ISA's Duos Technologies Completes Integration of Zenitel's Stentofon IP Intercom System

Innovative Technology Expands Centraco 3.0 Command and Control Platform

JACKSONVILLE, FL / ACCESSWIRE / May 28, 2015 /Information Systems Associates Inc.'s (OTC Markets: IOSA) wholly-owned subsidiary Duos Technologies ("duostech"), a provider of intelligent security analytical technology solutions, announces completion of a new integration solution for Zenitel's Stentofon IP intercom system.

The modular integration expands the capabilities of duostech's Physical Security Information Management ("PSIM") component of the centraco 3.0 platform, which is now coupled with AlphaCom XE audio servers and Turbine intercom stations to deliver customers real-time distress call propagation and two-way audio feeds. The centraco platform, acting as a central processing hub for signals from a virtually unlimited number of disparate sub-systems, intelligently enhances data streams received from AlphaCom XE's connected stations by mapping the data source to metadata from real-time video feeds originating at the event location.

"With our latest integration solution for centraco PSIM platform, we are now able to leverage Stentofon's powerful audio processing and delivery capabilities and capture distress signals paired with two-way audio feeds. Centraco enhances Stentofon's signals with live camera views, navigable maps and other relevant metadata to give customers an immersive situational awareness and searchable audit trail," said David Ponevac, Executive Vice President and CTO of ISA Duos Technologies.

Gianni Arcaini, ISA Duos Technologies' Chairman and CEO stated, "We are very excited to bring this innovative integrated solution to market. This seamlessly integrated solution is especially suited for high-traffic environments such as hospitals, airports, rail road stations, student campuses, and other facilities with high volume people traffic."

Centraco 3.0 intelligently connects information from a virtually unlimited number of connected devices, sub-systems and data streams into a single central command and control user interface.

About Information Systems Associates Inc./Duos Technologies Inc.

Information Systems Associates Inc. (OTC Markets: IOSA), based in Jacksonville, FL, provides intelligent security analytical technology solutions with a strong portfolio of intellectual property. Its Duos Technologies' core competencies include advanced intelligent technologies that are delivered through its proprietary integrated enterprise command and

control platform, Centraco(TM). The Company provides its broad range of technology solutions with an emphasis on mission critical security, inspection and operations within the rail, utilities, petrochemical, healthcare, and hospitality sectors. ISA also offers IT, professional services and consulting services for information technology projects.

Forward-Looking Statements

This press release contains forward-looking statements that involve substantial uncertainties and risks. These forward-looking statements are based upon our current expectations, estimates and projections and reflect our beliefs and assumptions based upon information available to us at the date of this release. We caution readers that forward-looking statements are predictions based on our current expectations about future events. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Our actual results, performance or achievements could differ materially from those expressed or implied by the forward-looking statements as a result of a number of factors, including but not limited to, the successful operation of the integrated solution under typical real-time operating conditions, the market acceptance of such solution, our ability to tap into the relevant potential markets, the sufficiency and availability of working capital and general changes in economic conditions. Further information on our risk factors is contained in our filings with the SEC, including the Form 10-K for the year ended December 31, 2014. Any forward-looking statement made by us herein speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to revise or update any forward-looking statement for any reason.
