"QVC had an excellent quarter, growing constant currency revenue and adjusted OIBDA in every market," said Greg Maffei, Liberty Interactive President and CEO. "We made progress on the acquisition of HSN and expect to close in the fourth quarter. We now expect the acquisition of GCI, split-off of GCI Liberty and creation of two asset-backed stocks, QVC Group and GCI Liberty, to occur in the first quarter of 2018."

Unless otherwise noted, the following discussion compares financial information for the three months ended September 30, 2017 to the same period in 2016.

QVC GROUP – Approximately \$12 million of corporate level selling, general and administrative expense (“SG&A”) (including stock-based compensation expense) was allocated to the QVC Group in the third quarter of 2017.

On July 6, 2017, Liberty Interactive entered into an agreement to acquire the 62% of HSNi it does not already own in an all-stock transaction. Liberty Interactive currently owns approximately 38% of HSNi and, upon acquisition of the remaining stake, HSNi will become a wholly-owned subsidiary attributed to the QVC Group. Additional information is available in the amended registration statement on Form S-4 that Liberty Interactive filed with the SEC on October 23, 2017.

The acquisition of HSNi is expected to be completed during the fourth quarter of 2017 and is subject to certain customary conditions, including, among other things, approval by a majority of the outstanding voting power of HSNi stockholders. A voting agreement has been obtained from Liberty Interactive to vote its HSNi shares in-favor of the transaction. Approval of the Liberty Interactive stockholders is not required, and is not being sought, for the HSNi acquisition. In August 2017, the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act expired. In September 2017, the Federal Communications Commission granted requisite approvals to complete the acquisition.

QVC

“We are very pleased with our strong results,” said QVC President and CEO, Mike George. “Our US business returned to growth and our International segment continued its solid momentum. Our performance demonstrates our ability to execute our strategic initiatives to improve product freshness and discovery, leverage our commerce content across platforms, increase customer engagement and attract new customers. We remain excited about the pending transaction to acquire HSNi and the formation of the new QVC Group.”

The following table provides QVC’s consolidated financial and operating results for the third quarter of 2017. US Dollar denominated results were unfavorably impacted by exchange rate fluctuations in the third quarter. The Dollar strengthened versus the Japanese Yen and British Pound 8% and 1%, respectively, and weakened against the Euro 5%. The following table also provides a comparison of the year over year percentage change in QVC’s results in constant currency⁽²⁾ (where applicable) to the comparable figures calculated in accordance with US GAAP for the three months ended September 30, 2017.

QVC US realized year-over-year gains in the apparel, beauty, accessories and electronics categories in the third quarter. Home was essentially flat and jewelry declined. Average selling price (“ASP”) declined 4% in the quarter, primarily driven by product mix within the electronics category, as several successful items sold in the quarter carry lower price points than items sold in the prior year. The number of US new customers increased 7% in the

quarter. Operating income margin and adjusted OIBDA margin performance primarily reflect higher fixed costs associated with incentive compensation and HSNi integration consulting services, higher inventory obsolescence and marketing expense, which were partially offset by higher product margins, lower bad debt and lower amortization expenses. As noted last quarter, the US business experienced a systems outage late in the second quarter of 2017, which resulted in an estimated 1% shift in net revenue to the third quarter.

The following table provides QVC International's financial and operating results for the third quarter of 2017, including the year over year percentage change in QVC's results in constant currency⁽²⁾ (where applicable) to the comparable figures calculated in accordance with US GAAP due to the net impact of unfavorable exchange rate fluctuations.

In the third quarter of 2017, QVC International experienced year-over-year constant currency⁽²⁾ growth in the apparel, accessories, beauty and home categories, which were partially offset by declines in electronics and jewelry. Increases in operating income margin and adjusted OIBDA margin in constant currency⁽²⁾ primarily reflect lower marketing and fixed costs, higher product margins and lower amortization, which were partially offset by higher freight costs.

CNR Home Shopping Co., Ltd. ("CNRS"), QVC's joint venture in China, is being accounted for as an equity method investment. It had no material impact to QVC's net income for the quarter.

zulily

"We continue to be obsessively focused on our customer experience and every day it is our mission to make every one of our customers a passionate fan of zulily. We are pleased by the growth of our active customer count to 5.3 million, the highest count ever, which contributed to a strong finish during the third quarter," said zulily President and CEO, Darrell Cavens. "Driving active customer growth and ensuring an amazing customer experience will allow us to achieve the growth levels that this business has the ability to deliver, and I am excited by our strong momentum going into the holiday season."

