NeoGenomics Reports First Quarter 2023 Results

First Quarter Revenue Increased 17% to \$137 Million

FORT MYERS, FL / ACCESSWIRE / May 8, 2023 / NeoGenomics, Inc. (NASDAQ:NEO) (the "Company"), a leading provider of cancer-focused genetics testing services and global oncology contract research services, today announced its first-quarter results for the period ended March 31, 2023.

Highlights

- **Consolidated revenue increased 17% to \$137 million**
- **Clinical Services revenue increased 16% to \$115 million**
- **Pharma Services revenue increased 22% to \$22 million**

"Our business continued the momentum we saw in the fourth quarter of last year into the first quarter with accelerated double-digit revenue growth in both the Clinical and Pharma businesses," said Chris Smith, Chief Executive Officer of NeoGenomics. "The key strategic initiatives set forth in second half of 2022 are continuing to have a positive impact on the business. Thanks to the strong execution of our Neo teammates and the growing demand for our tests from our existing client base and new customers, we continued to generate significant operating leverage as revenue favorability contributed to a significant improvement in AEBITDA."

First-Quarter Results

Consolidated revenue for the first quarter of 2023 was \$137 million, an increase of 17% over the same period in 2022. Clinical Services revenue of \$115 million was an increase year-over-year of 16%. Clinical test volume⁽¹⁾ increased by 7% year-over-year. Average revenue per clinical test ("revenue per test") increased by 8% to \$402. Pharma Services revenue increased by 22% to \$22 million compared to the first quarter of 2022.

Consolidated gross profit for the first quarter of 2023 was \$54.8 million, an increase of 43.4% compared to the first quarter of 2022. This increase was primarily due to an increase in revenue partially offset by higher payroll and payroll-related costs and an increase in supplies expense. Consolidated gross profit margin, including amortization of acquired Inivata developed technology intangible assets, was 39.9%. Adjusted Gross Profit Margin⁽²⁾, excluding amortization of acquired Inivata developed technology intangible assets, was 43.5%.

Operating expenses for the first quarter of 2023 were \$90 million, flat when compared to the

first quarter of 2022. Operating expenses included a decrease in non-cash stock-based compensation expense and professional fees. These decreases were partially offset by restructuring costs which were not included in the same period of 2022.

Net loss for the quarter was \$31 million compared to net loss of \$49 million for the first quarter of 2022.

Adjusted EBITDA⁽²⁾ was negative \$7 million compared to negative \$19 million in the first quarter of 2022. Adjusted Net Loss⁽²⁾ was \$12 million compared to Adjusted Net Loss⁽²⁾ of \$25 million in the first quarter of 2022.

Cash and cash equivalents and marketable securities totaled \$418 million at quarter end.

2023 Financial Guidance⁽³⁾

The Company revised its full-year 2023 guidance⁽³⁾, initially issued on February 23, 2023.

Use of Non-GAAP Financial Measures

In order to provide greater transparency regarding our operating performance, the financial results and financial guidance in this press release refer to certain non-GAAP financial measures that involve adjustments to GAAP results. Non-GAAP financial measures exclude certain income and/or expense items that management believes are not directly attributable to the Company's core operating results and/or certain items that are inconsistent in amounts and frequency, making it difficult to perform a meaningful evaluation of our current or past operating performance. Management believes that the presentation of operating results using non-GAAP financial measures provides useful supplemental information to investors by facilitating the analysis of the Company's core test-level operating results across reporting periods and when comparing those same results to those published by our peers. These non-GAAP financial measures may also assist investors in evaluating future prospects. Management also uses non-GAAP financial measures for financial and operational decision making, planning and forecasting purposes and to manage the business. These non-GAAP financial measures do not replace the presentation of financial information in accordance with U.S. GAAP financial results, should not be considered

measures of liquidity, and are unlikely to be comparable to non-GAAP financial measures provided by other companies.

Definitions of Non-GAAP Measures

Non-GAAP Adjusted EBITDA

"Adjusted EBITDA" is defined by NeoGenomics as net (loss) income from continuing operations before: (i) interest (income) expense, net, (ii) tax (benefit) or expense, (iii) depreciation and amortization expense, (iv) non-cash stock-based compensation expense, and, if applicable in a reporting period, (v) acquisition and integration related expenses, (vi) restructuring charges, and (vii) other significant or non-operating (income) or expenses, net.

