

Perma-Fix Reports Financial Results and Provides Business Update for the Second Quarter of 2021

ATLANTA, Aug. 11, 2021 (GLOBE NEWSWIRE) -- Perma-Fix Environmental Services, Inc. (NASDAQ: PESI) (the "Company") today announced financial results and provided a business update for the second quarter ended June 30, 2021.

Mark Duff, President and CEO of the Company, commented, "As anticipated, revenues in the second quarter were primarily impacted by the ongoing effects of the COVID-19 pandemic, however we have begun to see activity pick up in third quarter and expect an improved second half of 2021. Despite the challenging environment, we reported net income of \$3.0 million and maintained over \$7 million of cash on the balance sheet. We experienced weakness in our Services Segment due to delays throughout the industry in evaluating bids and awarding procurements, also primarily due to the pandemic. Nevertheless, as we look at our bidding pipeline we are encouraged as these bids are collectively valued in the hundreds of millions of dollars. In fact, as previously disclosed last month, we were awarded a new service contract for the Tritium Systems Demolition and Disposal project, which is expected to be completed over the next 18 months. Revenue for the Treatment Segment remained relatively flat, and we are beginning to realize increases in waste treatment activity both in bidding opportunities, receipts and plant production, which we believe illustrates the improving nature of the market. We have also been focusing on advancing our technology offering and were pleased to announce that we have completed design and begun fabrication and construction of our new Therma-Fix Gen³, a third generation vacuum thermal desorption system. The Therma-Fix Gen³ unit offers a treatment solution for problematic waste streams while providing increased efficiency and productivity. With our initial sales launch in June 2021, and even before the unit has commenced operations, we have already secured an existing, on-site waste treatment inventory and sales pipeline, which we believe underscores the demand for this capability in both commercial and government sectors. This is just another example how we continue to develop new technologies to treat some of the world's most challenging waste streams. Overall, while we are disappointed in our Q2 performance, we believe Perma-Fix is well positioned for growth and I am proud of the business development efforts our team has initiated and completed, which highlights our ability to adapt to the market."

COVID-19

Similar to most of the US, Perma-Fix has relaxed the COVID-19-related precautions associated with ongoing operations as more people have become vaccinated, including the Company's employees. However, as the situations surrounding COVID-19 remain fluid, the full impact and extent of the pandemic on the Company's financial results cannot be

estimated with any degree of certainty. The Company is realizing pent-up demand in both segments, which has been reflected in the increases in proposal requests throughout the first half of 2021 and into Q3 2021.

Financial Results

Revenue for the second quarter of 2021 was approximately \$16.1 million versus approximately \$22.0 million for the same period last year. The decrease was primarily within the Services Segment where revenue decreased to approximately \$8.4 million for the three months ended June 30, 2021 from \$14.2 million for the corresponding period of 2020 resulting from delays in procurement actions and contract awards primarily from the impact of COVID-19. The completion of a certain large project within the Services Segment in the second quarter of 2021 exacerbated the revenue decrease in the second quarter of 2021. The Company's Services Segment revenues are project based; as such, the scope, duration and completion of each project vary. As a result, the Services Segment revenues are subject to differences relating to timing and project value. Revenue for the Treatment Segment was approximately \$7.7 million and \$7.8 million for the second quarter of 2021 and 2020, respectively. The Company's revenue within our Treatment Segment for each of the second quarters of 2021 and 2020 was negatively impacted by waste shipment delays from certain key customers due primarily to impact of COVID-19.

Gross profit for the second quarter of 2021 was \$966,000 versus \$3.3 million for the second quarter of 2020 primarily due to lower revenue generated in the Services Segment resulting primarily from the impact of COVID-19 and the completion of a certain large project as discussed above.

Operating loss for the second quarter of 2021 was approximately \$2.2 million versus operating income of \$405,000 for the second quarter of 2020. Net income attributable to common stockholders for the second quarter of 2021 was approximately \$3.0 million or \$0.25 per basic share versus \$204,000 or \$0.02 per basic share for the second quarter of 2020. Net income attributable to common stockholders for the second quarter of 2021 included a "Gain on extinguishment of debt" recorded in the amount of approximately \$5.4 million resulting from the Paycheck Protection Program ("PPP") Loan that was forgiven by the U.S. Small Business Administration in June 2021.

The Company reported Adjusted EBITDA of (\$1.7) million from continuing operations for the quarter ended June 30, 2021, as compared to Adjusted EBITDA of \$847,000 from continuing operations for the same period of 2020. The Company defines EBITDA as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA before research and development costs related to the Medical Isotope project and gain (loss) on extinguishment of debt. Both EBITDA and Adjusted EBITDA are not measures of performance calculated in accordance with Generally Accepted Accounting Principles in the United States of America (GAAP), and should not be considered in isolation of, or as a substitute for, earnings as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. The Company believes the presentation of EBITDA and Adjusted EBITDA is relevant and useful by enhancing the readers' ability to understand the Company's operating performance. The Company's management utilizes EBITDA and Adjusted EBITDA as a means to measure performance. The Company's measurements of EBITDA and Adjusted EBITDA may not be comparable to similar titled measures reported by other companies. The table below reconciles EBITDA and Adjusted

EBITDA, both non-GAAP measures, to GAAP numbers for income from continuing operations for the three and six months ended June 30, 2021 and 2020.