The following table provides zulily's stand-alone financial and operating results for the third quarter of 2017. Revenue was up 2% in the third quarter, primarily attributed to a 6% increase in orders placed driven by an increase in active customers, partially offset by increased backlog due to timing of orders within the quarter. In addition, units per order increased but was offset by lower ASP. An active customer is defined as an individual who has purchased at least once in the last twelve months, measured from the last date of a period. Operating income margin improved, driven primarily by decelerating amortization of intangible assets related to purchase accounting. Adjusted OIBDA margin decreased primarily due to a decline in ASP, increased promotional offers, and increased supply chain expenses resulting from an increase in international shipping, a shift in product mix, and ramping of zulily's Pennsylvania fulfillment center.

Share Repurchases

From August 1, 2017 through October 31, 2017, Liberty Interactive repurchased

approximately 21.0 million Series A QVC Group shares (Nasdaq:QVCA) at an average cost per share of \$22.69 for total cash consideration of \$477 million. Since the creation of the QVC Group stock (including its predecessor, Liberty Interactive Group) in May 2006, Liberty Interactive has repurchased shares for aggregate cash consideration of \$7.5 billion, representing approximately 49% of the shares outstanding at the time of the creation of the QVC Group stock. All repurchases up to August 9, 2012, the date on which the QVC Group stock was recapitalized to create the Liberty Ventures common stock, were comprised of shares of the combined stocks. On September 19, 2017, Liberty Interactive's board of directors authorized the repurchase of an additional \$1 billion of Series A QVC Group common stock. The remaining repurchase authorization for Liberty Interactive as of November 1, 2017 is approximately \$1.5 billion, of which \$822 million can be applied to repurchases of either QVC Group or Liberty Ventures common stock and \$650 million can only be applied to Liberty Ventures common stock.

QVC Group has attributed to it Liberty Interactive's subsidiaries, QVC, Inc. and zulily, llc, and Liberty Interactive's interest in HSNi.

LIBERTY VENTURES GROUP – Approximately \$10 million of corporate level SG&A expense (including stock-based compensation expense) was allocated to Liberty Ventures Group in the third quarter of 2017.

On April 4, 2017, Liberty Interactive entered into an agreement and plan of reorganization with GCI, the largest communications provider in Alaska, whereby Liberty Interactive will acquire GCI through a reorganization in which certain Liberty Ventures Group assets and liabilities will be contributed to GCI in exchange for a controlling interest in GCI, followed by a subsequent split-off of the combined company, GCI Liberty. Additional information is available in the amended registration statement on Form S-4 that GCI filed with the SEC on September 26, 2017.

The transactions between Liberty Interactive and GCI are expected to be completed during the first quarter of 2018, subject to customary closing conditions including, among other things, the requisite shareholder approvals. In June 2017, the Federal Trade Commission granted early termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act. In November 2017, the Regulatory Commission of Alaska and the Federal Communications Commission granted requisite approvals to complete the acquisition.

Pursuant to a recent amendment to the reorganization agreement with GCI, Liberty Interactive's outstanding 1.75% Charter exchangeable debentures due 2046 (the "1.75% debentures") will now be reattributed to the QVC Group at the closing of the GCI transactions and Liberty Interactive will not conduct the previously contemplated exchange offer for mirror debentures of GCI Liberty. At closing, the 1.75% debentures will be reattributed to the QVC Group, together with approximately \$590 million of cash equal to the NPV of principal and cash interest payments through the put/call date (October 2023). Such cash, together with any other cash due to the QVC Group in the reattribution, will be funded through cash attributed to Liberty Ventures and a \$1 billion LBRDK margin loan to be entered into by a subsidiary of GCI Liberty at closing.

In addition, Liberty Interactive (which is expected to be renamed QVC Group after closing) will benefit from an indemnity obligation from GCI Liberty with respect to any payments made

by Liberty Interactive in excess of the adjusted principal amount of the debentures to any holder that exercises its exchange right on or before the put/call date, less any potential tax benefit to Liberty Interactive from the retirement of such debentures at a premium. GCI Liberty is supporting this obligation with a negative pledge in favor of Liberty Interactive on 2.2 million Charter shares at GCI Liberty that are referenced by the 1.75% debentures. In addition, Liberty Interactive has agreed to use its commercially reasonable efforts to repurchase the outstanding debentures within 6 months following the closing, on terms and conditions reasonably acceptable to GCI Liberty. GCI Liberty will reimburse Liberty Interactive for the difference between the purchase price of the tendered debentures and the amount of cash delivered in the reattribution with respect to the tendered debentures, less any potential tax benefit to Liberty Interactive from retiring such debentures at a premium. GCI Liberty's indemnity obligation and the number of shares subject to the negative pledge will be ratably reduced with respect to any debentures repurchased by Liberty Interactive.

