# Duos Technologies Group Reports First Quarter 2021 Results

JACKSONVILLE, FL / ACCESSWIRE / May 13, 2021 / [Duos Technologies Group, Inc.](#) ("Duos" or the "Company") (NASDAQ:DUOT), a provider of intelligent security analytical technology solutions, reported financial results for the first quarter ended March 31, 2021.

## First Quarter 2021 and Recent Operational Highlights

- Introduced obliquevue™ and additional perspectives to the Company's current Railcar Inspection Portals ([rip®](#)) solution. The obliquevue™ is the first of a new generation of AI-based inspection systems being developed by Duos as a part of its new "rapid development" initiative.
- Elected rail industry veteran Ed Harris to the Board of Directors, who now serves as Chairman of the Company's Nominating and Governance Committees and also as a member of the Audit Committee.
- Continued marketing partnership with Dell Technologies, which included Duos features in a recent Dell Tech World press release ([Dell Technologies Unlocks Value of Data at the Edge](#)) and blog post ([Full Steam Ahead: Railroads with AI at the Edge](#)).

## First Quarter 2021 Financial Results

*It should be noted that the following Financial Results represent the consolidation of the Company with its subsidiaries Duos Technologies, Inc. and truevue360™.*

**Total revenue** for the first quarter increased 117% to \$2.15 million compared to \$991,000 in the equivalent quarter in 2020. This was the aggregate of about \$1.49 million for technology systems and \$664,000 in recurring services revenue. The increase in total revenue was driven by the projects portion of our business and reflects the results of our ongoing investment in streamlining project build, delivery, and quality control processes. The increase in project revenues was also accompanied by an increase in services revenue as a result of new maintenance contracts being established as well as renewals of existing contracts and a shift to the next generation of technology systems, which are currently being installed.

**Cost of revenues** increased 66% to \$2.73 million compared to \$1.65 million in the same quarterly period last year. Cost of revenues on technology systems increased during the period compared to the equivalent period in 2020 as a part of a strategic review that senior management undertook in the final months of 2020. The Company's organization and related cost structure was realigned to give the capability to manufacture, install and support multiple production systems simultaneously. Prior to this realignment, the Company's organization was focused on primarily research and development with implementation resources being allocated as necessary. In conjunction with this change, increased costs are now being recognized against project and support revenues with a similar reduction in costs previously recognized for research and development, engineering development and internal

support. These changes will have a temporary impact on the gross margin, which will be offset by increases in revenue later in the year.

**Gross margin** totaled \$(576,000), an improvement compared to \$(655,000) in the same quarterly period last year. The increase in gross profit was driven by an increase in recorded revenues. As noted above, the Company has revamped its operations to support an anticipated increase in the number of new systems being deployed going forward. The resultant additional cost of revenues, while somewhat offset by decreases in SG&A expenses, is not yet covered by a comparable increase in revenues as of the first quarter of 2021. The Company anticipates an improvement in the overall gross margin for the full year 2021, with much of the improvement expected in the second half of the year.

**Operating expenses** decreased 13% to \$1.25 million from \$1.43 million in the same quarterly period last year. The decrease in operating expenses was driven by a substantial decrease in overall administration costs and was slightly offset by an increase in sales and marketing and research and development expenses.

**Net loss** totaled \$406,023 compared to net loss of \$2.15 million in the same quarterly period last year. The decrease in net loss was primarily attributable to the increase in total revenue as well as an increase in other income during the period related to the forgiveness of the Company's CARES Act PPP loan.

**Cash and cash equivalents** at quarter-end totaled \$7.07 million, compared to \$3.97 million at December 31, 2020.

## **Financial Outlook**

For the fiscal year ending December 31, 2021, the Company expects total revenue to be approximately \$18.0 million. The Company's guidance is based on contracts in backlog and near-term pending orders that are already performing or scheduled to be executed by the fourth quarter of 2021. Management also expects its operations to achieve profitability for 2021 with an improved cash liquidity position by year end. Although uncertainties continue in the macro economic climate, management believes that 2021 will yield a much stronger financial performance for revenue and attain profitability in the second half of the year.