Non-GAAP Adjusted Cost of Revenue, Adjusted Gross Profit and Adjusted Gross Profit Margin

"Adjusted cost of revenue" is defined by NeoGenomics as cost of revenue before: (i) amortization expense of acquired Inivata developed technology intangible assets, and, if applicable in a reporting period, (ii) the write-off of COVID-19 PCR testing inventory equipment.

"Adjusted gross profit" is defined by NeoGenomics as total revenue less adjusted cost of revenue.

"Adjusted gross profit margin" is defined by NeoGenomics as adjusted cost of revenue divided by total revenue.

Non-GAAP Adjusted Net (Loss) Income

"Adjusted net (loss) income" is defined by NeoGenomics as net (loss) income from continuing operations plus: (i) non-cash amortization of intangible assets, (ii) non-cash stock-based compensation expense, and, if applicable in a reporting period, (iii) acquisition and integration related expenses, (iv) restructuring charges, and (v) other significant or non-operating (income) or expenses, net. If GAAP net (loss) income is negative and adjusted net (loss) income is positive, adjusted net (loss) income will also be adjusted to reverse any recognized interest expense (including any amortization of discounts) on the convertible notes using the if-converted method unless the effect of this adjustment on both the adjusted net (loss) income and weighted average diluted common shares outstanding would be anti-dilutive. If GAAP net (loss) income is positive and adjusted net (loss) income is negative, adjusted net (loss) income will also be adjusted to reverse any recognized interest expense (including any amortization of discounts) on the convertible notes using the if-converted method.

Non-GAAP Adjusted Diluted EPS

"Adjusted diluted EPS" is defined by NeoGenomics as adjusted net (loss) income divided by adjusted diluted shares outstanding. If GAAP net (loss) income is negative and adjusted net (loss) income is positive, adjusted diluted shares outstanding will also include any options or restricted stock that would be outstanding as dilutive instruments using the treasury stock method and the weighted average number of common shares that would be outstanding if the convertible notes were converted into common stock on the original issue date based on

the number of days such common shares would have been outstanding in the reporting period, until the effect of these adjustments are anti-dilutive. If GAAP net (loss) income is positive and adjusted net (loss) income is negative, adjusted diluted shares outstanding will exclude any options or restricted stock that would be outstanding as dilutive instruments using the treasury stock method and the weighted average number of common shares that would be outstanding if the convertible notes were converted into common stock on the original issue date based on the number of days such common shares would have been outstanding in the reporting period.

Reconciliation of Non-GAAP Financial Guidance to Corresponding GAAP Measures
(in thousands, except per share amounts)
(unaudited)

GAAP net loss in 2023 will be impacted by certain charges, including: (i) expense related to the amortization of intangible assets, (ii) non-cash stock based compensation, (iii) restructuring charges and (iv) other one-time expenses. These charges have been included in GAAP net loss available to stockholders and GAAP net loss per share; however, they have been removed from adjusted net loss and adjusted diluted net loss per share.

The following table reconciles the Company's 2023 outlook for net loss and EPS to the corresponding non-GAAP measures of adjusted net loss, adjusted EBITDA, and adjusted diluted EPS:

	Year Ended December 31, 2023

Adjusted diluted shares outstanding (non-GAAP)	128,000	128,000

(11) This adjustment is for rounding and, in those periods in which GAAP net (loss) income is negative and adjusted net (loss) income is positive, also compensates for the effects of additional diluted shares included in adjusted diluted shares outstanding for the treasury stock impact of outstanding stock options and restricted stock and the if-converted impact of convertible notes.

(12) For those periods in which GAAP net (loss) income is negative and adjusted net (loss) income is positive, this adjustment includes any options or restricted stock that would be outstanding as dilutive instruments using the treasury stock method and the weighted average number of shares that would be outstanding if the convertible notes were converted into common stock on the original issue date based on the number of days such shares would have been outstanding in the reporting period, until the effect of these adjustments are anti-dilutive.
