact on our hot runner product line in the fiscal third quarter
- Continued utilization of HOM to drive productivity improvements and synergies
- Price-cost coverage was ~95% in the quarter, which we expect to improve to ~100% as we exit the fiscal year, despite higher-than-expected inflation

[1] Adjusted EBITDA and adjusted EBITDA margin are non-GAAP measures. See appendix for GAAP reconciliation.

Segment Performance: Batesville ($M)

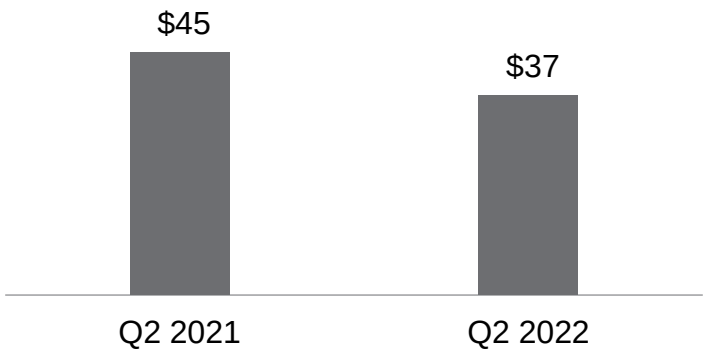
Revenue

+6%



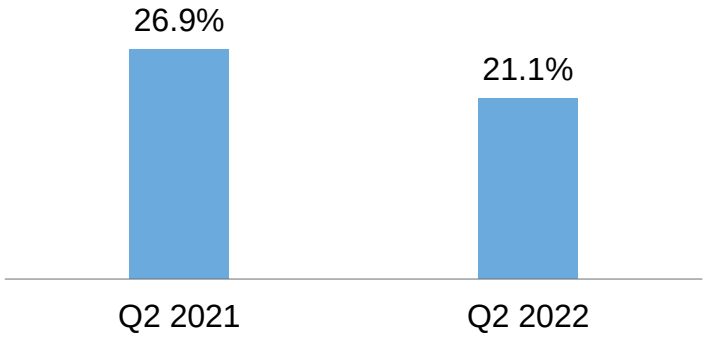
Adj. EBITDA[1]

-17%



Adj. EBITDA Margin[1]

-580 bps



Performance Highlights

- Revenue of $176 million increased 6% year over year primarily resulting from the price surcharge implemented in January 2022 to offset the significant increase in commodity costs; burial casket volume was lower compared to the prior year primarily due to an estimated increase in the rate at which families opted for cremation
- Adj. EBITDA[1] of $37 million decreased 17% compared to the prior year, while adj. EBITDA margin[1] of 21.1% decreased 580 basis points primarily due to inflation and the impact of lower volume, partially offset by pricing actions and productivity improvements; as a reminder, the surcharge pricing actions are dilutive to margins as it is a dollar-for-dollar offset to inflation

Business Update

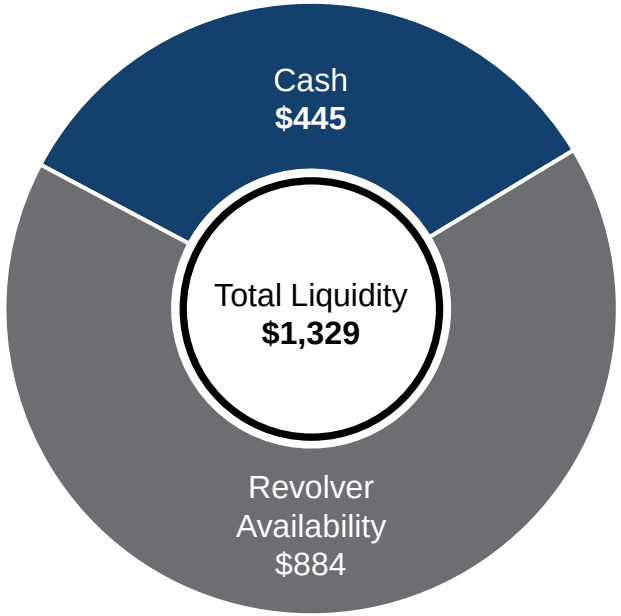
- Burial volume was higher than expected coming into the quarter due to the unfortunate effects of the Omicron variant
- We have seen burial volumes normalize in April and expect this pattern to continue throughout the 2H of the fiscal year, in line with external projections
- Due to the significant inflation in commodities and transportation, price-cost coverage was ~80% in the quarter; an additional price surcharge is being implemented in Q3 to help mitigate the higher-than-expected inflation
- As volumes normalize, the business is redirecting resources to focus on productivity projects

[1] Adjusted EBITDA and adjusted EBITDA margin are non-GAAP measures. See appendix for GAAP reconciliation.