## **Management Commentary**

"After a strong finish to the year, we continued our operating momentum into the first quarter of 2021," said Duos Chief Executive Officer Chuck Ferry. "Financially, we recorded a 117% increase in revenues, which was mostly driven by new deployments but also benefitted by an incremental increase within our services segment, the latter of which we are working to build over time into a predictable, high-margin base. As we make investments for sustainable future growth, that transition has led to a change in how we're allocating resources. More specifically, going forward, we plan on investing further in infrastructure and support so that we are better prepared to deliver a higher number of systems in a shorter timeframe. While impacting our gross margins temporarily, we fully expect this approach of building more scalable production systems to be offset by the revenue increases from new deployments we have planned in the second half of the year.

"Operationally, we've continued to actively upgrade our products, revamp testing protocols,

enhance internal communications, onboard quality personnel, and improve internal financial reporting and forecasting efforts. Our goal is to integrate these efficient processes as a core competency of our operations. To that end, earlier in the year we implemented a 'rapid development' initiative to be able to respond to market-driven demand more quickly. This effort has shortened delivery times on major projects, including our recently announced obliquevue<sup>TM</sup>, where we've already implemented our solution at a Class 1 Railroad with plans for an additional six installations in the coming months. Based on the current projects in place and the strong visibility into our pipeline of opportunities ahead, we remain confident in our ability to meet or exceed our previously stated projections, which would have us growing north of 100% and doing so profitably."

## **Conference Call**

The Company's management will host a conference call today, Thursday, May 13, 2021 at 4:30 p.m. Eastern time (1:30 p.m. Pacific time) to discuss these results, followed by a question and answer period.

Date: Thursday, May 13, 2021

Time: 4:30 p.m. Eastern time (1:30 p.m. Pacific time)

U.S. dial-in: (877) 407-3088

International dial-in: (201) 389-0927

Confirmation: 13719502

Please call the conference telephone number 5-10 minutes prior to the start time of the conference call. An operator will register your name and organization. If you have any difficulty connecting with the conference call, please contact Gateway Investor Relations at (949) 574-3860.

The conference call will be broadcasted live via telephone and available for online replay via the investor section of the Company's website [here](#).

## **About Duos Technologies Group, Inc.**

Duos Technologies Group, Inc. (Nasdaq: DUOT), based in Jacksonville, Florida, through its wholly owned subsidiary, Duos Technologies, Inc., designs, develops, deploys and operates intelligent technology solutions supporting rail, logistics, intermodal and Government customers that streamline operations, improve safety and reduce costs. The Company provides cutting edge solutions that automate the mechanical and security inspection of fast moving trains, trucks and automobiles through a broad range of proprietary hardware, software, information technology and artificial intelligence. For more information, visit [www.duostech.com](http://www.duostech.com).

## **Forward Looking Statements**

*This news release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of*

*1934, as amended, regarding, among other things our plans, strategies and prospects -- both business and financial. Although we believe that our plans, intentions and expectations reflected in or suggested by these forward-looking statements are reasonable, we cannot assure you that we will achieve or realize these plans, intentions or expectations. Forward-looking statements are inherently subject to risks, uncertainties and assumptions. Many of the forward-looking statements contained in this news release may be identified by the use of forward-looking words such as "believe," "expect," "anticipate," "should," "planned," "will," "may," "intend," "estimated," and "potential," among others. Important factors that could cause actual results to differ materially from the forward-looking statements we make in this news release include market conditions and those set forth in reports or documents that we file from time to time with the United States Securities and Exchange Commission. We do not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in our expectations or any change in events, conditions or circumstances on which any such statement is based, except as required by law. All forward-looking statements attributable to Duos Technologies Group, Inc. or a person acting on its behalf are expressly qualified in their entirety by this cautionary language.*