GCI Liberty may (but is not required to) complete an offering of Charter exchangeable debentures, proceeds of which may be used to reimburse Liberty Interactive with respect to the aforementioned tender offer. Absent a concurrent offering, GCI Liberty will fund its payment obligations with funds available under the \$1 billion LBRDK margin loan.

Simultaneous with the closing of the transactions with Liberty Interactive and GCI, the QVC Group, including wholly-owned subsidiaries QVC, Inc., zulily and HSNi (or, if the HSNi acquisition has not yet closed, following such closing), will become an asset-backed stock and Liberty Interactive will be renamed QVC Group, Inc. Neither the proposed transactions involving GCI nor the acquisition of HSNi is conditioned on the completion of the other, and no assurance can be given as to which of these transactions will be completed first.

Share Repurchases

There were no repurchases of Liberty Ventures common stock (Nasdaq: LVNTA) from August 1, 2017 through October 31, 2017. The remaining repurchase authorization for Liberty Interactive as of November 1, 2017 is approximately \$1.5 billion, of which \$822 million can be applied to repurchases of either QVC Group or Liberty Ventures common stock and \$650 million can only be applied to Liberty Ventures common stock.

The businesses and assets attributed to the Liberty Ventures Group are all of Liberty Interactive's businesses and assets other than those attributed to the QVC Group, including its interests in Liberty Broadband Corporation and FTD, Liberty Interactive's subsidiary Evite, and minority interests in ILG, LendingTree and Charter Communications.

NON-GAAP FINANCIAL MEASURES

This press release includes a presentation of adjusted OIBDA, which is a non-GAAP financial measure, for Liberty Interactive, the QVC Group, QVC (and certain of its subsidiaries), zulily and the Liberty Ventures Group together with a reconciliation to that entity or such businesses' operating income, as determined under GAAP. Liberty Interactive defines adjusted OIBDA as revenue less cost of sales, operating expenses, and selling, general and administrative expenses, excluding all stock based compensation, and excludes from that definition depreciation and amortization and restructuring and impairment charges that are included in the measurement of operating income pursuant to GAAP. Further, this press release includes adjusted OIBDA margin which is also a non-GAAP financial measure. Liberty Interactive defines adjusted OIBDA margin as adjusted OIBDA divided by revenue.

Liberty Interactive believes adjusted OIBDA is an important indicator of the operational strength and performance of its businesses, including each business' ability to service debt and fund capital expenditures. In addition, this measure allows management to view operating results and perform analytical comparisons and benchmarking between businesses and identify strategies to improve performance. Because adjusted OIBDA is used as a measure of operating performance, Liberty Interactive views operating income as the most directly comparable GAAP measure. Adjusted OIBDA is not meant to replace or supersede operating income or any other GAAP measure, but rather to supplement such GAAP measures in order to present investors with the same information that Liberty Interactive's management considers in assessing the results of operations and performance

of its assets. Please see the attached schedules for applicable reconciliations.

In addition, this press release includes references to adjusted net income, which is a non-GAAP financial measure, for QVC Group. Liberty Interactive defines adjusted net income as net income, excluding the impact of purchase accounting amortization (net of deferred tax benefit).

Liberty Interactive believes adjusted net income is an important indicator of financial performance, in particular for QVC Group, due to the impact of purchase accounting amortization. Because adjusted net income is used as a measure of overall financial performance, Liberty Interactive views net income as the most directly comparable GAAP measure. Adjusted net income is not meant to replace or supersede net income or any other GAAP measure, but rather to supplement such GAAP measures in order to present investors with a supplemental metric of financial performance. Please see the attached schedules for a reconciliation of adjusted net income to net income (loss) calculated in accordance with GAAP for QVC Group (Schedule 4).

This press release also references certain financial metrics on a constant currency basis, which is a non-GAAP measure, for QVC Group. Constant currency financial metrics, as presented herein, are calculated by translating the current-year and prior-year reported amounts into comparable amounts using a single foreign exchange rate for each currency.

Liberty Interactive believes constant currency financial metrics are an important indicator of financial performance, in particular for QVC Group, due to the translational impact of foreign currency fluctuations relating to its subsidiaries in the UK, Germany, Italy, Japan and France, as well as its JV in China. We use constant currency financial metrics to provide a framework to assess how our businesses performed excluding the effects of foreign currency exchange fluctuations. Please see the financial tables at the beginning of this press release for a reconciliation of the impact of foreign currency fluctuations on revenue, operating income, adjusted OIBDA and average selling price.