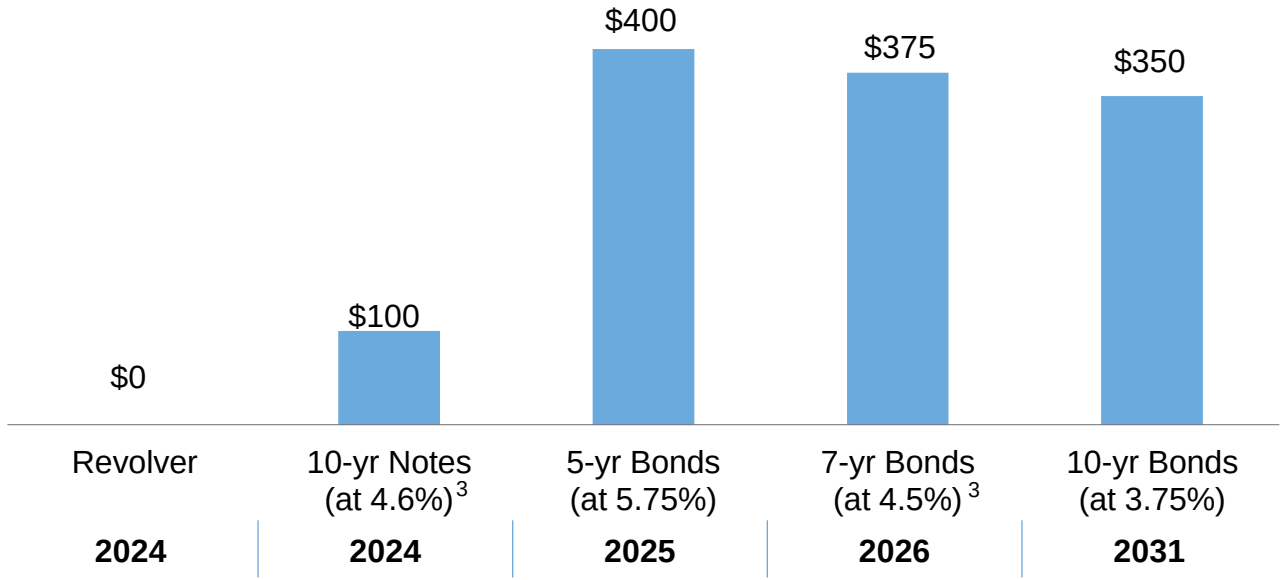
Capital Position and Liquidity

HILLENBRAND

Liquidity[1] ($M)



Debt Maturity Schedule[2] ($M)



- Net debt of $769 million; net leverage of 1.4x was essentially flat on sequential basis
- Returned approximately $43 million to shareholders in the quarter through share repurchases of $27 million and quarterly dividend of $16 million; subsequent to the quarter, the Company repurchased an additional $41 million through May 5

[1] Cash and revolver amounts as of 3/31/22. [2] Debt maturity schedule is shown on a calendar year basis and reflects date of final payment due. [3] Interest rates subsequently stepped up to 5.60% (10-yr Notes) and 5.00% (7-yr Bonds).

Capital Deployment Priorities

HILLENBRAND

	Our Priorities
Reinvest in the Business • Drive innovation and new product development • Expand into new end markets and geographies • Improve operational efficiency through automation and digitization • Annual capex target of ~2% of revenue	Strategic investments for profitable growth
Strategic Acquisitions • Strategic focus: strengthen existing leadership positions and build targeted platforms • Disciplined approach: seek acquisitions with compelling financial returns	Evaluating strategic acquisitions to accelerate profitable growth
Return Cash to Shareholders • Dividend yield of 2.0%[1] • 14 consecutive years of $0.01 per share increases to dividend • Opportunistic share repurchases	$67M of share repurchases made during the quarter and subsequently through May 5, 2022
Reduce Debt • Current net debt of $769M[1] with a Net Debt to Adj. EBITDA of 1.4x[1] • Strong track record of paying down debt rapidly post acquisition	No near-term debt maturities due

[1] As of 3/31/22.

Updated Business Outlook & Assumptions[1, 2]

	$M, except EPS	Updated Range	YOY % / bps	Previous Range	YOY % / bps
REVENUE	APS	$1,275 – $1,315	*8 – 12%*	$1,275 – $1,315	*8 – 12%*
	MTS	$1,015 – $1,045	*2 – 5%*	$1,015 – $1,045	*2 – 5%*
	Batesville	$605 – $615	*(3) – (1)%*	$585 – $595	*(6) – (5%)*
	Total Hillenbrand	**$2,895 – $2,975**	***4 – 6%***	**$2,875 – $2,955**	***3 – 6%***
ADJ. EBITDA	APS	20.0 – 21.0%	*50 – 150 bps*	21.0 – 21.5%	*150 – 200 bps*
	MTS	20.0 – 21.0%	*(30) – 70 bps*	20.0 – 21.0%	*(30) – 70 bps*
	Batesville	20.0 – 21.0%	*(570) – (470) bps*	20.0 – 21.0%	*(570) – (470) bps*
	Total Hillenbrand	**$516 – $558**	***(3) – 4%***	**$525 – $559**	***(2) – 5%***
ADJ. EPS	**Full Year FY22**	**$3.80 – $4.00**	**Flat – 6%**	**$3.80 – $4.00**	**Flat – 6%**
	Fiscal Q3	**$0.83 – $0.90**	**(2) – 6%**		

