Capitalization (For the Three Months December 31, 2023)

Share Price as of December 31, 2023	\$48.65
Common weighted average shares outstanding - diluted (in thousands)	223.1
Equity / Market Cap (diluted, \$ millions)	10,854
Net Debt (\$ millions)	1,274
Enterprise Value (\$ millions)	12,128
EV / '24 EBITDA Consensus^(g)	6.36x

Debt maturity profile, in billions, as of 12/31/2023

(a) Includes the domestic production and sale of flat-rolled steel mill products including semi finished, sheet, plate and tin mill products, the production and sale of iron ore (taconite pellets), and all domestic coke operations.

(b) Includes the production and sale of steel mill products and coke from operations located in the Slovak Republic.

(c) Includes the domestic production and sale of seamless and electric resistance welded (ERW) tubular steel mill products.

In 2020, U. S. Steel indefinitely idled ERW producing Lone Star Tubular Operations and seamless producing Lorain Tubular Operations. Today, the Tubular segment produces 100% seamless tubular steel mill product.

(d) Includes railway and real estate activities. Railway activities ceased on July 28, 2021 with the sale of Transtar, LLC

(e) Retroactively adjusted for the reclassification of stock-based compensation expense. Fourth quarter 2018 Flat-rolled earnings includes an out-of-quarter adjustment of \$7 million; full year 2018 was not adjusted.

(f) 2022 contains a \$3M Q3 retroactive wage adjustment that is only shown on a YTD basis

(g) Nasdaq IR Insight analyst average consensus of \$1,908M for 2024 EBITDA as of February 1, 2024.

* Calculated Cost per ton is average price per ton minus EBIT per ton

** Calculated Sales represent revenues from the sale of steel products only and is calculated as shipments times average realized price per ton.

*** Net Sales includes sales of steel, steel production by-products, coke and coke by-products, iron ore pellets, and intersegment sales.

(a) Excludes intersegment transfers.

(b) Retroactively adjusted for the reclassification of stock-based compensation expense. EBIT and EBITDA amounts were adjusted due to the retrospective application of accounting standards update 2017-07, "Compensation-Retirement Benefits" that was effective January 1, 2018.

(c) October 1, 2015 to December 2021 annual raw steel capability was 17.0 million net tons. Starting January 2022 annual raw steel capability is 13.2 million net tons. The denominator of the utilization includes any idled blast furnaces, if applicable at the time.

EBITDA Bridge, Q4 2022 vs. Q4 2023 (\$ millions)

Commercial: The unfavorable impact is primarily the result of lower average realized prices, which was partially offset by higher realized volumes and a more profitable product mix.

Raw Materials: The favorable impact is primarily the result of inventory revaluation, lower fuel usage, and optimized scrap mix, which was partially offset by higher raw material prices.

Operating Costs: The unfavorable impact is primarily the result of higher mining costs related to DR-grade pellet start-up and higher labor costs under the new CBA.

Other: The change is not material.

EBITDA Bridge, Q3 2023 vs. Q4 2023 (\$ millions)

Commercial: The unfavorable impact is primarily the result of lower average realized prices and lower volumes.

Raw Materials: The favorable impact is primarily the result of inventory revaluation impacts and lower alloy costs, which was partially offset by inventory adjustments.

Operating Costs: The unfavorable impact is primarily the result of planned outages and higher labor costs under the new CBA.

Other: The unfavorable impact is primarily the result of UPI idling, reduced joint venture income, and higher energy costs, which was partially offset by profit-based payments.

(c) Annual raw steel capability is 5.0 million net tons. The denominator of the utilization includes any idled blast furnaces, if applicable at the time.

EBITDA Bridge, Q4 2022 vs. Q4 2023 (\$ millions)

Commercial: The unfavorable impact is primarily the result of lower average realized prices, which was partially offset by labor and spending efficiencies due to higher shipments.

Raw Materials: The favorable impact is primarily the result of lower iron ore, scrap, and alloy costs.

Operating Costs: No change.

Other: The favorable impact is primarily the result of the strengthening of the Euro vs. the U.S. dollar and lower energy costs.

EBITDA Bridge, Q3 2023 vs. Q4 2023 (\$ millions)

Commercial: The unfavorable impact is primarily the result of lower average realized prices and product mix, which was partially offset by labor and spending efficiencies from higher shipments.

Raw Materials: The favorable impact is primarily the result of lower iron ore and coal costs.

Operating Costs: The favorable impact is primarily the result of decreased spending for planned maintenance outages.

Other: The change is not material.

* Calculated Cost per ton is average price per ton minus EBIT per ton

** Calculated Sales represent revenues from the sale of tubular products only and is calculated as shipments times average realized price per ton.

*** Net Sales above includes sales of tubular products, tubular production by-products, and intersegment sales.

(a) Excludes intersegment transfers.

(b) EBIT and EBITDA amounts were adjusted due to the retrospective application of accounting standards update 2017-07, "Compensation-Retirement Benefits" that was effective January 1, 2018.

(c) The Fairfield electric arc furnace commenced operation in October 2020 and has a raw steel capacity of 0.9 million net tons. The 2020 production as a % of total capability amount is based on an October 1, 2020 start date.

EBITDA Bridge, Q4 2022 vs. Q4 2023 (\$ millions)

Commercial: The unfavorable impact is primarily the result of lower average realized prices.

Raw Materials: The favorable impact is primarily the result of lower scrap costs and higher yields.

Operating Costs: The change is not material

Other: The favorable impact is primarily the result of lower United Steelworkers variable compensation.

EBITDA Bridge, Q3 2023 vs. Q4 2023 (\$ millions)

Commercial: The unfavorable impact is primarily the result of lower average realized prices, which was partially offset by higher shipment volumes.

Raw Materials: The favorable impact is primarily the result of higher yields and lower scrap costs.

Operating Costs: The favorable impact is primarily the result of the absence of spending and labor costs associated with a planned outage in Q3.

Other: The favorable impact is primarily the result of lower United Steelworkers variable compensation.