Key Assumptions

- Strong backlog and the underlying demand of our key end markets remain healthy
- Global supply chain disruptions and labor shortages continue to impact MTS and APS throughout FY 2022
- Assumes China capacity normalizes as we enter June
- Significant sequential decline in burial volume in 2H of FY22, partially offset by additional surcharge
- Full year material and supply chain inflation of ~$140 million with price-cost coverage of ~100% as we exit the year
- FX headwind of ~6% within APS, ~2% in MTS, ~3% consolidated

Other FY 2022 Assumptions

~100%	~$50M	~$12 - $15M	~$15 - $20M	~$60M	~$55M	~$70M	~28-30%	~73M
Free Cash Flow / Adj. NI[2]	Capital Expenditures	YOY Synergy Realization	Integration Costs	Depreciation	Intangible Amortization	Interest Expense, Net	Adj. ETR[2]	Avg. Diluted Share Count

[1] Figures presented on Pro Forma basis, except adjusted EPS. Pro forma comparisons are adjusted for the divested Red Valve, ABEL, and TerraSource Global businesses. Pro forma revenue, pro forma adjusted EBITDA, pro forma adjusted EBITDA margin, adjusted Net Income, and adjusted EPS are non-GAAP measures. See appendix for GAAP reconciliation.
[2] Hillenbrand does not attempt to provide reconciliations for forward-looking non-GAAP earnings guidance. See appendix for further information.

Key Takeaways

HILLENBRAND

01.

Demand continues to be solid across our key industrial end markets and our **robust backlog** provides visibility and confidence for the remainder of FY22 and beyond

02.

Strong balance sheet and **disciplined capital allocation framework** to drive profitable growth and long-term shareholder value

03.

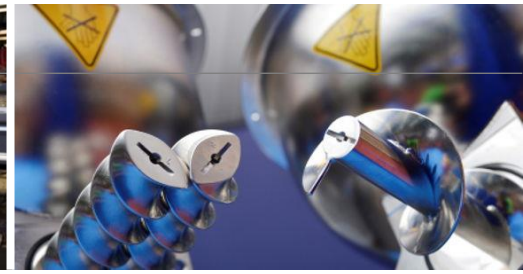
Proven track record of execution during challenging economic cycles **enabled by the Hillenbrand Operating Model**

04.

Exciting opportunities to leverage our capabilities and **accelerate growth in strategic end markets** supported by demand for more sustainable solutions

05.

On-track to complete third and final year of Milacron integration with **$75 million in run-rate cost synergies**



Planning to Share Vision for Hillenbrand's Next Chapter of Growth at Investor Day in December 2022

HILLENBRAND

APPENDIX

Disclosure Regarding Non-GAAP Measures

While we report financial results in accordance with United States generally accepted accounting principles (GAAP), we also provide certain non-GAAP operating performance measures. We believe this information provides a higher degree of transparency, as further set forth in our earnings release for this quarter. These non-GAAP measures are referred to as "adjusted" measures and exclude the following items:

- business acquisition, disposition, and integration costs;
- restructuring and restructuring related charges;
- intangible asset amortization;
- certain debt financing activities;
- gains and losses on divestitures;
- other individually immaterial one-time costs;
- the related income tax impact for all of these items; and
- certain tax items related to the divestitures of Red Valve, ABEL and TerraSource Global, the revaluation of deferred tax balances in connection with enacted statutory tax rate reductions in certain foreign jurisdictions, the impact the Milacron loss carryforward attributes have on tax provisions related to the imposition of tax on Global Intangible Low-Taxed Income (GILTI) earned by certain foreign subsidiaries, the Foreign Derived Intangible Income Deduction (FDII), and the Base Erosion and Anti-Abuse Tax (BEAT).

One important non-GAAP measure Hillenbrand uses is adjusted earnings before interest, income tax, depreciation, and amortization ("adjusted EBITDA"). A part of our strategy is to pursue acquisitions that strengthen or establish leadership positions in key markets. Given that strategy, it is a natural consequence to incur related expenses, such as amortization from acquired intangible assets and additional interest expense from debt-funded acquisitions. Accordingly, we use adjusted EBITDA, among other measures, to monitor our business performance. We also use "adjusted net income" and "adjusted diluted earnings per share (EPS)," which are defined as net income and earnings per share, respectively, each excluding items described in connection with adjusted EBITDA. Adjusted EBITDA, adjusted net income, and adjusted diluted EPS are not recognized terms under GAAP and therefore do not purport to be alternatives to net (loss) income or to diluted EPS, as applicable. Further, Hillenbrand's measures of adjusted EBITDA, adjusted net income, or adjusted diluted EPS may not be comparable to similarly titled measures of other companies.

Pro forma revenue and pro forma adjusted EBITDA are defined respectively as net revenue and adjusted EBITDA excluding net revenue and adjusted EBITDA directly attributable to Red Valve which was divested on December 31, 2020, ABEL which was divested on March 10, 2021, and TerraSource Global which was divested on October 22, 2021. Hillenbrand uses pro forma measures to assess performance of its reportable segments and the Company in total without the impact of recent acquisitions and divestitures.

Free cash flow ("FCF") is defined as cash flow from operations less capital expenditures. Hillenbrand considers FCF an important indicator of the Company's liquidity, as well as its ability to fund future growth and to provide a return to shareholders. FCF does not include deductions for debt service (repayments of principal), other borrowing activity, dividends on the Company's common stock, repurchases of the Company's common stock, business acquisitions, and other items.

Hillenbrand calculates the foreign currency impact on net revenue in order to better measure the comparability of results between periods. We calculate the foreign currency impact by translating current year results at prior year foreign exchange rates. This information is provided because exchange rates can distort the underlying change in sales, either positively or negatively.

In addition, forward-looking adjusted earnings per share for fiscal 2022 excludes potential charges or gains that may be recorded during the fiscal year, including among other things, items described above in connection with other "adjusted" measures. Hillenbrand thus also does not attempt to provide reconciliations of forward-looking non-GAAP earnings guidance to the comparable GAAP measure, as permitted by Item 10(e)(1)(i)(B) of Regulation S-K, because the impact and timing of these potential charges or gains is inherently uncertain and difficult to predict and is unavailable without unreasonable efforts. In addition, the company believes such reconciliations would imply a degree of precision and certainty that could be confusing to investors. Such items could have a substantial impact on GAAP measures of Hillenbrand's financial performance.

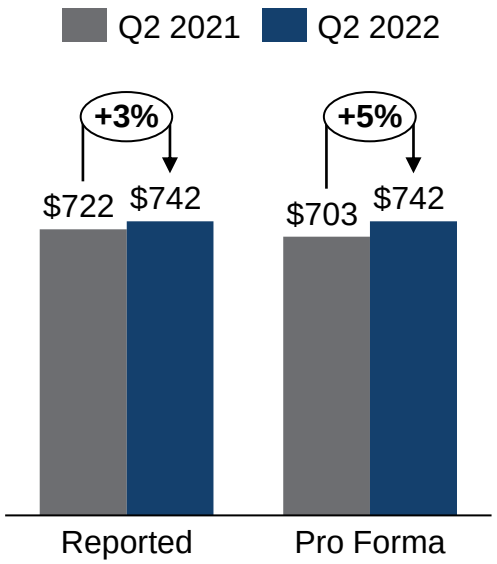
OTHER OPERATING MEASURES

Another important operational measure used is backlog. Backlog is not a term recognized under GAAP; however, it is a common measurement used in industries with extended lead times for order fulfillment (long-term contracts), like those in which the Advanced Process Solutions and Molding Technology Solutions reportable operating segments compete. Backlog represents the amount of net revenue that we expect to realize on contracts awarded to Advanced Process Solutions and Molding Technology Solutions reportable operating segments. For purposes of calculating backlog, 100% of estimated net revenue attributable to consolidated subsidiaries is included. Backlog includes expected net revenue from large systems and equipment, as well as aftermarket parts, components, and service. The length of time that projects remain in backlog can span from days for aftermarket parts or service to approximately 18 to 24 months for larger system sales within the Advanced Process Solutions reportable operating segment. The majority of the backlog within the Molding Technology Solutions reportable operating segment is expected to be fulfilled within the next twelve months. Backlog includes expected revenue from the remaining portion of firm orders not yet completed, as well as net revenue from change orders to the extent that they are reasonably expected to be realized. Hillenbrand includes in backlog the full contract award, including awards subject to further customer approvals, which we expect to result in revenue in future periods. In accordance with industry practice, Hillenbrand's contracts may include provisions for cancellation, termination, or suspension at the discretion of the customer. Given that backlog is an operational measure and that the Company's methodology for calculating backlog does not meet the definition of a non-GAAP measure, as that term is defined by the SEC, a quantitative reconciliation is not required or provided.

Comparison of Reported / Pro Forma Results – Q2 ($M)

HILLENBRAND

Consolidated Revenue[1]



Consolidated Adj. EBITDA[1]
